questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
In my view neither bigger warnings nor picture warnings or plain packs are required in case of cigars. Cigar smokers are adults, enjoying a cigar on an occasional basis

which option
No change

questions on reporting
problem definition
No

explanations
EU member states can already introduce fees and sanctions

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke

which option
No Change

access to tobacco products
problem definition

No

explanations
In my view a display ban would effectively mean the end of most small (cigar) brands

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of

toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
No

explanations
Die Problemdarstellung enthält lediglich vage Einschätzungen im Hinblick auf eine mögliche Binnenmarktverzerrung oder ein mögliches Versagen bei der Sicherstellung eines hohen Gesundheitsschutzniveaus aufgrund fehlender einheitlicher Bestimmungen für die Regulierung von nikotinhaltigen oder zigarettenähnlichen Produkten in den Mitgliedstaaten. Zudem vermeidet die Kommission jede Form der Wertung in Bezug auf das Subsidiaritäts- und Verhältnismäßigkeitsprinzip. Jede Form der Regulierung von „Tabakerzeugnissen“ muss auf der Grundlage wissenschaftlicher Erkenntnisse sowie der zweifelsfrei gegebenen Rechtssetzungskompetenz der EU basieren. Dies gilt auch für mögliche Regulierungen oder gar Verbote für nikotinhaltige Produkte, die keinen Tabak enthalten oder zigarettenähnliche Produkt (Kräuterzigaretten). Eine Einbeziehung von nikotinhaltigen Produkten oder zigarettenähnlichen Produkten in den Geltungsbereich der Richtlinie kann nicht allein aus der Begründung heraus erfolgen, dass diese Produkte neu sind und nach der Auffassung der Kommission auch auf eine entsprechende Nachfrage in den einzelnen Märkten der EU 27 treffen. Oder aus der Begründung heraus, dass diese Produkte bisher keiner wissenschaftlichen Bewertung (Unbedenklichkeitsprüfung) unterzogen wurden.

which option
No change

questions smokeless
problem definition
No

comments
Der Konsum rauchloser Tabakerzeugnisse durch erwachsene und aufgeklärte Personen gefährdet weder die Gesundheit Dritter noch schränkt der Konsum dieser Produkte andere Personen in ihren Lebensgewohnheiten ein. Der Konsum dieser Produkte liegt in der Eigenverantwortung des Einzelnen. Das Bewerben und Verkaufen dieser Produkte muss daher möglich sein. Das EU-weite Verbot von Snus (Ausnahme Schweden) stellt eine massive Entmündigung der Bürger dar. Denn die erwachsenen Verbraucher haben das Recht, auch bei Genussmitteln mit Gesundheitsrisiken die Wahl zu haben und eigenverantwortliche Entscheidungen zu treffen. Aus der Problemdarstellung der Kommission lässt sich keine wissenschaftlich fundierte Grundlage ableiten, die ein EU-weites Verbot von Snus (Ausnahme Schweden) oder anderer rauchloser Produkte rechtfertigen könnte. Beispielsweise vermissen wir in der Problemdarstellung wissenschaftlich fundierte Wirkungsanalysen aus Ländern, in denen Snus oder andere rauchlose Tabakerzeugnisse konsumiert werden.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Es gibt keinen überzeugenden Beleg dafür, dass ein Warnhinweis umso wirksamer ist, je größer sein Format. Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht–die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür werden allerdings keine Nachweise aus den Ländern zugeliefert, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden. Eine Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs-und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der Bürger. Stichhaltige wissenschaftliche Nachweise, dass Tabakverpackungen und Produktmerkmale von Tabakerzeugnissen das Raucherverhalten von Verbrauchern beeinflussen/fördern, existieren nicht. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend-und Gesundheitsschutz, Steuereinnahmen…) kontraproduktiv und bedroht die Existenz des reinnationaltätigen Groß- und Einzelhandels in Deutschland. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein nationaltätigen Groß-und Einzelhandels in Deutschland. Die Kommission selbst hat im Rahmen der Tabak-Produkt-Richtlinie die Höchstgehalte an Teer, Nikotin und Kohlenmonoxid begrenzt. Eine Darstellung, dass Verbraucher aufgrund der niedrigeren Höchstgehalte den Konsum der Produkte als weniger riskant für ihre Gesundheit einstufen könnten, ist daher absurd.

which option
No change

questions on reporting
problem definition
No

explanations
Ob die Behörden Schwierigkeiten bei Vergleich und Analyse der Daten haben oder die Erfassung und Analyse der gemeldeten Daten über Inhaltsstoffe erhebliche Ressourcen auf Seiten der zuständigen nationalen Behörden erfordern, wie von der Kommission dargestellt, kann nicht beurteilt werden. Wenn dies so wäre, verwundert es sehr, dass der Anstoß in Richtung einer Vereinheitlichung und Vereinfachung nicht aus den Mitgliedstaaten selbst hervorgeht, sondern von der Kommission vorgebracht wird und dann im Zusammenhang mit einer Option, die der Wirtschaft zusätzliche dauerhafte Kosten (jährliche Gebühr) auferlegen würde. Die Mitgliedstaaten selbst sind gefordert, zusammen mit der Wirtschaft einen

pragmatischen Weg zu diskutieren und umzusetzen. Ein notwendiger Handlungsbedarf oder gar ein Mandat der Kommission zum Eingriff in bestehende nationale Abläufe wird nicht ersichtlich.

which option
No change

regulation of ingredients
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Der Begriff „attraktiv“ ist ein subjektives Kriterium für ein Verbot oder eine Regulierung von Zusatzstoffen und entbehrt jeglicher wissenschaftlicher Grundlage. Die Verbreitung des Rauchens in Ländern wie Großbritannien und Irland, in denen vorwiegend Zigaretten ohne Zusatzstoffe verkauft werden (Produkte des Virginia-Typs), ist nicht geringer als die Verbreitung in Ländern, in denen vorwiegend Zigaretten mit Zusatzstoffen (American-Blend-Produkte) verkauft werden. Wettbewerbsrechtliche Auswirkungen einer einseitigen Regulierung von Produkten mit Zusatzstoffen werden nicht thematisiert. Die Frage nach der Wirkung auf das Preisgefüge in den EU 27 Märkten sowie Effekte auf den illegalen Handel mit Tabakerzeugnissen werden nicht thematisiert.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Die Darstellung, dass in einer Vielzahl von Mitgliedstaaten der Vertrieb von Tabakautomaten verboten ist, ist keine Problembeschreibung. Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dieser folgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. Der Problembeschreibung stimme ich nicht zu. Die Bereiche „Verkauf von Tabakwaren über Zigarettenautomaten“ und „Mindestaltersgrenzen für den Bezug von Tabakwaren“ sind Themen, die eindeutig in den Zuständigkeitsbereich der Mitgliedstaaten fallen. Die Problembeschreibung „Zigarettenautomat“ ist überflüssig, da die Kommission selbst bereits bei ihrem Bericht zur Umsetzung der Ratsempfehlung 2003/54/E Caus November 2009 festgehalten hat: –Insgesamt ist die Umsetzung der Empfehlung zufrieden stellend. –Dies betrifft insbesondere die Verpflichtung, das Mindestalter für den Kauf von Tabakwaren zu überprüfen sowie die Durchführung von Maßnahmen zur Beschränkung der Verwendung von Automaten durch in der jährige Personen.

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

I desagree EU must spent more time adressing , other urgent problem due to the economy crisys instead to spent time on tobacco. Public health must focus the attention on Hositals , health assistance medical services granted to all citizens for free, alcool (No regulation) , fat food consumption and related ingredients,pollution !

which option
No change

recommend option
No one , it just look like a persecution for smokers that already paid a lot of exise taxes to buy their products , proposed regulation could potentially enhance contraband and "fake" products production helping criminal gamgs growth !

country
Italy

age
74

gender
female

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Manuel Díaz-Guardamino Delclaux

email

mnl.dgd@gmail.com

country
Spain

age
49

gender
male

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
Any efort in preventing young people access should be emphasized. Based on scientific evidence, if they have harming potential, Electronic cigarettes, nicotine candy and beverages and non tobacco cigarettes should be included in dierctive.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

additional option
I don't think snus is worse than cigarettes and is something typical only in Sweden. What makes tobacco unhealthy is combustion. Aubergines have nicotine and are not banned.

questions consumer
problem definition
No

explanations
I think actual legslation is enough. Eventually we will receive a book of warnings everytime we buy a pack of tobacco, and I won't read it (maybe the 1st time).

which option
No change

questions on reporting
problem definition
No

explanations

As far as I know Tobacco Co. already report regularly their ingredients. Anyway, the ingredients are not as dangerous as the combustion of tobacco (If someone chewed them it won't hurt as much as smoking them).

which option
Establish a common compulsory reporting format

additional options
Right now, in Spain, we have the posibility of having a legislation for this for each region (Com. Autónoma) the nost unified, the better.

regulation of ingredients
problem definition
No

explanations
I don't think Virginia tobacco with no ingredients is healthier than American Tobacco.

which option
No Change

additional option
Care should be taken with ingredients that are more "attractive" for minors.

access to tobacco products
problem definition
No

explanations
I don't think that restricting adv. on point of sale is a good idea: If Ionly a price list can be seen, people will end buying cigarettes in the internet, with a lot less control, specially for younger people. Also, vending machines can be overtaxed, but banning them it will only change habits of smokers on short term, and make more uncomfortable to buy.

which option
No change

additional option
Care with internet selling, with minors access, with smuggled cigarettes should be taken. Advertising should only be done in point of sale (and only there, or in smokers clubs), and under 18 should not be allowed in (nor in sex shops).

Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this

statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
Extend the scope of the Directive

recommend option

Zapisy dyrektywy powinny odnosić się jednolicie do wszystkich produktów, które zawierają związki smoliste (np. nikotynę) - papierosy elektroniczne, szisze, plastry, pastylki powinny podpadać pod zakres dyrektywy

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

additional option
Każda osoba z osobna niech decyduje o swoim zdrowiu. NIe należy zakazywać spożywania żadnych z produktów. Ostrzeżenie o szkodliwości jest wystarczające, do odpowiedzialnego podjęcia decyzji. Ani Państwa, ani Unia Europejska niech nie ingeruje w wolność wyboru, nawet do trucia, skoro to ludziom sprawia przyjemność i płacą za wybraną, w sposób wolny, przez siebie używkę akcyzę. Dyrektywy nie powiiny zakazywać, lecz nakładać opłaty i w ten sposób zarabiać na używkach. Niech to będzie dla Państwa rekompensata, za publicxznie szkodliwy wybór obywatela, ale wybór wolny i pełnoprawny.

questions consumer
problem definition
No

explanations
Problemem nie jest to jak wyglądają produkty, które kupujemy, lecz motywy, jakie nami kierują. Prewencja, a nie zapobieganie. Lepiej skupić się na działaniach edukacyjnych jużod najmłodszych lat, a nie ingerować w wolny rynek producentów. Żadne państwo, żadna instytucja nawet, a może przede wszystkim tak potężna jak Unia Europejska nie może ingerować w podstawowe prawo rynku - to jest w jego wolność. Informacja, edukacja, podnoszenie wiedzy to najlepsze i jedyne metody ochrony konsumenta. Państwa, Instytucje, Rządy, Organizacje nie są w stanie chronić człowieka przed nim samym, a w próbie takiej ochrony uderzają najczęściej w wolność obywateli i przedsiębiorstw.

which option
No change

additional option
Chciałbym poznać mędrka, który uważa, że przez zjednolicone opakowania - uderzając w tym samym w wolność rynkową - zmniejszy się spożycie produktów tytoniowych. Jest to iluzoryczne i błędne myślenie. Nie zgadam się z takim podejściem i ostro przeciw niemu protestuję. Sam jestem osobą niepalącą i choćby nie wiem co, żaden kolor, żadne piękne opakowanie papierosów, żadna sugestywna reklama nie jest w stanie mnie skłonić za palenia papierosów. Wystarczy przeczytać zaledwie kilka książek o uzależnieniach, być zdać sobie sprawę z faktu, iż to nie alkohol, nie paierosy, nie narkotyki są problemem alkoholizmu, uzależnienia od tytoniu, czy narkomanii. Te produkty są tylko środkiem, a nie przyczyną problemu. Błądzicie, motacie się, chcecie wprowadzać dyrektywy, które nic nie zmiania w spożyciu papierosów - i jednocześnie chcecie uderzyć w wolnosć rynkową, w ludzką świadomość i mądrość. Wprowadzając takie dyrektywy poniżacie obywateli, a nie pomagacie im. To szkodliwe i nacjonalistyczne działanie. Pomysł jednostki, nie może wpływać na ład

społeczny. Tak było, ale być tak dalej nie może.

additional comments
Im trudniej i drożej coś kupić na legalnym rynku (z którego nota bene Państwo ma profity - VAT, akcyza), tym częściej ludzie uciekają w szarą strefę. Sprzedaż legalnych wyrobów spada i Wy to korelujecie ze spadkiem ogólnego spożycia wyrobów tytoniowych. Ośmieszacie się takimi płytkimi wnioskami, i pokazujecie własną niekompetentność. Nie zdajecie sobie sprawy z rozmiaru nielegalnego rynku, czy to wyrobów tytoniowych, czy alkoholu lub narkotyków. Zapominacie, że więcej szkód wyżądza słaba jakość produktów na nielegalnyum rynku, niż produkty wysokiej jakości na rynku legalnych produktów. Jesteście ślepi na te liczby. Wasza niewiedza doprowadzi kiedyś do upadku Unii. Nie tylko tej europejskiej, ale i każdej kolejnej której podwalinami działania, będą przez Was przyjęte założenia i normy.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

additional options
INformowanie zawsze powinno być ustandaryzowane i kontrolowane. Ważne jest aby Państwo lub Instytucja (Unia) była gwarantem dla konsumenta, że to co podaje producent jest prawidłowe i sprawdzone przez odpowiednie jednostki państwowe czy unijne.

regulation of ingredients
problem definition
Yes

which option
No Change

additional option
Kolejna głupota w wykonaniu Unii Europejskiej. Może w niedalekiej przyszłości do powa nie będzie można dodawać chmielu? Albo do wódki nie będzie można dodawać aromatu np. cytrynowego? Odpowiednie instytucje niech trzymają pieczę nad informacją i jej rzetelnością, a nie mówi klientowi co ma konsumować. Ten protekcjonizm jest niebezpieczny u podstaw.

access to tobacco products
problem definition
Yes

which option
No change

additional option
Nie zgadam się z zakazem reklamy wyrobów tytoniowych. Przez te bzdury koncerny tytoniowe nie mogą sponsorować legalnych przedsięwzięć. W mieście którym żyję firma tytoniowa działała bardzo prężnie na rzecz społeczności lokalnej, ale w chwili obecnej ma

ręce związane. Nie może działać na szerszą skalę. Chcecie chronić, a jednocześnie psujecie dobry układ, który wypracowały sobie firmy i społecznoścli lokalne. Zakazami robicie więcej szkód niż pożytku. Nie wprowadzać zakazu, a nawet zliberalizować i dać firmą możliwość wyjścia z wąskiego kanału marketingowego. Przyniesie to więcej pożytku i społecznością lokalnym i społeczeństwu jako całość - firm takie będą wydawać więcej na marketing i reklamę. Zarobią inne firmy, dając tym samym pracę.

Rezultatem zakazu stosowania dodatków smakowych do wyrobów tytoniowychmogłaby być likwidacja upraw tytoniu Burley w Polsce i utrata miejsc pracy 40% polskich plantatorów oraz ryzyko, że palacze będą kupować papierosy pochodzące z kontrabandy, bądź podrabiane, które byłyby, takie jak dotychczas.

questions scope
problem definition
Yes

which option

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option

No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of

toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Ich bin zwar der Meinung, dass einige dieser Produkte auch nach Maßgabe der TPD geregelt werden könnten. Allerdings halte ich die Option 1 fü die Geeignestste. Eine Wahl der Option 2 würde automatisch ein Verbot bestimmter Produktkategorien (z.B. Tabak zum oralen Gebrauch) bedeuten - allerdings ohne wissenschaftliche Beurteilung. Vor Aussprache eines Produktverbotes bin ich für eine verpflichtende Durchführung einer wissenschaftlichen Beurteilung.

Es gibt meines Erachtens keine wissenscahaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, protenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung auf die Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beiträge für Gebühren und Sanktionen zwischen den Mitgliedstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Ich bin der Meinung, dass grundsätlich der Fokus bei der Evaluierung von Zusatzstoffen auf der toxischen Wirkung des Rauches liegen sollte.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die dargestellte Problemstellung zeilt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und ide Verfügbarkeit der Produkte ab. Weiterhin werden

keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen.

which option
No change

additional option
Internetkäufe könnten z.B. durch Altersbeschränkungen eingeschränkt werden.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
Irregardless from the fact that I am a non-smoker I feel sorry for the loss of character and originality in a tobacconists shop induced by overregulatory hyperactivism for the "sake of the consumer". This means to me, that so far the EU has not managed to do something about the proper education (despite al available means of IT - PC - TV - and most sophisticated means of providing education, good habits, knowledge and COMMON SENSE to the consumer. This step would drive me crazy as a consumer of tobacco products (I am not) and makes me think, ask and doubt: WHAT IS NEXT in this intelligent way of avoiding or activating the use of brain cells in an average consumer?? YES we are stupid - we are kept or made stupid by this kind of directives. We could do better, we the consumers.... According to what is meant to be changed, the next step -in order to abide by the principle of equality- would mean NO NAME LABELS for any alcoholic drink.....isn´t it? But do the member states cut into the flesh of the own hand that is extending and selling booze?? NO they won´t do that, cause they are earning to much tax on those pityful and poor drunkards who can´t stop it....or on each o us who fancies a good glas of Sauvignon with a meal. ONE DAY WE WILL SIT ON A THREE LEGGED CHAIR TO SAVE THE NATURAL HABITAT OF A BUG, A WORM OR A WOODPECKER. The over inflated regulatory structure in the EU might well be eating up itself one day, when there is nothing left to regulate about. Hopefully I - the consumer- live long enough to see this happen. Have a nice day and please, spend some time thinking of the young people growing fat, because there are no places left for offroad-riding and similar outdoor-activities that can be harmful, noisy or endager other species. We the consumer take your pills and medicines to stop fat making us sick. We all live in a well administered and surveyed cage.....and some day we´ll go into the coffin. BUT let us - dumb consumers - choose the way to make our retreat.

which option
No change

recommend option
Yes, tell consumers, -and appeal to tir common sense in as many languages as possible - that if they smoke, drink, or use eather soled shoes in winter this might be hazardous to their existance and that it could gain them a DARWIN AWARD.

additional comments
Why is the European Commission such a huge entity? A MEGACEPAHLIC ENTITY, with little feet.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer

problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Mittlerweile sind wir ausreichend in Kenntnis gesetzt, welchen Gefahren man sich begibt, wenn man dem Rauchen nachgeht. Ich bin daher der Meinung, dass es keine weiteren Bilder oder Texte bedarf. Jeder mündige Bürger sollte anhand dieser Kenntnisse selber entscheiden können, ob er sich den Genuss einer Zigarre (wie aber auch einem guten Whisky etc.) nachgehen will oder nicht.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

recommend option
The Directive's scope should certainly include the specified products. However, no ban should be imposed without prior scientific review of the product in terms of its harmfulness to the human body.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no obvious scientific evidence that larger warnings or images are better suited to discourage potential smokers from smoking or to convince smokers to quit smoking. Even on plain packaging, there is to date no evidence that they have an impact on the population's health. Plain packaging would instead tend to accelerate counterfeiting and illegal trade in tobacco products, because protection against product counterfeiting cannot be guaranteed.

which option
No change

additional option
Numbers, for instance, which were determined using a different measurement method (e.g. Health-Canada test methods), might be used for better labelling of ingredients. As a result customers would get more precise information about the measured values.

questions on reporting
problem definition
No

explanations
Law enforcement is the Member States' duty and not the EU's. Even if the EU introduces this principle, fee and penalty rates would differ among the Member States. This is because it is each country's responsibility. An improvement of the internal market's functioning is thus not obvious.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
The focus when evaluating additives should be quite fundamental on whether their use increases the toxic effect of cigarette smoke. It should not proceed from the attractiveness of the substances, since this is based almost exclusively on subjective criteria.

which option
No Change

access to tobacco products
problem definition
No

explanations
The problem presented here is not aimed at public health problems associated with tobacco use and the products' availability. Furthermore, evidence is not offered to suggest that such prohibitions strengthen the internal market or lead to a reduction in tobacco consumption

which option
No change

additional option
Internet purchases could, for example, be restricted by age limits.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer

problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Specific products should certainly be included in the Directive, however, only after a thorough scientific analysis and judgement whether they are harmful to the humain being or not. No incooperation of products in the Directive just for arguments sake.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no evidence for me that larger health warning on cigarette packs or any picture or other images in larger scales make people quit smoking. Furthermore there is no evidence that these health warning or pictures prevent people to start smoking. The idea of plain packaging is again based on know research and evidence that people would smoke less. Plain packaging would be a big opener to the global cigarette counterfeiting market because it will be much easier to produce fake products. There is not law enforcement place strong enough in the world to prevent counterfreit production and plain packaging would increase this "industry" significantly.

which option
No change

additional option
Provide customer better information which ingredients are used, measure them and express in figures and print on packs.

questions on reporting
problem definition
No

explanations
Law Enforcement is the ownership of each member country of the EU. Even if the EU introduces directives, principles, may be fees and penalties it is the member state to define the rates. Hence, they can differ from country to country. Therefore the improvement of the intermal market functioning is not obvious.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
When additives are evaluated the focus should be to determine whether they increase the toxic effect of cigarette smoke. It should not proceed from the attractiveness of the substances since this is based almost exclusively on subject criteria.

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no evidence given that these prohibtions would be leading to a reduction in tobacco consumption. Further more they would not strengthen the internal EU market. The problem definition is not targeting health political issues in context with cigarette consumption and its availability.

which option
No change

additional option
Sales of cigarettes through the internet should be subject to the restriction by age limits.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
No

explanations
Es gibt meines Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung auf das Rauchverhalten der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

which option
No change

additional option
Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

questions on reporting
problem definition
No

explanations
Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit durch diese Maßnahme nicht ersichtlich.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Der Fokus bei der Evaluierung von Zusatzstoffen sollte grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

Meiner Meinung nach, braucht es das alles nicht. Bereits mit diesen Warnings, welche zur Zeit auf den Raucherwaren gedruckt sind, wird bei einem Raucher nichts erreicht. Ich schrecke nicht vor diesen Bildwarnings zurück und würde auch aus anderen Gründen nicht davor zurückschrecken. Wenn jemand Raucher sein will, dann wird er das bleiben, egal was auf der PAckung abgebildet ist. Wieso soll man seine Produkte nicht so gestallten können wie man es sich vorstellt!!! Aber, auch wären die Packungen weiss, würde weitergeraucht werden.

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent

proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

explanations
Dass die Existenz von Zigarettenautomaten einen Einfluss auf das Rauchverhalten Jugendlicher hat, ist wissenschaftlich nicht nachgewiesen. In Ländern mit einem Automatenverbot fällt die Quote jugendlicher Raucher zum Teil deutlich höher aus als in den Ländern mit einer Automatenvertriebsstruktur. Pläne der Europäischen Kommission zur Abschaffung der Automaten schränken daher die Bezugsmöglichkeiten erwachsener Verbraucher ein, dienen dem Jugendschutz jedoch in keiner Weise.“

Eine Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs- und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der Bürger.

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
Dass die Existenz von Zigarettenautomaten einen Einfluss auf das Rauchverhalten Jugendlicher hat, ist wissenschaftlich nicht nachgewiesen. In Ländern mit einem

Automatenverbot fällt die Quote jugendlichen Raucher zum Teil deutlich höher aus als in den Ländern mit einer Automaten- Vertriebsstruktur. Pläne der Europäischen Kommission zur Abschaffung der Automaten schränken daher die Bezugsmöglichkeiten erwachsener Verbraucher ein, dienen dem Jugendschutz jedoch in keiner Weise. Organisierte Kriminalität wird das Vakuum füllen, das entsteht, wenn legale Verkaufsstellen verschwinden.

Die Veränderung vernichtet Arbeitsplätze und Existenzen und ist ein enormer Eingriff in die Persönlichkeitsrechte von Leuten, die Tabak gerne konsumieren und diesen Konsum auch genießen möchten! Der Konsum von Tabakwaren ist eine persönliche Entscheidung, sie bringt dem Staat Milliarden Steuergeldern und ist für Raucher ein Genussmittel. Durch die geplanten Veränderungen werden wohl kaum Leute mit dem Rauchen aufhören, weil sie die Verpackungen auf einmal langweilig finden oder sie sagen, der Geschmack wäre lau.. Viel mehr fühlen sich Millionen Raucher diskriminiert und in höchstem Maße angegriffen, da die Raucher zunehmend als Störenfriede, und gesellschaftliche Last dargestellt werden. Und diese Situation ist meiner Ansicht nach sehr gefährlich und sollte absolut nicht noch mehr verschärft werden, indem man Raucher und das Rauchen selbst als immer 'schrecklicher' darstellt und das Rauchen langsam komplett zu einer Randgruppenerscheinung werden lassen will.. Das sind die wichtigsten Gründe, warum diese Veränderung KEINESFALLS in Kraft treten darf.

Il n y a pas d' études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Aucune étude ne prouve l efficacité des produits neutres, ni des photos chocs, ni de plus grands avertissements sanitaires sur les paquets. Les photos chocs vont pousser les consommateurs français a aller s approvisionner sur les marches parallèles du tabac. Ces mesures risquent de pénaliser le réseau des buralistes français organises dans un réseau réglemente et sous tutelle de l état. Les paquets neutres risquent d' entraîner une hausse des prix du tabac (ce sera le seul moyen pour les fabriquant s de se différencier.)

which option
No change

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Cela risque d' entraîner une standardisation de la production avec comme conséquence une diminution de l offre au fumeur adulte et responsable et le risque de voir apparaitre une

augmentation des produits du tabac contrefaits.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access; Ban

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale

which one2
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

additional comments
Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La france dispose d' un réseau de 28000 buralistes préposes de l administration, responsables et seuls habilites a vendre du tabac. Ce réseau est fortement réglemente par l état, ce qui permet déjà de contrôler efficacement l accès au produit tabac.

weil diese Vorschriften sinnlos sind, schlecht für die Industrie und es völlig irrelevant ist, wie die Zigaretten aussehen. Außerdem werden Raucher immer mehr zu einer Randgruppe, werden diskriminiert und der Staat hält immer noch schön die Hand auf, damit sie aus den ungeliebten Raucher auch noch Profit schlagen.

In my opionen, thes will create extra costs in the EU (not payed by the politcans!!! by the EU-citizans!!!). And again, im tired about thes types of "brainless rules". See Actual new taxlaw in GER -> how can we close the"whole of money" in our budget?? Ohhh. yes he we go, there are still some smokers, we can involve into the storry!!!!!!! And if we can not find any more smokes, please have a look at the wintrinkers, so they can solve our moneyproblems, and than??? But please, let us built up some addtional EU-departments to burn money!!!

questions scope
problem definition
Yes

which option
No change

additional comments
le champ d application de la directive pourrait etre etendu pour couvrir ces autres produits mais ne devrait pas exclure automatiquement une categorie de produit (nouvelle forme de tabac oral). Toute interdiction devrait s'appuyer sur des bases scientifiques.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

additional comments
L'interdiction du snus ne semble pas justifiee et devrait etre levee. D'importants elements scientifiques montrent que le snus est beaucoup moins nocif que les cigarettes.

questions consumer
problem definition
Yes

which option
No change

additional comments
Il n'y a aucune preuve qu'une augmentation de la taille des avertissements sanitaires soit plus efficace. Il n'y a aucune preuve que le paquet generique ameliore le fonctionnement du marche interieur ou ait un impact benefique pour la sante publique. Cela faciliterait la tache des criminels qui copient les paquets et entrainerait du commerce illicite des cigarettes.

questions on reporting
problem definition
Yes

which option
No change

additional comments
La question de l'evaluation des ingredients devrait uniquement poser le probleme de l'augmentation ou non de la toxicite de la fumee et du tabac. Les etats membres peuvent deja introduire des frais d enregistrement et des sanctions. La mise en oeuvre de telles mesures qui seraient prevues par la directive doit rester de la responsabilité des etats membres de l UE.

regulation of ingredients
problem definition
Yes

which option
No Change

access to tobacco products
problem definition
Yes

which option
No change

additional comments
Le probleme de l'exposition des produits sur le point de vente est mal pose. Il n'y a pas de preuve que ces interdictions ameliorerait le fonctionnement du marche interieur ou repondent aux objectifs de sante publique.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
Statt diversen Änderungen die nicht nur der Tabakindustrie sondern auch den Händlern und den Verbrauchern schaden wäre es sinnvoller den Genuss von Tabakwaren, egal welcher Art, grundsätzlich erst mit erreichen der Volljährigkeit zu genehmigen. Selbiges gilt natürlich auch für Süßigkeiten usw. die Nikotin erhalten. Schließlich sollte jede/r der/die als Erwachsene/r gilt in der Lage sein das Risiko des Konsums selbst abzuschätzen, denn, wenn jeder der die Volljährigkeit erreicht hat für seine Taten gegenüber anderen selbst verantwortlich ist, sollte auch jeder für seine Taten sich selbst gegenüber verantwortlich sein und nicht bevormundet werden.

questions smokeless
problem definition
No

comments
Ob nun Smoke oder Smokeless, die Risiken sind wohl die selben. Und wie ich bereits sagte, sollte jeder selbst entscheiden können und vorallem dürfen, was er konsumiert. (Womit ich natürlich keine sog. "harten" Drogen wie Kokain und dergleichen meine. Die sind zurecht verboten.)

which option

No change

additional option
Wie ich bereits schrieb, sollte das konsumieren von Tabakprodukten und Ähnlichem erst mit erreichen der Volljährigkeit erlaubt werden.

questions consumer
problem definition
No

explanations
Das ist, schlicht gesagt, Unsinn. Ich kenne etliche Leute, die genau wie ich selbst auch, nicht im geringsten auf die Verpackung achten und auch Warnbilder schlicht ignorieren würden. Und wer ernsthaft glaubt, eine Zigarettenmarke sei "gesünder" als die andere sollte lieber nochmal am Biologieunterricht der 7ten(+) Klasse teilnehmen. Da haben wir nämlich die Risiken des Rauchens gründlich erklärt bekommen, mit Bildmaterial und allem drum und dran.

which option
Improve consumer information

which improvement
Health warnings to be put on water pipes

additional option
Es wäre wesentlich sinnvoller, das Thema "Risiken des Rauchens" zum Pflichtthema im Biologieunterricht zu machen. Und zwar nicht erst in der letzten Klasse sondern bereits in der siebten oder achten Klasse. In diesem Alter rauchen viele, spätere Raucher, noch nicht und wenn sie im entsprechenden Altern bereits die Risiken kennen lernen und auch, anhand von Bildmaterial, sehen, wird das viele abschrecken. Vorallem wenn das Bildmaterial nicht nicht Schäden zeigt, die an den inneren Organen entstehen sondern Schäden, die am Äußeren entstehen, das jeder sieht. Denn immerhin sind grade Jugendliche sehr auf ihr Aussehen bedacht und versuchen ihren Idolen möglichst ähnlich zu sehen.

questions on reporting
problem definition
Yes

which option
No change

regulation of ingredients
problem definition
No

explanations
Ich halte Listen dessen, was in dem betreffenden Land an Zusatzstoffen verboten bzw erlaubt ist durchaus für ausreichend. Wer sich Zigaretten mit einem bestimmten Zusatzstoff, beispielsweise Menthol, kauft, tut dies schließlich wegen des Geschmacks und nicht wegen einer "tieferen Inhalation".

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of

toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless

problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Der Geltungsbereich der Richtlinie sollte durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Es gibt unseres Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

which option
No change

additional option
Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit

Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope

problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this

statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Der Geltungsbereich der Richtlinie sollte durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

questions smokeless
problem definition

Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Es gibt unseres Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

which option
No change

additional option
Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

questions on reporting
problem definition
No

explanations
Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Der Fokus bei der Evaluierung von Zusatzstoffen sollte ganz grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.
