There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition

No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products

problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

male

questions scope
problem definition
No

explanations
No, I disagree with the problem definition. The problem definition provided by the Consultation document is vague, confused and inaccurate. There is no analysis within the Consultation document of Union competence to adopt the proposed options and no discussion of the internal market issues that would be required in order for the Union to proceed on the proposed option. Furthermore, the problem definition does not contain any evidence to demonstrate the justification for the various options provided in this section

which option
No change

recommend option
no

additional comments
no

questions smokeless
problem definition
No

comments
No, the problem definition is not acceptable as drafted. It is vague, confused and unclear. Statements in the problem definition address all smokeless tobacco products without making any differentiation between the various types of products in this category. By ignoring this variety, the Consultation creates confusion rather than providing clarity to allow for objective policy choices.

which option
Lifting the ban on snus

additional option
no

additional comments
Snuss nis legally sold in a number of countries worldwide and we believe there is no justification for a ban on snus within the EU.

questions consumer
problem definition
No

explanations
No. There is no credible or scientific evidence which demonstrates this is a necessary step. This problem definition tries to cover too many options at once. Packaging provides consumers who wish to purchase products with information about the product they have chosen. Tobacco packaging has never been identified as a reason why children start to smoke or why adult smokers continue to choose to smoke. Plain packaging would lead to an increase in counterfeit products and illicit trade. It will have a negative impact on competition. Plain packaging expropriates the brand owners of valuable intellectual property. Pictorial health warnings make no additional contribution to the public awareness of the risks.

which option
No change

additional option
No

additional comments
no

questions on reporting
problem definition
No

explanations
No. All EU Member States need to agree to and adopt the common reporting format for ingredient reporting in a fully harmonized way. Introducing fees and sanctions is clearly outside the Commission's competence. With regard to this option, the Commission has also failed to analyse the impact of registration fees on the functioning of the Internal Market as the level of fees would vary between Member States and would impede its functioning. Also, registration fees would likely lead to a further increase of Anti-Illicit Trade.

which option
Establish a common compulsory reporting format

additional options
Establishing a common compulsory reporting format. But this would have to be on the basis of an appropriate scientific criteria, and not based on subjective concepts such as “attractiveness”.

additional comments
no

regulation of ingredients
problem definition
No

explanations
No, I do not agree with the problem definition. The concept “attractiveness” is an unsound base for regulation. Ingredients give brands distinctive styles -> competition. Ingredients also apply to substances in the non-tobacco materials needed to eg. filter, paper adhesive etc. There is no evidence that ingredients enhance or in themselves are addictive. The problem definition incorrectly defines the use of ingredients and claims without foundation that the majority form carcinogens, mutagens and/or toxic for reproduction. In the case of, for example, mentholated cigarettes have been available for several decades yet there is no credible scientific evidence to suggest that their use is associated with increased smoking incidence, increased consumption, change in smoking behavior or reduced quitting rates compared to other cigarettes. Furthermore, there is no evidence that smokers of mentholated cigarettes inhale more deeply.

which option
No Change

additional option
No, but a common list of authorized ingredients could be generated using both sound and scientific principles and criteria.

additional comments
no

access to tobacco products
problem definition
No

explanations
No. The problem definition is vague and incomplete. The display of tobacco products at PoS is important to the proper operation of a market economy in the sale of legal tobacco products. It informs the consumer of the products available, their characteristics, their price and the pack sizes available. Particularly in situations where other channels of communication may be restricted, consumers must be able to identify easily, quickly and effectively the existence and availability of tobacco products and to distinguish between them. Product display ban could exacerbate the illicit trade in contraband and counterfeit products. Consumers would not be able to distinguish legally traded and illicit products. Vending: vending machines in Belgium are strictly controlled to prevent sales to children. It is therefore unnecessary and disproportionate to prohibit tobacco vending.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients

problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

recommend option
The directive could cover more products but their ban shloud not be done automaticaly (that they are on the list)

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is not evidence that plain packaging will have positive influence on public health benefits. There is not any evidence that bigger health or grapfical warning has higher impact to consumer. The plan packaging improves illegal production of cigarettes and support its contraband between the countries. Illegal cigarettes contain unspecific components without any control and they are much more times health dangerous then legal cigarettes. The plain

packaging will support and increase the illegal business that undermines the government budget and income from taxes.

which option
No change

questions on reporting
problem definition
No

explanations
The enforcement of EU directive should remains in responsibility of each specific country of EU.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The ingredients testing should be focused on whether the ingredients result in increased the toxicity in tobacco smoke

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no evidence that the ban of vending machines (with the age control access) will decrease the less consumption of the cigarettes. There is no evidence that cigarettes visibility ban decrease their consumption. Cigarettes are legal products as many others products and their sell in outlets is legal. Any cigarettes visibility automaticaly increase the sales of illegal cigarettes.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

Rauchloser Tabak gefährdet nicht die Gesundheit Dritter. Jeder Bürger kann selbst entscheiden ob er Snus geniessen möchte oder nicht, daher sollte kein EU-weites Verbot eingeführt werden.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Ich finde die Größe der Warnhinweise derzeit ausreichend, ausserdem ist die Bevölkerung sich der Risiken des Rauchens bewusst. Eine Einheitspackung würde die Unternehmen in ihrem freien Handeln auf dem Markt einschränken. Dies stellt aus meiner Sicht eine Wettbewerbsverzerrung gegenüber anderen Unternehmen dar. Es fehlt jeder Nachweis, dass einheitliche Tabakpackungen das Rauchverhalten der Bürger beeinflussen. Einheitspackungen führen zu einem verstärkten Preis-Wettbewerb, der die Existenz nationaler Großhändler und damit auch meinen Arbeitsplatz gefährdet. Eine Produktfälschung wird durch Einheitspackungen einfacher.

Attraktivität stellt lediglich ein subjektives und damit ungeeignetes Kriterium für ein Verbot dar. Die Verbreitung von Zigaretten in Großbritannien ist auch nicht geringer als die in Deutschland. Ausserdem befürchte ich einen Anstieg der Schmuggelwaren.

which option
No Change

access to tobacco products
problem definition
No

explanations
Es ist keine Problembeschreibung, dass in vielen Mitgliedsstaaten die Tabakautomaten verboten sind. In der Mehrzahl der Staaten ist der Erwerb von Tabakprodukten über Automaten erlaubt und erfolgt dort unter sehr strengen gesetzlichen Auflagen (z.B. Alterslegitimation durch Personalausweis) Der Verkauf von Tabakprodukten über Automaten sollte den Mitgliedsstaaten selbst überlassen werden. Der Verkauf an Zigarettenautomaten findet lediglich lokal und nicht grenzüberschreitend statt, daher weist dieses Thema keinen Bezug zur EU auf. Grenzüberschreitender Handel mit Automaten wird durch den Vorschlag erschwert statt erleichtert. Ich glaube außerdem nicht, dass Jugendliche mehr oder weniger rauchen wenn Zigarettenautomaten verboten sind. Wenn man seine Zigaretten nicht am Automaten kaufen kann, wird der organisierten Kriminalität Tür und Tor geöffnet die Lücke zu füllen. Um einen Jugend- und Gesundheitsschutz zu gewährleisten sind auch weniger tiefe Eingriffe als ein EU-weites Automatenverbot ausreichend.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Ich kann absolut nicht verstehen, mit welchem Recht sich die Europäische Kommision erlaubt, sich hier überhaupt einzumischen! Einheitspackungen müsste es dann konsequenter Weise auch für alkoholische Getränke geben! Wo sind wir denn? Zustände wie in der DDR !!!

Automaten: Warum die Automaten abschaffen? Wurden diese nicht erst auf Jugendschutz/Altersnachweis umgestellt? Was bringt das ausser Arbeitsplatz-Verlusten? Wer raucht, kauft sich die Zigaretten dann eben anderswo. Internet-Verkauf: warum verbieten? Es ist ein legales Produkt! Tabakwaren Werbeverbot im Geschäft und ggf. "nicht sichtbar unter der Theke" plazieren? Das ähnelt ja schon fast dem Alkohol-Verkauf zu Zeiten der Prohibition.

Insgesamt möchte ich noch bemerken, dass ich den Endruck habe, diese "online consulation" ist bewusst sehr kompliziert aufgebaut, damit möglichst niemand damit zurecht kommt. Auch bei den Punkten "do you agree ..." stelle ich fest, dass man das "no" bewusst nicht neben das "yes" gesetzt hat, sonder schön weit rechts ... man muss es erst suchen. Das ist Suggestion! Dazu wird alles nur auf englisch abgefragt, was es zusätzlich kompliziert. Aber von der Europäischen Kommission habe ich nichts anderes erwartet.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

recommend option
From my perspective, it may be useful to extend the scope of the Directive to these products. But this should not mean that certain products are prohibited without proper scientific evidence. Because of this, I have decided to choose the option “no change”.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Currently there is a lack of scientific evidence that larger warnings are effective. Moreover, it is in no way certain that standardization of the packaging will bring any public health benefits. Rather the standardization of packages will increase the risk of forgery and encourage smuggling.

which option
No change

questions on reporting
problem definition
No

explanations

The current laws provide the Member States with the opportunity to charge fees and other penalties. There is no sufficient reason why the EU should gain additional powers in this specific area. The enforcement of the provisions of the directive should therefore continue to remain with the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus in terms of notification and registration of ingredients should be on whether ingredients increase the toxicity of tobacco smoke or not."

which option
No Change

access to tobacco products
problem definition
No

explanations
In this area there is no problem, neither in the functioning of the internal market or in terms of health. The most important factor in this area is that the existing legislation, especially regarding the age limits are adhered to. The Member States are in far better position to guarantee this than the Union.

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless

problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
Auf die Risiken des Rauchens wird zur Genüge hingewiesen. Der Bezug von Tabakwaren ist durch funktionierende Alterskontrollen hinreichend reglementiert. Zusätzliche Reglementierungen (Bildwarnhinweise, nicht-öffentlicher Verkauf) erhöhen den Reiz für Jugendliche zu rauchen.

which option
No change

questions smokeless
problem definition
No

comments
Rauchfreie Tabakerzeugnisse sind Genusmittel, welche wie viele andere Genussmittel

(Kaffee, Süsswaren, Tee u.ä.) in Maßen genossen werden sollten. Eine Schädigung anderer (Mitrauchen) findet nicht statt. Jeder europäische Bürger soillte das Recht haben die Art seiner legalen Genussmittel selbst zu wählen. Ihm dies durch Abbildungen und andere Massnahmen zu verleiden verletzt die Selbstbestimmung und vermindert die Lebensqualität. Oder wollenb Sie demnächst fettleibige Menschen auf jeder Restaurant-Speisekarte abbilden?

which option
No change

questions consumer
problem definition
No

explanations
Alle Raucher werden bereits heute effektiv auf die Risiken hingewiesen. In Maßen genossen stellen viele Tabakwaren ein Genussmittel dar. Auch andere Genussmittel sind im Übermaß gesundheitsschädlich. Der mündige Bürger sollte informiert werden. Abstossende Bilder auf Verpackungen (fettleibige Menschen auf Süsswaren, herzinfarkt-Tote auf Kaffeepackungen usw.) stellen eine nicht akzeptable Bevormuundung der europäischen Bürger - ohne zu erwartenden Nutzen dar.

which option
No change

questions on reporting
problem definition

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

It may Be useful to extend the scope of the directive to these products. But this should not mean that certain products are prohibited without proper scientific evidence.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Currently there is a lack of scientific that larger warnings are effective. Moreover, it's in no way certain that standardization of the packaging will bring any public health benefits. Rather the sat dardization of packages will increase the risk of forgery and encourage smuggling.

which option
No change

questions on reporting
problem definition
No

explanations
The current laws provide the member states with the opportunity to charge fees and other penalties. There is no sufficient reason why the eu should gain additional powers in this specific area. The enforcement of the provisions of the directive should therefore continue to remain with the member states.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus in terms of notification and registration of ingredients should be on whether ingredients increase the toxicity of tobacco smoke or not

which option
No Change

access to tobacco products
problem definition
No

explanations
In this area there is no problem, neither in the functioning of the internal market or in terms of health. The most important factor in the area is that the existing legislation, especially regarding the age limits are adhered to. The member states are in far better position to guarantee this than the union.

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope

problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this

statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

access to tobacco products
problem definition

No

explanations
As an adult, cigar smoker and free citizen of this country I am convinced that it is my constutional right to obtain my cigars her in Germany wherever and whenever I wish at licensed shops. I cannot see any point in banning the sale of cigars and other tobacco-products at licensed tobacconists or at licensed shops in the internet. Do those bureaucrats in Brussels, who - by the way - have not the slightets democratic legitimation, want to establish in Europe after the fall of the Iron Curtain an new dictatorship? Today you want to ban the access to tobacco products - tomorrow maybe you will wish to prescribe us what we have to eat! Does Europe have no other problems than terrorising its citizens with supervision and bureaucracy? If you continue your policy this way, unfortunately we will see the day coming, when the EU is going to collaps!

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
No

explanations
It is going the way of criminalizing tobacco products. Drugs of many kinds are part of social life (drinking, eating, gaming and a lot more), Smokers may have chosen a very obvious addiction. Still they have the right to make their choice - in smoking or not as well as in the taste they prefer.

which option
No change

additional comments
If countries chose to do some regulations on tobacco products they may. This topic is not to be ruled by EU. This is the best way to create a huge black market.

questions smokeless
problem definition
No

which option
No change

questions consumer
problem definition
No

explanations
The danger of tobacco is known by everyone - as well as the danger of fast food, alcohol, driving too fast or anything else that provides health danger. It cannot be the conclusion that everything is wrapped in socialistic unity. The package design is no reason for buying a special brand or tobacco wares at all, but the package helps to differ between the brands. Still this is nothing to excuse. Are You going to sell unlabeled wine bottles next? For the pictures: It is a good way to inform analphabets. Is Europe known as a region full of those?

which option
No change

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

additional options

Like every food, drink or else we consume it is important to know the contents. This should be a rule not only for tobacco product but everything, we are provided with for consuming. There is no reasion to take special fees for analyzing tobacco as long as there is no special fee for analizing industrial designed food.

regulation of ingredients
problem definition
No

explanations
If You do not smoke every cigarette is the same for You. If You do not drink there is no difference between wines. Like all additions for taste they make the difference. Some are more unhealthy than others. Still people have the right to smoke or not, drink or not, eat fast food or not. You also have to provide the given choice between product lines.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional comments
As written before: All this is designed to criminalize the consume of tobacco and would just create a black market with all it's problems related to it. As I see every day there are still a lot of smokers left and they are part of society too, often they are really important people. They confirm like all the other people addicted to something (and there are a lot of addictions beside smoking), that mankind seems to need drugs to function. It does not matter if it is gaming, eating, drinking or - smoking. Smoking may cause cancer and everything but smokers are still alert people, mostly sober and able to do their work. What You cannot say of every addict. Criminalizing all these people means overruling and doing clients politics.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

regulation of ingredients
problem definition
No

explanations
Dieser Vorschlag führt zu einer großen Arbeitsplatzvernichtung, im Handel, in der Industrie, auch meinen Arbeitsplatz! Das bedenkt in Brüssel niemand, entweder, weil darüber nicht nachgedacht wird, oder weil es niemanden interessiert. Vor allem, weil in Brüssel es doch keinen interessiert, was mit einem Arbeitsplatz in Deutschland passiert, es ist mein Arbeitsplatz, davon zahle ich Steuern, Sozialversicherung und ernähre meine 4-köpfige Familie. Also, warum solte ich es geändert haben wollen? Außerdem bin ich selber in der Lage zu entscheiden, ob ich rauche und vor allem was ich rauche. Es ist meine Gesundheit

und ich brauche niemanden, der auf mich aufpasst!!!

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Aucune étude scientifique efficace ne prouve les risques concernant les produits du tabac sans fumée.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. Quel consommateur est capable de citer plus de 2 messages sanitaires ou photos chocs ? La mise en place de paquets neutres risque d'entraîner une guerre des prix du tabac (car celà restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs Français à aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger, contrefaçon, contrebande, internet). De telles mesures risquent de déstabiliser économiquement le réseau des 28 000 buralistes organisés en réseau règlementé et sous tutelle de l'Etat.

which option
No change

additional comments
Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La France dispose d'un réseau organisé de 28 000 buralistes, préposés de l'administration, responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement règlementé par l'Etat, ce qui permet déjà de contrôler efficacement l'accès aux produits du tabac.

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
No

explanations
Die Problemdarstellung enthält lediglich vage Einschätzungen im Hinblick auf eine mögliche Binnenmarktverzerrung oder ein mögliches Versagen bei der Sicherstellung eines hohen Gesundheitsschutzniveaus aufgrund fehlender einheitlicher Bestimmungen für die Regulierung von nikotinhaltigen oder zigarettenähnlichen Produkten in den Mitgliedstaaten. Zudem vermeidet die Kommission jede Form der Wertung in Bezug auf das Subsidiaritäts- und Verhältnismäßigkeitsprinzip. Jede Form der Regulierung von „Tabakerzeugnissen“ muss auf der Grundlage wissenschaftlicher Erkenntnisse sowie der zweifelsfrei gegebenen Rechtssetzungskompetenz der EU basieren. Dies gilt auch für mögliche Regulierungen oder gar Verbote für nikotinhaltige Produkte, die keinen Tabak enthalten oder zigarettenähnliche Produkt (Kräuterzigaretten). Eine Einbeziehung von nikotinhaltigen Produkten oder zigarettenähnlichen Produkten in den Geltungsbereich der Richtlinie kann nicht allein aus der Begründung heraus erfolgen, dass diese Produkte neu sind und nach der Auffassung der Kommission auch auf eine entsprechende Nachfrage in den einzelnen Märkten der EU 27 treffen. Oder aus der Begründung heraus, dass diese Produkte bisher keiner wissenschaftlichen Bewertung (Unbedenklichkeitsprüfung) unterzogen wurden.

which option
No change

questions smokeless
problem definition
No

comments
Der Konsum rauchloser Tabakerzeugnisse durch erwachsene und aufgeklärte Personen gefährdet weder die Gesundheit Dritter noch schränkt der Konsum dieser Produkte andere Personen in ihren Lebensgewohnheiten ein. Der Konsum dieser Produkte liegt in der Eigenverantwortung des Einzelnen. Das Bewerben und Verkaufen dieser Produkte muss daher möglich sein. Das EU-weite Verbot von Snus (Ausnahme Schweden) stellt eine massive Entmündigung der Bürger dar. Denn die erwachsenen Verbraucher haben das Recht, auch bei Genussmitteln mit Gesundheitsrisiken die Wahl zu haben und eigenverantwortliche Entscheidungen zu treffen. Aus der Problemdarstellung der Kommission lässt sich keine wissenschaftlich fundierte Grundlage ableiten, die ein EU-weites Verbot von Snus (Ausnahme Schweden) oder anderer rauchloser Produkte rechtfertigen könnte. Beispielsweise vermissen wir in der Problemdarstellung wissenschaftlich fundierte Wirkungsanalysen aus Ländern, in denen Snus oder andere rauchlose Tabakerzeugnisse konsumiert werden.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Es gibt keinen überzeugenden Beleg dafür, dass ein Warnhinweis umso wirksamer ist, je größer sein Format. Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht–die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür werden allerdings keine Nachweise aus den Ländern zugeliefert, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden. Eine Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs-und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der Bürger. Stichhaltige wissenschaftliche Nachweise, dass Tabakverpackungen und Produktmerkmale von Tabakerzeugnissen das Raucherverhalten von Verbrauchern beeinflussen/fördern, existieren nicht. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend-und Gesundheitsschutz, Steuereinnahmen…) kontraproduktiv und bedroht die Existenz des reinnationaltätigen Groß- und Einzelhandels in Deutschland. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein nationaltätigen Groß-und Einzelhandels in Deutschland. Die Kommission selbst hat im Rahmen der Tabak-Produkt-Richtlinie die Höchstgehalte an Teer, Nikotin und Kohlenmonoxid begrenzt. Eine Darstellung, dass Verbraucher aufgrund der niedrigeren Höchstgehalte den Konsum der Produkte als weniger riskant für ihre Gesundheit einstufen könnten, ist daher absurd.

which option
No change

questions on reporting
problem definition
No

explanations
Ob die Behörden Schwierigkeiten bei Vergleich und Analyse der Daten haben oder die Erfassung und Analyse der gemeldeten Daten über Inhaltsstoffe erhebliche Ressourcen auf Seiten der zuständigen nationalen Behörden erfordern, wie von der Kommission dargestellt, kann nicht beurteilt werden. Wenn dies so wäre, verwundert es sehr, dass der Anstoß in Richtung einer Vereinheitlichung und Vereinfachung nicht aus den Mitgliedstaaten selbst hervorgeht, sondern von der Kommission vorgebracht wird und dann im Zusammenhang mit einer Option, die der Wirtschaft zusätzliche dauerhafte Kosten (jährliche Gebühr) auferlegen würde. Die Mitgliedstaaten selbst sind gefordert, zusammen mit der Wirtschaft einen pragmatischen Weg zu diskutieren und umzusetzen. Ein notwendiger Handlungsbedarf oder

gar ein Mandat der Kommission zum Eingriff in bestehende nationale Abläufe wird nicht ersichtlich.

which option
No change

regulation of ingredients
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Der Begriff „attraktiv“ ist ein subjektives Kriterium für ein Verbot oder eine Regulierung von Zusatzstoffen und entbehrt jeglicher wissenschaftlicher Grundlage. Die Verbreitung des Rauchens in Ländern wie Großbritannien und Irland, in denen vorwiegend Zigaretten ohne Zusatzstoffe verkauft werden (Produkte des Virginia-Typs), ist nicht geringer als die Verbreitung in Ländern, in denen vorwiegend Zigaretten mit Zusatzstoffen (American-Blend-Produkte) verkauft werden. Wettbewerbsrechtliche Auswirkungen einer einseitigen Regulierung von Produkten mit Zusatzstoffen werden nicht thematisiert. Die Frage nach der Wirkung auf das Preisgefüge in den EU 27 Märkten sowie Effekte auf den illegalen Handel mit Tabakerzeugnissen werden nicht thematisiert.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Die Darstellung, dass in einer Vielzahl von Mitgliedstaaten der Vertrieb von Tabakautomaten verboten ist, ist keine Problembeschreibung. Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dieser folgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. Der Problembeschreibung stimme ich nicht zu. Die Bereiche „Verkauf von Tabakwaren über Zigarettenautomaten“ und „Mindestaltersgrenzen für den Bezug von Tabakwaren“ sind Themen, die eindeutig in den Zuständigkeitsbereich der Mitgliedstaaten fallen. Die Problembeschreibung „Zigarettenautomat“ ist überflüssig, da die Kommission selbst bereits bei ihrem Bericht zur Umsetzung der Ratsempfehlung 2003/54/E Caus November 2009 festgehalten hat: –Insgesamt ist die Umsetzung der Empfehlung zufrieden stellend. –Dies betrifft insbesondere die Verpflichtung, das Mindestalter für den Kauf von Tabakwaren zu überprüfen sowie die Durchführung von Maßnahmen zur Beschränkung der Verwendung von Automaten durch in der jährige Personen.

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products

problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products

problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

Il n’y a pas d’études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Aucune étude ne prouve l’efficacité des paquets neutres. Aucune étude ne prouve l’efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d’entrainer une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s’approvisionner sur les marchés parallèles du tabac (achats à l’étranger ou de contrebande, ou sur internet. De telles mesures risquent de déstabiliser et pénaliser économiquement le réseau des 28 000 buralistes français organisés dans un réseau réglementé et sous tutelle de l’Etat.

which option
No change

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients

problem definition
No

explanations
Cela risque d'entrainer une standardisation de la production avec comme conséquence une diminution de l'offre au fumeur adulte et responsable, et le risque de voire apparaitre une augmentation des produits du tabac contrefaits.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access; Ban

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale

which one2
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

additional comments
Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La France dispose d'un réseau de 28 000 buralistes, préposés de l'administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement réglementé par l'Etat ce qui permet déjà de contrôler efficacement l'accès au produit tabac.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

The Directive's scope should certainly include the specified products. However, no ban should be imposed without prior scientific review of the product in terms of its harmfulness to the human body

questions smokeless
problem definition
Yes

which option

Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no obvious scientific evidence that larger warnings or images are better suited to discourage potential smokers from smoking or to convince smokers to quit smoking. Even on plain packaging, there is to date no evidence that they have an impact on the population's health. Plain packaging would instead tend to accelerate counterfeiting and illegal trade in tobacco products, because protection against product counterfeiting cannot be guaranteed.

which option
No change

additional option
Numbers, for instance, which were determined using a different measurement method (e.g. Health-Canada test methods), might be used for better labelling of ingredients. As a result customers would get more precise information about the measured values.

questions on reporting
problem definition
No

explanations
Law enforcement is the Member States' duty and not the EU's. Even if the EU introduces this principle, fee and penalty rates would differ among the Member States. This is because it is each country's responsibility. An improvement of the internal market's functioning is thus not obvious.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus when evaluating additives should be quite fundamental on whether their use increases the toxic effect of cigarette smoke. It should not proceed from the attractiveness of the substances, since this is based almost exclusively on subjective criteria.

which option
No Change

access to tobacco products
problem definition
No

explanations
The problem presented here is not aimed at public health problems associated with tobacco use and the products' availability. Furthermore, evidence is not offered to suggest that such prohibitions strengthen the internal market or lead to a reduction in tobacco consumption.

which option
No change

additional option
Internet purchases could, for example, be restricted by age limits.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
No

explanations
Ich stimme der Projektdarstellung keinesfalls zu, weil die Europäische Kommission bestimmt andere Probleme zu bewältigen hat, als den "Glimmstengel" zu verunglimpfen. Arbeitsplätze, Pflege alter Menschen, genügend Kindergärten, Schmutz in den Städten, Mitbestimmungsrechte, Obdachlose, Vergewaltiger, häusliche Gewalt, Übergewicht und Alkoholismus von Kindern, Menschenunwürdigkeit wie Steinigungen und Beschneidungen sind u.a. Themen, die die Länder erst einmal lösen sollten, bevor sie über etwas diskutieren und Gesetze erlassen, was nur die Allgemeinheit gegen Regierungen aufbringen kann.

which option
No change

recommend option

Zigaretten stellen grundsätzlich vor allen anderen schwerwiegenden Themen überhaupt kein Problem dar. Sonst müßten wir ja demnächst auch vor jeder Bäckerei Fotos sehen von verfetteten Herzen, Fettleibigkeit usw. um die Menschen vor dem Essen zu schützen.

kein Kommentar, schon dieser Fragebogen ist eine Lächerlichkeit ohne Gleichen; Stellen Sie diese Fragen doch einmal einem Kind, das jahrelang von Vater und/oder Mutter mißbraucht wird, ich denke, da kommt das Rauchen ja wohl an letzter Stelle
