It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

INCOMA SLOVAKIA

email
info@incoma.sk

country
Slovak Republic

questions scope
problem definition
Yes

which option
No change

recommend option
The potential enlargement of the scope of the directive is a good step, but unfortunatelly, in the option 2 it also includes a potential limitation to novel forms of tobacco. We at INCOMA Slovakia belive, that this measure will restrict inovation and lead to unnecessary limitation of opportunuties for retailers in the area of tobacco products. This is not fortunate, because the ban is not based on any scientific research of the novel forms of tobacco. Any ban should be based on proper examination of the products in question.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Any initiative to improve the consumer information, not only about cigarettes, has to take into account all potential risks related with this intiative. A definition of the problem, as outlined by the DG Sanco, is not taking into the account a potential impact of the enlarged healthwarnings and eventually of plain packaging on already growing illegal trade with tobacco products. We understand from the concerns of our business partners, and also from our own judgement, that options 2 and 3 will lead to significant increase in illicit trade and create new markets and opportunites for manufacturers of illegal tobacco products. With the obvious consequence – decrease of legal market – on our mind, we have to disagree with the problem definition and with both suggested options (no. 2 and no. 3).

which option
No change

questions on reporting
problem definition
No

explanations
We understand, that any potential penalties for noncompliance with the ingredients reporting requirements should be issued - and thus also regualted - on the level of Member states. We, on the other hand, believe, that common reporting format will be a good measure.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Slovak Republic is clearly an American blend market. When we take this fact into account, any regulation of ingredients based on other than scientific assesment of the ingredients potential increase of toxicity or addictivness of the tobacco will lead to serious disruption of the Slovak cigarettes market and therefore to huge increase of illicit trade. As the consequence of the measure is in contradiction with intetntion to improve the public health, we believe, that ingredients regulation should not be based on attractiveness - an unscientific category.

which option
No Change

access to tobacco products
problem definition
No

explanations
We in principle believe, that legal products - which tobacco products are - should be marketed without any other limitations, than those oriented on prevention of youth from purchase and direct communication with minors. We also believe, that other measures, such as programmes aimed at educating retailers about the age restrictions, are more effective, than any untested administative measure. We also learned from our retail partnersand from information collected by the RAND, that this measure will lead to significant costs to retailers. At times like these - with retail squeezing every eurocent when and where possible, this consequence is unacceptable, given the doubtful potential impact on public health. We are also concerned that both, restriction and the ban can also lead to potential loss of sales either to illegal sources, or to the pure fact, that an adult consumer will not know, that tobacco products are available in the shop.

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entrainer une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger ou de contrebande, ou sur internet. De telles mesures risquent de déstabiliser et pénaliser économiquement le réseau des 28 000 buralistes français organisés dans un réseau réglementé et sous tutelle de l'Etat.

additional comments
Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La France dispose d'un réseau de 28 000 buralistes, préposés de l'administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement réglementé par l'Etat ce qui permet déjà de contrôler efficacement l'accès au produit tabac.

Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

additional comments
« Il n’y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La France dispose d’un réseau de 28 000 buralistes, préposés de l’administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement réglementé par l’Etat ce qui permet déjà de contrôler efficacement l’accès au produit tabac. »

Wpływy z produkcji papierosów nie będą skierowane do budżetu państwa, ale do tzw. szarej strefy. Wyroby tytoniowe są legalne. I takie powinny zostać. Jedyną rzeczą, co do której nie wnoszę sprzeciwu to sprzedawanie wyrobów tytoniowych "spod lady". Moze to pomóc w przypadku osób nieletnich, aby nie sięgali po te wyroby. Rozumiem, że jest to polityka prozdrowotna, ale uderza ona w wolność ludzi palących.

which option
No change

recommend option
Zwiększyć kary dla osób sprzedających wyroby tytoniowe osobom nieletnim.

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Die Problemdarstellung enthält lediglich vage Einschätzungen im Hinblick auf eine mögliche Binnenmarktverzerrung oder ein mögliches Versagen bei der Sicherstellung eines hohen Gesundheitsschutzniveaus aufgrund fehlender einheitlicher Bestimmungen für die Regulierung von nikotinhaltigen oder zigarettenähnlichen Produkten in den Mitgliedstaaten. Zudem vermeidet die Kommission jede Form der Wertung in Bezug auf das Subsidiaritäts- und Verhältnismäßigkeitsprinzip. Jede Form der Regulierung von „Tabakerzeugnissen“ muss

auf der Grundlage wissenschaftlicher Erkenntnisse sowie der zweifelsfrei gegebenen Rechtssetzungskompetenz der EU basieren. Dies gilt auch für mögliche Regulierungen oder gar Verbote für nikotinhaltige Produkte, die keinen Tabak enthalten oder zigarettenähnliche Produkt (Kräuterzigaretten). Eine Einbeziehung von nikotinhaltigen Produkten oder zigarettenähnlichen Produkten in den Geltungsbereich der Richtlinie kann nicht allein aus der Begründung heraus erfolgen, dass diese Produkte neu sind und nach der Auffassung der Kommission auch auf eine entsprechende Nachfrage in den einzelnen Märkten der EU 27 treffen. Oder aus der Begründung heraus, dass diese Produkte bisher keiner wissenschaftlichen Bewertung (Unbedenklichkeitsprüfung) unterzogen wurden.

Der Konsum rauchloser Tabakerzeugnisse durch erwachsene und aufgeklärte Personen gefährdet weder die Gesundheit Dritter noch schränkt der Konsum dieser Produkte andere Personen in ihren Lebensgewohnheiten ein. Der Konsum dieser Produkte liegt in der Eigenverantwortung des Einzelnen. Das Bewerben und Verkaufen dieser Produkte muss daher möglich sein. Das EU-weite Verbot von Snus (Ausnahme Schweden) stellt eine massive Entmündigung der Bürger dar. Denn die erwachsenen Verbraucher haben das Recht, auch bei Genussmitteln mit Gesundheitsrisiken die Wahl zu haben und eigenverantwortliche Entscheidungen zu treffen. Aus der Problemdarstellung der Kommission lässt sich keine wissenschaftlich fundierte Grundlage ableiten, die ein EU-weites Verbot von Snus (Ausnahme Schweden) oder anderer rauchloser Produkte rechtfertigen könnte. Beispielsweise vermissen wir in der Problemdarstellung wissenschaftlich fundierte Wirkungsanalysen aus Ländern, in denen Snus oder andere rauchlose Tabakerzeugnisse konsumiert werden.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Es gibt keinen überzeugenden Beleg dafür, dass ein Warnhinweis umso wirksamer ist, je größer sein Format. Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht–die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür werden allerdings keine Nachweise aus den Ländern zugeliefert, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden. Eine Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs-und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der

Bürger. Stichhaltige wissenschaftliche Nachweise, dass Tabakverpackungen und Produktmerkmale von Tabakerzeugnissen das Raucherverhalten von Verbrauchern beeinflussen/fördern, existieren nicht. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend-und Gesundheitsschutz, Steuereinnahmen…) kontraproduktiv und bedroht die Existenz des reinnationaltätigen Groß- und Einzelhandels in Deutschland. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein nationaltätigen Groß-und Einzelhandels in Deutschland. Die Kommission selbst hat im Rahmen der Tabak-Produkt-Richtlinie die Höchstgehalte an Teer, Nikotin und Kohlenmonoxid begrenzt. Eine Darstellung, dass Verbraucher aufgrund der niedrigeren Höchstgehalte den Konsum der Produkte als weniger riskant für ihre Gesundheit einstufen könnten, ist daher absurd.

questions on reporting
problem definition
No

explanations
Ob die Behörden Schwierigkeiten bei Vergleich und Analyse der Daten haben oder die Erfassung und Analyse der gemeldeten Daten über Inhaltsstoffe erhebliche Ressourcen auf Seiten der zuständigen nationalen Behörden erfordern, wie von der Kommission dargestellt, kann nicht beurteilt werden. Wenn dies so wäre, verwundert es sehr, dass der Anstoß in Richtung einer Vereinheitlichung und Vereinfachung nicht aus den Mitgliedstaaten selbst hervorgeht, sondern von der Kommission vorgebracht wird und dann im Zusammenhang mit einer Option, die der Wirtschaft zusätzliche dauerhafte Kosten (jährliche Gebühr) auferlegen würde. Die Mitgliedstaaten selbst sind gefordert, zusammen mit der Wirtschaft einen pragmatischen Weg zu diskutieren und umzusetzen. Ein notwendiger Handlungsbedarf oder gar ein Mandat der Kommission zum Eingriff in bestehende nationale Abläufe wird nicht ersichtlich.

which option
No change

regulation of ingredients
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Der Begriff „attraktiv“ ist ein subjektives Kriterium für ein Verbot oder eine Regulierung von Zusatzstoffen und entbehrt jeglicher wissenschaftlicher Grundlage. Die Verbreitung des Rauchens in Ländern wie Großbritannien und Irland, in denen vorwiegend Zigaretten ohne Zusatzstoffe verkauft werden (Produkte des Virginia-Typs), ist nicht geringer als die Verbreitung in Ländern, in denen vorwiegend Zigaretten mit Zusatzstoffen (American-Blend-Produkte) verkauft werden. Wettbewerbsrechtliche

Auswirkungen einer einseitigen Regulierung von Produkten mit Zusatzstoffen werden nicht thematisiert. Die Frage nach der Wirkung auf das Preisgefüge in den EU 27 Märkten sowie Effekte auf den illegalen Handel mit Tabakerzeugnissen werden nicht thematisiert.

Der Konsum rauchloser Tabakerzeugnisse durch erwachsene und aufgeklärte Personen gefährdet weder die Gesundheit Dritter noch schränkt der Konsum dieser Produkte andere Personen in ihren Lebensgewohnheiten ein. Der Konsum dieser Produkte liegt in der Eigenverantwortung des Einzelnen. Das Bewerben und Verkaufen dieser Produkte muss

daher möglich sein. Das EU-weite Verbot von Snus (Ausnahme Schweden) stellt eine massive Entmündigung der Bürger dar. Denn die erwachsenen Verbraucher haben das Recht, auch bei Genussmitteln mit Gesundheitsrisiken die Wahl zu haben und eigenverantwortliche Entscheidungen zu treffen. Aus der Problemdarstellung der Kommission lässt sich keine wissenschaftlich fundierte Grundlage ableiten, die ein EU-weites Verbot von Snus (Ausnahme Schweden) oder anderer rauchloser Produkte rechtfertigen könnte. Beispielsweise vermissen wir in der Problemdarstellung wissenschaftlich fundierte Wirkungsanalysen aus Ländern, in denen Snus oder andere rauchlose Tabakerzeugnisse konsumiert werden.

Es gibt keinen überzeugenden Beleg dafür, dass ein Warnhinweis umso wirksamer ist, je größer sein Format. Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht–die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür werden allerdings keine Nachweise aus den Ländern zugeliefert, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden. Eine Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs-und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der Bürger. Stichhaltige wissenschaftliche Nachweise, dass Tabakverpackungen und Produktmerkmale von Tabakerzeugnissen das Raucherverhalten von Verbrauchern beeinflussen/fördern, existieren nicht. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend-und Gesundheitsschutz, Steuereinnahmen…) kontraproduktiv und bedroht die Existenz des reinnationaltätigen Groß- und Einzelhandels in Deutschland. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein nationaltätigen Groß-und Einzelhandels in Deutschland. Die Kommission selbst hat im Rahmen der Tabak-Produkt-Richtlinie die Höchstgehalte an Teer, Nikotin und Kohlenmonoxid begrenzt. Eine Darstellung, dass Verbraucher aufgrund der niedrigeren Höchstgehalte den Konsum der Produkte als weniger riskant für ihre Gesundheit einstufen könnten, ist daher absurd.

Ob die Behörden Schwierigkeiten bei Vergleich und Analyse der Daten haben oder die Erfassung und Analyse der gemeldeten Daten über Inhaltsstoffe erhebliche Ressourcen auf Seiten der zuständigen nationalen Behörden erfordern, wie von der Kommission dargestellt, kann nicht beurteilt werden. Wenn dies so wäre, verwundert es sehr, dass der Anstoß in Richtung einer Vereinheitlichung und Vereinfachung nicht aus den Mitgliedstaaten selbst hervorgeht, sondern von der Kommission vorgebracht wird und dann im Zusammenhang mit einer Option, die der Wirtschaft zusätzliche dauerhafte Kosten (jährliche Gebühr) auferlegen würde. Die Mitgliedstaaten selbst sind gefordert, zusammen mit der Wirtschaft einen pragmatischen Weg zu diskutieren und umzusetzen. Ein notwendiger Handlungsbedarf oder gar ein Mandat der Kommission zum Eingriff in bestehende nationale Abläufe wird nicht ersichtlich.

Die Problemdarstellung enthält lediglich vage Einschätzungen im Hinblick auf eine mögliche Binnenmarktverzerrung oder ein mögliches Versagen bei der Sicherstellung eines hohen Gesundheitsschutzniveaus aufgrund fehlender einheitlicher Bestimmungen für die Regulierung von nikotinhaltigen oder zigarettenähnlichen Produkten in den Mitgliedstaaten. Zudem vermeidet die Kommission jede Form der Wertung in Bezug auf das Subsidiaritäts- und Verhältnismäßigkeitsprinzip. Jede Form der Regulierung von „Tabakerzeugnissen“ muss auf der Grundlage wissenschaftlicher Erkenntnisse sowie der zweifelsfrei gegebenen Rechtssetzungskompetenz der EU basieren. Dies gilt auch für mögliche Regulierungen oder gar Verbote für nikotinhaltige Produkte, die keinen Tabak enthalten oder zigarettenähnliche Produkt (Kräuterzigaretten). Eine Einbeziehung von nikotinhaltigen Produkten oder zigarettenähnlichen Produkten in den Geltungsbereich der Richtlinie kann nicht allein aus der Begründung heraus erfolgen, dass diese Produkte neu sind und nach der Auffassung der Kommission auch auf eine entsprechende Nachfrage in den einzelnen Märkten der EU 27 treffen. Oder aus der Begründung heraus, dass diese Produkte bisher keiner wissenschaftlichen Bewertung (Unbedenklichkeitsprüfung) unterzogen wurden.

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend-und Gesundheitsschutz, Steuereinnahmen…) kontraproduktiv und bedroht die Existenz des reinnationaltätigen Groß- und Einzelhandels in Deutschland. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein nationaltätigen Groß-und Einzelhandels in Deutschland. Die Kommission selbst hat im Rahmen der Tabak-Produkt-Richtlinie die Höchstgehalte an Teer, Nikotin und Kohlenmonoxid begrenzt. Eine Darstellung, dass Verbraucher aufgrund der niedrigeren Höchstgehalte den Konsum der Produkte als weniger riskant für ihre Gesundheit einstufen könnten, ist daher absurd.

Ob die Behörden Schwierigkeiten bei Vergleich und Analyse der Daten haben oder die Erfassung und Analyse der gemeldeten Daten über Inhaltsstoffe erhebliche Ressourcen auf Seiten der zuständigen nationalen Behörden erfordern, wie von der Kommission dargestellt, kann nicht beurteilt werden. Wenn dies so wäre, verwundert es sehr, dass der Anstoß in Richtung einer Vereinheitlichung und Vereinfachung nicht aus den Mitgliedstaaten selbst hervorgeht, sondern von der Kommission vorgebracht wird und dann im Zusammenhang mit einer Option, die der Wirtschaft zusätzliche dauerhafte Kosten (jährliche Gebühr) auferlegen würde. Die Mitgliedstaaten selbst sind gefordert, zusammen mit der Wirtschaft einen pragmatischen Weg zu diskutieren und umzusetzen. Ein notwendiger Handlungsbedarf oder gar ein Mandat der Kommission zum Eingriff in bestehende nationale Abläufe wird nicht ersichtlich.

regulation of ingredients
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Der Begriff „attraktiv“ ist ein subjektives Kriterium für ein Verbot oder eine Regulierung von Zusatzstoffen und entbehrt jeglicher wissenschaftlicher Grundlage. Die Verbreitung des Rauchens in Ländern wie Großbritannien und Irland, in denen vorwiegend Zigaretten ohne Zusatzstoffe verkauft werden (Produkte des Virginia-Typs), ist nicht geringer als die Verbreitung in Ländern, in denen vorwiegend Zigaretten mit Zusatzstoffen (American-Blend-Produkte) verkauft werden. Wettbewerbsrechtliche Auswirkungen einer einseitigen Regulierung von Produkten mit Zusatzstoffen werden nicht thematisiert. Die Frage nach der Wirkung auf das Preisgefüge in den EU 27 Märkten sowie Effekte auf den illegalen Handel mit Tabakerzeugnissen werden nicht thematisiert.

access to tobacco products
problem definition
No

explanations
Die Problemdarstellung ist keine sachgerechte, an wissenschaftlichen Prüfstrategien und Standards orientierte und am Maßstab der Verhältnismäßigkeit ausgerichtete Diskussionsgrundlage. Die Darstellung, dass in einer Vielzahl von Mitgliedstaaten der Vertrieb von Tabakautomaten verboten ist, ist keine Problembeschreibung. Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dieser folgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. Der Problembeschreibung stimme ich nicht zu. Die Bereiche „Verkauf von Tabakwaren über Zigarettenautomaten“ und „Mindestaltersgrenzen für den Bezug von Tabakwaren“ sind Themen, die eindeutig in den Zuständigkeitsbereich der Mitgliedstaaten fallen. Die Problembeschreibung „Zigarettenautomat“ ist überflüssig, da die Kommission selbst bereits bei ihrem Bericht zur Umsetzung der Ratsempfehlung 2003/54/E Caus November 2009 festgehalten hat: –Insgesamt ist die Umsetzung der Empfehlung zufrieden stellend. –Dies betrifft insbesondere die Verpflichtung, das Mindestalter für den Kauf von Tabakwaren zu überprüfen sowie die Durchführung von Maßnahmen zur Beschränkung der Verwendung von Automaten durch in der jährige Personen.

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

explanations
Die Problemdarstellung enthält lediglich vage Einschätzungen im Hinblick auf eine mögliche Binnenmarktverzerrung oder ein mögliches Versagen bei der Sicherstellung eines hohen

Gesundheitsschutzniveaus aufgrund fehlender einheitlicher Bestimmungen für die Regulierung von nikotinhaltigen oder zigarettenähnlichen Produkten in den Mitgliedstaaten. Zudem vermeidet die Kommission jede Form der Wertung in Bezug auf das Subsidiaritäts- und Verhältnismäßigkeitsprinzip. Jede Form der Regulierung von „Tabakerzeugnissen“ muss auf der Grundlage wissenschaftlicher Erkenntnisse sowie der zweifelsfrei gegebenen Rechtssetzungskompetenz der EU basieren. Dies gilt auch für mögliche Regulierungen oder gar Verbote für nikotinhaltige Produkte, die keinen Tabak enthalten oder zigarettenähnliche Produkt (Kräuterzigaretten). Eine Einbeziehung von nikotinhaltigen Produkten oder zigarettenähnlichen Produkten in den Geltungsbereich der Richtlinie kann nicht allein aus der Begründung heraus erfolgen, dass diese Produkte neu sind und nach der Auffassung der Kommission auch auf eine entsprechende Nachfrage in den einzelnen Märkten der EU 27 treffen. Oder aus der Begründung heraus, dass diese Produkte bisher keiner wissenschaftlichen Bewertung (Unbedenklichkeitsprüfung) unterzogen wurden.

Der Konsum rauchloser Tabakerzeugnisse durch erwachsene und aufgeklärte Personen gefährdet weder die Gesundheit Dritter noch schränkt der Konsum dieser Produkte andere Personen in ihren Lebensgewohnheiten ein. Der Konsum dieser Produkte liegt in der Eigenverantwortung des Einzelnen. Das Bewerben und Verkaufen dieser Produkte muss daher möglich sein. Das EU-weite Verbot von Snus (Ausnahme Schweden) stellt eine massive Entmündigung der Bürger dar. Denn die erwachsenen Verbraucher haben das Recht, auch bei Genussmitteln mit Gesundheitsrisiken die Wahl zu haben und eigenverantwortliche Entscheidungen zu treffen. Aus der Problemdarstellung der Kommission lässt sich keine wissenschaftlich fundierte Grundlage ableiten, die ein EU-weites Verbot von Snus (Ausnahme Schweden) oder anderer rauchloser Produkte rechtfertigen könnte. Beispielsweise vermissen wir in der Problemdarstellung wissenschaftlich fundierte Wirkungsanalysen aus Ländern, in denen Snus oder andere rauchlose Tabakerzeugnisse konsumiert werden.

which option

Es gibt keinen überzeugenden Beleg dafür, dass ein Warnhinweis umso wirksamer ist, je größer sein Format. Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht–die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür werden allerdings keine Nachweise aus den Ländern zugeliefert, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden. Eine

Einheitspackung würde den Wesensgehalt des Markenrechts und damit auch die Interessen der Verbraucher verletzen. Eine Marke dient nämlich auch als Herkunftshinweis und ist somit ein unverzichtbares Element zur Wahrung der Entscheidungs-und Wahlfreiheit der Bürger. Die Einführung von Einheitspackungen für Zigaretten wäre eine massive Entmündigung der Bürger. Stichhaltige wissenschaftliche Nachweise, dass Tabakverpackungen und Produktmerkmale von Tabakerzeugnissen das Raucherverhalten von Verbrauchern beeinflussen/fördern, existieren nicht. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

recommend option
Concordo com a regulamentação dos produtos para que se evite abusos, no entanto não concordo com a simples proibição do tabaco oral, porque segundo tenho ouvido pode até ser uma alternativa de menor risco ao tabaco tradicional.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

additional option

Tal como mencionei anteriormente acho que o tabaco oral deve ser regulado para evitar abusos, no entanto acho que deve ser permitida a sua comercialização legal.

questions consumer
problem definition
No

explanations
Não concordo que o uso de avisos seja uma forma eficaz de combater o consumo. Não vejo essa relação. Tenho a certeza que acabar com marcas e introduzir "genéricos" só iria facilitar o acesso ao tabaco e inclusivé facilitar mercados paralelos com todas as potenciais implicações sobre a qualidade dos produtos e os seus riscos acrescidos para os fumadores.

which option
No change

additional option
Apesar da melhoria da informação fazer sentido, nenhuma das opções colocadas me convence sobre a sua relevância adicional para os fumadores. Avisos de saúde em cachimbos de água parece-me algo totalmente sem sentido...

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

additional options
A introdução de fees e multas faz sentido no entanto deve ser adequado a cada país... não faz sentido que um Português pague o mesmo que um Françês ou Alemão tendo em conta o nível de vida diferenciado entre os países.

regulation of ingredients
problem definition
No

explanations
Concordo que se regule os ingredientes e se construa uma base comum entre os países, no entanto a atractividade dos ingredientes parece-me ser um critério pouco científico para o fazer. Deve-se regular sim o que é nocivo para a saúde, agora o que é atractivo não faz sentido. Construíndo paralelos com outros produtos, vamos começar a restringir os níveis de açucar / sal e outras substâncias tendencialmente prejudiciais à saúde nos alimentos??? Parece-me que estamos a tentar entrar na esfera das opções pessoais de cada um o que sinceramente me causa muita impressão!!!

which option
No Change

additional option

Tal como mencionado acima concordo com a regulação, mas baseada na nocividade e não em outros critérios.

access to tobacco products
problem definition
No

explanations
Se há países a introduzir medidas mais restrictivas, a UE através de uma directiva iria obrigá-los a voltar atrás? Parece-me haver a necessidade de introduzir medidas de controlo do acesso ao tabaco por menores, no entanto tenho muitas dúvidas sobre as medidas a implementar.

Não existe nenhuma base cientifica que nos permita saber se a alteração dos maços terá algum impacto no consumo e nos beneficios para a saude publica. Esta medida pode originar o efeito contrário, se esses maços forem mais facilmente copiados e contrafeitos havendo maior facilidade de colocar este produto no mercado. Os produtos contrafeitos têm um efeito altamente nocivo para a saude publica pois não existe controle sobre o seu conteudo.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

The Directive's scope should certainly include the specified products. However, no ban should be imposed without prior scientific review of the product in terms of its harmfulness to the human body

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no obvious scientific evidence that larger warnings or images are better suited to discourage potential smokers from smoking or to convince smokers to quit smoking. Even on plain packaging, there is to date no evidence that they have an impact on the population's health. Plain packaging would instead tend to accelerate counterfeiting and illegal trade in tobacco products, because protection against product counterfeiting cannot be guaranteed.

which option
No change

additional option
Numbers, for instance, which were determined using a different measurement method (e.g. Health-Canada test methods), might be used for better labelling of ingredients. As a result customers would get more precise information about the measured values

questions on reporting

which option
No change

regulation of ingredients
problem definition
No

explanations
Law enforcement is the Member States' duty and not the EU's. Even if the EU introduces this principle, fee and penalty rates would differ among the Member States. This is because it is each country's responsibility. An improvement of the intrnal markets functioning is thus not obvious

which option
No Change

access to tobacco products
problem definition

No

explanations
The focus when evaluating additives should be quite fundamental on whether their use increases the toxic effect of cigarette smoke. It should not proceed from the attractiveness of the substances, since this is based almost exclusively on subjective criteria.

No

explanations
Law enforcement is the Member States' duty and not the EU's. Even if the EU introduces this principle, fee and penalty rates would differ among the Member States. This is because it is

each country's responsibility. An improvement of the internal market's functioning is thus not obvious.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus when evaluating additives should be quite fundamental on whether their use increases the toxic effect of cigarette smoke. It should not proceed from the attractiveness of the substances, since this is based almost exclusively on subjective criteria.

which option
No Change

access to tobacco products
problem definition
No

explanations
The problem presented here is not aimed at public health problems associated with tobacco use and the products' availability. Furthermore, evidence is not offered to suggest that such prohibitions strengthen the internal market or lead to a reduction in tobacco consumption.

which option
No change

additional option
Internet purchases could, for example, be restricted by age limits.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Meines Erachtens sollte der Geltungsbereich der Richtlinie durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Meines Erachtens gibt es keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

which option
No change

additional option
Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

questions on reporting
problem definition
No

explanations
Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Der Fokus bei der Evaluierung von Zusatzstoffen sollte ganz grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußt.

which option
No Change

access to tobacco products
problem definition
No

explanations
Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

which option
No change

additional option
Internetkäufe könnten zB durch Altersbegrenzungen eingeschränkt werden.

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless

problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition

Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

« Il n'y a pas d'études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée. »

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
« Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entrainer une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger ou de contrebande, ou sur internet. De telles mesures risquent de déstabiliser et pénaliser économiquement le réseau des 28 000 buralistes français organisés dans un réseau

réglementé et sous tutelle de l'Etat. »

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option

No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Il n'y a pas d'études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entrainer une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à

aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger ou de contrebande ou sur internet). De telles mesures risquent de déstabiliser et pénaliser économiquement le reseau des 28 000 buralistes français organisés dans un reseau réglementé et sous tutelle de l'état.

which option
No change

questions on reporting
problem definition
No

explanations
Cela risque d'entrainer une standardisation de la production avec comme conséquence une diminution de l'offre au fumeur adulte et responsable, et le risque de voir apparaître une augmentation des produits du tabac contrefaits.

which option

which option
Controlled supply and access; Ban

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale

which one2
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

additional comments
Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La france dispose d'un réseau de 28 000 buralistes, préposés de l'administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement réglementé par l'Etat ce qui permet déjà de contoler efficacement l'accés au produit tabac.

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option

No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Aus meiner Sicht kann es sinvoll sein, den Anwendungsbereich der Richtlinie auf diese Produkte auszudehnen. Das darf jedoch nicht dazu führen, dass bestimmte Produkte ohne

entsprechende wissenschaftliche Erkenntnisse verboten werden. Aufgrund dieser Gefahr habe ich mich entschlossen "no change" zu wählen.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
Derzeit fehlt es an wissenschaftlich gesicherten Erkenntnissen, dass grössere Warnhinweise wirksam sind. Zudem ist in keiner Weise gesichert, dass Standartisierungen der Verpackungen den Gesundheitsschutz fördern. Standartisierungen erhöhen vielmehr die Gefahr von Fälschungen und damit wird dem Schmuggel weiter Vorschub geleistet. Ebenfalls wird dann das Preiskriterium ein grösseres Gewicht haben.

which option
No change

questions on reporting
problem definition
No

explanations
Bereits nach geltendem Recht können die Mitgliedstaaten Gebühren und andere Sanktionen vorsehen. Es ist keine genügende Begründung ersichtlich, weshalb die EU in diesem Bereich zusätzliche Kompetenzen in Anspruch nehmen sollte. Die Durchsetzung der Bestimmungen der Richtlinie soll daher weiterhin bei den Mitgliedstaaten verbleiben.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
Der Fokus hinsichtlich der Bekanntgabe und Registrierung von Zusatzstoffen sollte allein darauf liegen, ob durch Zusatzstoffe der Toxizität von Tabakrauch erhöht wird oder nicht.

which option
No Change

access to tobacco products
problem definition

No

explanations
In diesem Bereich besteht keinerlei Problematik, weder hinsichtlich der Funktionsweise des Binnenmarktes noch hinsichtlich des Gesundheitsschutzes. Wichtig ist in diesem Bereich einzig, dass die bestehenden Vorschriften, vor allem bezüglich der Alterslimiten, eingehalten werden. Dazu sind aber die Mitgliedstaaten weit besser in der Lage als die Union.

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
O âmbito da Directiva, no que concerne á protecção da saúde de todas as pessoas que possam ser impactadas pelo uso de produtos de tabaco (fumadores e não fumadores), deverá incluir todos os produtos existentes e deverá acompanhar todas as mudanças e introduções de produtos no mercado, assegurando assim que a todo o momento exista informação disponível, coerente e sustentada para uma opção livre e consciente por parte de todos.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

additional option
Os produtos de tabaco sem fumo deverão ser considerados, à luz da Directiva, da mesma forma que todos os outros produtos de tabaco, tratados de acordo com os prejuízos para a saúde (também pública) que possam acarretar e tendo os Estados Membros a possibilidade de legislar de forma complementar esta Directiva.

questions consumer
problem definition
No

explanations
Factos que são apresentados como evidências são-me desconhecidos, nomeadamente no que se refere a pictorials. Ainda que sejam verdadeiros, considero-os a forma errada de fazer as coisas, pois o objectivo é a tomada de consciência dos actuais fumadores dos possíveis malefícios do tabaco. Com pictorials não considero que haja consciencialização alguma, mas apenas uma necessidade de esconder o maço de cigarros ou outro produto de tabaco. A introdução de embalagens genéricas é uma porta de entrada enorme para produtos não legítimos, com consequências que me parecem gravíssimas, quer para os Estados Membros, quer para a saúde pública, pois produtos contrafeitos são cada vez mais uma realidade não desejável e que importa parar rapidamente! Creio que este ponto é também antagónico com um dos objectivos da presente Directiva - facilitar o funcionamento do mercado e sector dos produtos de tabaco, uma vez que destroi completamente o capital das marcas.

which option

No change; Improve consumer information

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
O foco do problema deverá ser nos malefícios do tabaco e não da atractividade dos ingredientes. Não creio que alguém comece a fumar porque um cigarro tem aroma ou sabor a chocolate. Quando muito irá comprar chocolate e não cigarros.

which option
No Change

access to tobacco products
problem definition
No

explanations
Não acredito que o controlo de acesso a produtos de tabaco (com excepção da proibição de venda a menores de idade), possa trazer qualquer benefício em termos de saúde pública. Os Estados Membros continuarão a ter a opção de legislar mais objectivamente acerca de qualquer aspecto que as especificidades dos mercados locais necessitem de ver salvaguardado.

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
I think there are several lines of action that should be implemented: a) always disclose the truth, tobacco industry always try to create doubts, and the only way to fight is to disclose the truth; b) always push scientific advances and make a priority to find out on the health consequences of tobacco; c) persistence is rather important: we do not need dramatic but short campaigns but on the contrary persistent work to find out and disclose the truth; d) try always

to implicate physicians, nurses, and scientifics in the work because social credibility is very important (and that of politicians is not very high these days); e) And of course WE NEED COMPROMISE of our poitlicians not talking but NOT SMOKINg

additional comments
The EU has the opportunity to lead the international community, and has the responsibility to help all those countries which are the goal of tobacco indutry in our days. We have to help them trough information, scientific collaboration, and working together with WHO all over the world.

No

explanations
Das einzige Problem dabei sehe ich in der Alterskontrolle, aber wer an zigaretten ran will kommt auch unter 18 Jahren daran. Man sieht es beim Alkohol.

which option
No change

additional option

Die EU kann doch nicht für alles zuständig sein wollen. Das Rauchen wollen alle verbieten, aber die Steuereinnahmen werden gerne in den Sack gesteckt. Der Alkohol ist genauso schlimm wie die Zigaretten, aber den trinken ja alle, also ist er nicht so schädlich!!!!! Es gibt Entzugskliniken, Kuren für Alkoholkranke und so weiter. Beim Rauchen kann man sich diese kostenintensive Therapieform sparen.

additional comments
Jugenschutz und Aufklärung Ja, aber nicht alles bevormunden und regeln wollen.

Non concordo che "l'evidenza mostrache,se adeguatamente dimensionate e ben collocate ,le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo"e che maggiore e' la dimensione dell'avvertenza illustrata,maggiore ne e' l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte , piu' che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che gia' sono molto consapevoli dei pericoli e delle dannosita delle sigarette . Sono anche totalmente contrari all'introduzzione del cosidetto "pacchetto generico" ,che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo societa' manifatturiere di altrettanta serieta' ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione

del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualita' cosi danneggiando il tabacco europeo che della qualita' superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensare i costi piu' alti, sono stati smantellati.

explanations
Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzzioni di "Burley",in Italia e in tutta Europa. Questa qualita' di tabacco , utilizzata principalmente per il cosidetto "American blend",rispetto ad altre varieta' di tabacco, necessita di un certo numero di ingredienti in fase di lavorazzione.D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varieta'di tabacco "VIRGINIA")siano meno dannose di quelle che necessitano di ingredienti. Questa,pertanto, appare un a chiara discriminazione, che avrebbe il solo effetto di pregiudicare significamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 mila in tutta Europa.

Le enunciazioni del documento di consultazione,in realta non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento,seppure in modo parziale.Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distribuitori automatici sono vietati o dove e' vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obbiettivi prefissati di salvaguardia dei minori. Il sistema Italiano di

monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
Although the intended use of both smoked and non-smoked tobacco is the same, the means of consumption are too different for one Directive to cover them all without becoming complicated and unwieldy: It would result in a Directive in which only half the requirements would only apply to half the products. It would seem to make sense for herbal cigarettes to be brought within the scope of the Tobacco Products Directive as the means of use and hazards are similar enough, even though they do not contain tobacco. This problem of classification has arisen because from the outset the legislation made, perhaps flawed, assumptions about how nicotine consumption and smoking were necessarily linked together. It now seems that it is the means of consumption that determines the regulatory response, rather than the origin of the product consumed. If we exclude nicotine products intended for medical use, then smoked/nicotine products naturally fall into two main classes based on hazard type; combustible and non-combustible. The Tobacco Directive should be kept for combustible

products (whether or not they contain nicotine) and another Directive investigated to cover non-combustible nicotine products used recreationally. This classification would also keep in accord with related regulations such as those for second-hand smoke, fire hazards and the related insurance requirements etc, which do not apply to non-combustible tobacco products.

questions smokeless
problem definition
No

comments
I generally agree, however the problem definition admits that scientific evidence is lacking as to how much safer smokeless tobacco use is in comparison to smoking. I am of the opinion that this is actually a moot point; it is legal to smoke, therefore any other means of nicotine consumption also have to be legal for consistency in law, provided there is reasonable evidence that these means do not carry higher risks than smoking.

which option
Lifting the ban on snus

questions consumer
problem definition
Yes

which option
No change

additional option
I would like to raise the point that some of the warnings on cigarette packets can cause offence, which can have an effect opposite to that intended; it makes people react negatively to the author of the information, rather than assess the information itself. This can actually reinforce the denialist attitude that many smokers have adopted. I would recommend that the content of the warnings be reviewed for efficacy, rather than focussing on the graphic design.

questions on reporting
problem definition
Yes

which option
No change

regulation of ingredients
problem definition
No

explanations
I disagree with the idea that "attractiveness" should be used as a criterion when considering the banning of an additive, as it cannot be quantified. Only substances which add quantifiable toxic hazards should be banned.

which option

No Change

access to tobacco products
problem definition
No

explanations
As this consultation document addresses changes to a Directive relating to consumer protection, are issues relating to national taxes appropriate and within its scope?

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Labelling requirements should be harmonised across member states.

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

additional comments
Der Geltungsbereich der Richtlinie sollte auf elektronische Zigaretten und nikotinhaltige Lebensmittel erweitert werden. Kräuterzigaretten sind meines Erachtens ebenso gesundheitsschädlich und sollten deshalb auch mit Warnhinweisen versehen werden.

questions smokeless
problem definition
Yes

which option
Ban on all types of smokeless tobacco products

additional comments
Sämtliche rauchlosen Tabakprodukte sollten verboten werden, denn sie sind genauso gesundheitsschädlich wie Rauchen. Sie stellen deshalb kein geeignetes Mittel dar, mit dem Rauchen aufzuhören.

questions consumer
problem definition
Yes

which option
Improve consumer information; Introduce generic or plain packaging

which improvement
Picture warnings to become mandatory; Tar, nicotine and carbon monoxide levels to be replaced with general information on harmful substances in tobacco products; Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package; Health warnings to be put on water pipes

additional comments
Ja, neutrale Verpackungen und bildliche Warnhinweise würden die Attraktivität von Tabakprodukten vor allem für Kinder und Jugendliche senken. Genauso sinnvoll sind Informationen über die enthaltenen Schadstoffe. Auch Wasserpfeifen sind gefährlich, was häufig unterschätzt wird. Auch hier sind Warnhinweise erforderlich. Packungsbeilagen wie bei Arzneimittel. Das find ich gut!

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format; Introduce fees and sanctions

additional comments
Es sollte ein einheitliches verpflichtendes europäisches Format für die Meldung und Registrierung von Zusatzstoffen in Tabakprodukten eingeführt werden. Außerdem bin ich für spürbare und abschreckende Sanktionen, wenn Hersteller gegen die Meldepflicht verstoßen.

regulation of ingredients
problem definition
Yes

which option
Establish a common list of tobacco ingredients

which one
Establish a positive common list of tobacco ingredients; Establish a negative common list of tobacco ingredients

additional comments
Ich bin für eine europaweite einheitliche Regelung bezüglich der zulässigen als auch der verbotenen Zusatzstoffe.

access to tobacco products
problem definition
Yes

which option
Ban

which one2
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned; Promotion and displays in retail stores to be banned

additional option
Meine ergänzenden Forderungen: - Verbot des Verkaufs von Tabakwaren in Supermärkten. Es wirft nicht gerade ein gutes Licht auf unsere Gesellschaft, wenn im Kassenbereich von Supermärkten massenhaft Tabakwaren angeboten werden. Sollten dort nicht besser gesunde Lebensmittel platziert werden? - Rauchverbot während der Schwangerschaft, denn Rauchen in der Schwangerschaft bedeutet vorsätzliche Körperverletzung am ungeborenen Kind. - Rauchverbot in Privatwohnungen, in denen minderjährige Kinder leben - denn diese haben nicht die Entscheidungsfreiheit auszuziehen. Auch wenn behauptet wird, das sei nicht kontrollierbar, kann ich dieses Argument nicht gelten lassen. Vorschriften müssen sich an der Notwendigkeit ausrichten und nicht an der Kontrollierbarkeit. Viele Gesetze sind schwer kontrollierbar - es gibt sie aber dennoch. Das Rauchverbot in Privatwohnungen sollte auch dann gelten, wenn die Kinder nicht anwesend sind. Denn die Schadstoffe lagern sich in den

Vorhängen und Möbeln ab und die Ausdünstungen führen auch später noch zu gesundheitlichen Schäden - ganz zu Schweigen von dem damit verbundenen Ekel. - Rauchverbot in Kraftfahrzeugen, wenn minderjährige Kinder mitfahren - denn auch hier haben Minderjährige nicht die Entscheidungsfreiheit einfach auszusteigen. - Rauchverbot dort, wo viele Menschen auf engem Raum zusammen kommen, z.B. auf Volksfesten oder bei Sportveranstaltungen - auch im Freien. Denn immer wieder kommt es vor, dass sich Personen, insbes. Kinder, an den glühenden Zigaretten verletzen. Es kann auch nicht sein, dass ein Nichtraucher, der z.B. auf einem Volksfest für eine Bratwurst ansteht, sich den Rauch seines Vorder- oder Hintermanns ins Gesicht blasen lassen muss. Gleichfalls ist es eine Zumutung für Nichtraucher, z.B. bei Sportveranstaltungen im Freien, wo man auf engem Raum einen Platz zugewiesen bekommt, den Rauch des benachbarten Zuschauers ertragen zu müssen. Man kann sich ja nicht einfach auf einen anderen Platz setzen. - Empfindliche Geldstrafen für das achtlose "Entsorgen" von Zigarettenschachteln bzw. Zigarettenkippen auf öffentlichen Wegen, Wiesen, an Bahnhöfen usw. Diese Sauerei muss endlich ein Ende haben. Wer einmal 300 Euro für das Wegwerfen einer Zigarettenkippe auf dem Gehweg bezahlt hat, macht das kein zweites Mal! - Verkauf von Tabakwaren nur in speziellen Läden, deren Fenster - wie bei Erotikshops - mit einem Sichtschutz versehen sind. Wer keine Zigaretten sieht, kann auch nicht in Versuchung geraten. - Am sinnvollsten wäre ein generelles Rauchverbot in der Öffentlichkeit. Denn wer keine Raucher sieht, kann dadurch schon nicht zum Rauchen verführt werden. - Und, wie gesagt, Verbot von Zigarettenautomaten

additional comments
Der Verkauf von Tabak über das Internet und am Automaten sollte verboten werden, weil kaum kontrollierbar. Die Präsentation von Tabakprodukten im Einzelhandel (z.B. an der Kasse) sollte verboten werden, weil es zu Spontankäufen anregt.

questions scope
problem definition
No

explanations
The problem definition is incorrect, vague and unclear. The consultation does not identify a problem in any of the areas it mentions in this section.

which option
No change

recommend option
Given the concerns over the problem definition, Option 1, no change.

questions smokeless
problem definition
No

comments
It is vague and the consultation document has failed to define a problem in this area.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No, we disagree with the problem definition. It is based on a series of assumptions and assertions that are wrong.

which option
No change

questions on reporting
problem definition
No

explanations
No, we disagree with the problem definition. It is vague and incomplete.

which option
Establish a common compulsory reporting format

additional options
We support Option 2 using the EMTOC (Electronic Monitoring Tobacco Control) solution for a common reporting format.

regulation of ingredients
problem definition
No

explanations
No, we disagree with the problem definition. It is vague and incomplete. The Consultation document does not identify a problem in any of the areas mentioned in this section.

which option
No Change

additional option
In your view, which option addresses the problem most effectively? Because no problems have been properly identified Option 1, no change.

access to tobacco products
problem definition
No

explanations
No, we disagree with the problem definition. It is vague and incomplete. The Consultation document does not identify a problem in any of the areas mentioned in this section.

explanations
Nach der Definition der Problemstellung wird m.E. eine ggf. nötige Gleichstellung von anderen Rauchprodukten (z.B. Kräuterzigaretten) vermengt mit einem Verbot anderer Produkte, die eine andere möglicherweise weniger schädliche Form des Nikotinkonsums erlauben (z.B. SNUS). Dies halte ich im Sinne des gewünschten Gesundheitsschutzes der Bevölkerung für kontraproduktiv. Außerdem zeigt die Kommision nicht, was genau sie an Tabakprodukten für tatsächlich schädlich erachtet: Pyrolyseprodukte des Rauches oder Nikotin.

which option
No change

questions smokeless
problem definition
No

comments
Die unterschiedliche Behandlung von verschiedenen rauchfreien Tabakprodukten stellt aus meiner Sicht eine nicht akzeptable Behinderung dieser Produktkategorie dar.

which option
Lifting the ban on snus

additional option
Die Erfahrungen Schwedens haben gezeigt, dass SNUS durchaus eine Alternative zum Rauchen für Raucher darstellen kann, wobei deutlich weniger schädliche Nebenwirkungen zu erwarten sind. Dies wird auch durch Studien belegt. Die Kommission widwerspricht sich durch ihre gegenwärtige Position selbst im Sinne der Behinderung eines verbesserten Gesundheitsschutzes.

questions consumer
problem definition

No

explanations
Die Begründungen des Dokumentes bezweifeln die Wirkung der von der EU eingeführten Regelungen zur Konsumenteninformation. Dabei werden m.E. nur sehr vage Begründungen und Unterstellungen angeführt.

which option
No change

additional comments
Die angestrebten Änderungen sind letztlich nur Wettbewerbsbehinderungen mit Schikanecharakter für den Konsumenten, der Informationsgehalt steigt dabei nicht wirklich an.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
Yes

which option
Introducing the basic criteria on the EU level without a common list

additional option
Es ist nötig, wie schon in der Urfassung der EU-Direktive angekündigt, einheitlich gültige Methoden einzuführen, die eine objektive wissenschaftlich fundierte Beurteilung von Tabak- und Rauchinhaltsstoffen erlauben, dazu zählen auch validierte in-vitro Methoden. Auf der Basis dieser Ergebnisse sollten Kriterien zur Beurteilung eingeführt werden.

access to tobacco products
problem definition
No

explanations
Eine einheitliche Regulierung wird zwangsläufig nur der Methode der größtmöglichen Einschränkung der Wahlmöglichkeiten für den Konsumenten folgen. Solange man insgesamt diese Produkte nicht verbietet, muss man den Herstellern auch die Möglichkeit geben ihre Pordukte nach den Bedürfnissen der Konsumenten zu gestalten und dies auch kommunizieren zu können..

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

questions smokeless
problem definition
Yes

which option
Ban on all types of smokeless tobacco products

questions consumer
problem definition
Yes

which option

Improve consumer information; Introduce generic or plain packaging

which improvement
Picture warnings to become mandatory; Tar, nicotine and carbon monoxide levels to be replaced with general information on harmful substances in tobacco products; Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package; Health warnings to be put on water pipes

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format; Introduce fees and sanctions

regulation of ingredients
problem definition
Yes

which option
Establish a common list of tobacco ingredients

which one
Establish a positive common list of tobacco ingredients; Establish a negative common list of tobacco ingredients

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults; Tobacco display and promotion at points of sales to be restricted

questions scope
problem definition
Yes

which option
Extend the scope of the Directive

recommend option
Ich bin gege alle Formen des Tabaks.

additional comments
Weder Essbares noch Trinkbares, noch Kräuterzigaretten halte ich für gut. Erst recht darf es keine nikotinhaltigen Süßigkeiten geben. Es muss alles getan werden, dass Kinder und Jugendliche nicht zum Tabakkonsum verführt werden.

questions smokeless
problem definition
Yes

which option
Ban on all types of smokeless tobacco products

questions consumer
problem definition
Yes

which option
Introduce generic or plain packaging

questions on reporting
problem definition
Yes

which option
Introduce fees and sanctions

regulation of ingredients
problem definition
Yes

which option
Establish a common list of tobacco ingredients

access to tobacco products
problem definition
Yes

which option
Ban

which one2
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned; Promotion and displays in retail stores to be banned

additional option
Der Zugang zu Tabakprodukten kann nicht schwer genug gemacht werden. Karten zur Alterserkennung greifen nicht, wenn sich Jugendliche die Karte der Eltern oder eines Bekannten "leihen". Die Zigarettenautomaten müssen verschwinden. Ebenso soll im Supermarkt kein Tabakprodukt neben der Kasse sein, da es hier zu Spontaneonkäufen kommt.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Ich sehe keine Problematik oder Schwäche in der bisherigen Regelung. Somit ist aus meiner Sich keint Problem gegeben.

which option
No change

recommend option
Wie bereits angeführt, existier für mich kein Problem, somit ist auch keine effektive Problemlösung notwendig.

additional comments
Kein weiterer Kommentar.

questions smokeless
problem definition
No

which option
No change

additional option
Keine zusätzlichen Kommentare, allerdings möchte ich hier schon einmal klarstellen, dass jeder Verbraucher seine Entscheidung selbst treffen soll und es auch sicher gestellt werden sollte, dass er dies auch darf. Soll es so weit kommen, dass wir die Entscheidungsfähigkeit der EU-Verbraucher so einschätzen, als wären sie auf dem Stand eines Kleinkindes???? Wir brauchen nicht immer mehr und mehr Regelungen. Wir sollen uns auf die Selbstbestimmung und Selbstverantwortung der Individuen berufen!

additional comments
Kein weiterer Kommentar.

questions consumer
problem definition
No

explanations
Ich kann kein bei der bisherigen Regelung kein Problem feststellen.

which option

No change

additional option
Reichen die bisherigen Konsumenteninformationen denn nicht schon aus? Den EU-Konsumenten sollte nicht besondere Dummheit unterstellt werden, die bisherigen Informationen reichen vollkommen aus. Jeder kann als Individuum seine persönliche Entscheidung treffen, stellen wir die EU-Konsumten nicht dümmer dar, als sie sind! Jeder kennt die Nachteile von Rauchen, auf diese wird man auch jetzt schon hingewiesen! Wie wäre es, über neue Konsumenteninformationen im Alkoholbereich nachzudenken? Achtung: Alkoholkonsum kann zur Abhänigkeit führen? Wie wäre es, über neue Konsumenteninformationen bei Schokolade nachzudenken? Achtung: Schokdolade kann bei übermäßigem Konsum dick machen!!!!!!!! Und nicht zu vergessen, Kinder bei ihrer Geburt darauf hinzuweisen, dass das Leben tötlich verlaufen wird!

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option

Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).
