Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option

Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of

toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition

No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option

Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on

the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increse in illegal sales of cigarettes.

which option
No change

questions on reporting
problem definition
No

explanations
Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no clear problem stated as regards either vending machines or point of sale display. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer

problem definition
No

explanations
There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increse in illegal sales of cigarettes.

which option
No change

questions on reporting
problem definition
No

explanations
Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no clear problem stated as regards either vending machines or point of sale display. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

Lifting the ban on snus

questions consumer
problem definition

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increse in illegal sales of cigarettes.

which option
No change

questions on reporting
problem definition
No

explanations
Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no clear problem stated as regards either vending machines or point of sale display. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

regulation of ingredients
problem definition
No

explanations
There is no such thing as attractive substances. This is misleading the public. The percent of ingredients used is so small that human senses cannot feel. Look at Belgium - banned in 2001 and since then, smoking incidence grew 1% from 29% to 30%.

which option
No Change

access to tobacco products
problem definition
No

explanations
It is like banning completely an industry. Please look at the thousands of jobless which this will create at EU level, not because of the tobacco compenies but retailers and all others in the supply chain. And then, please look at tax evasion. You use UK as an example. Please look at the figures of tax evasion and illegal trade of cigarettes in UK before you throw info like this.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other

experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

recommend option
The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increse in illegal sales of cigarettes.

which option
No change

questions on reporting
problem definition
No

explanations
Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no clear problem stated as regards either vending machines or point of sale display. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

recommend option
The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

questions smokeless
problem definition
Yes

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increse in illegal sales of cigarettes.

which option
No change

questions on reporting
problem definition
No

explanations
Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

which option
No Change

access to tobacco products
problem definition
No

explanations
There is no clear problem stated as regards either vending machines or point of sale display. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option

No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless

problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products

problem definition
Yes

Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the

suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the

profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition

No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option

Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions scope
problem definition
Yes

which option
No change

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector’s operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

questions on reporting
problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

No Change

access to tobacco products

problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

problem definition
Yes

which option
Establish a common compulsory reporting format

regulation of ingredients
problem definition
No

explanations
It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

which option
No Change

access to tobacco products
problem definition
Yes

which option
Controlled supply and access

which supply and access
Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

additional option
Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

additional comments
There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

questions smokeless
problem definition
No

comments
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

which option
Lifting the ban on snus

questions consumer
problem definition
No

explanations
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

which option
No change

additional comments
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.
