Ref.: proposal for Legal Proposal On Information To Patients

Dear Mrs. Närhi,

It's a great honour for me, to send you following proposal for the public consultation.

Text:

**In medicine the ethnic products have to be taken into consideration for the recovery and releaf of illnesses and various discomforts.
Therefore there must be a high ethnic level for consultation and information.
As a result people concerned with issuing and processing on pharmaceuticals information
Must have a special up-to date training in view of all the side-essets and the changes due to the taking of other medicaments.**

Yours sincerely

Detlef Below
