Mapping metrics of health promotion and disease prevention for health system performance assessment

Wednesday 21 June, 15.00 – 16.00 CEST, Brussels time

Dear colleague,

This webinar will present to you the report on “Mapping metrics of health promotion and disease prevention for health system performance assessment” drafted by the Expert Group on Health Systems Performance Assessment (HSPA). The report covers a survey conducted within the HSPA Expert Group on the indicators used to measure health promotion and disease prevention in Member States.

We will also present a number of case studies on issues where there was mutual interest from the HSPA Expert Group. These are health literacy, mental health and a country case study on Austria. We hope you will join us to hear more about health promotion and disease prevention in the context of health system performance assessment.
