

The European Union geriatrics Medicine Society welcomes the inclusion of result related information fields in the public area of the EUDRACT.

These are our suggestions:

- To differentiate two age categories within the elderly group: ≥ 65 and ≥ 80 years;
- To report the number of subjects excluded by the study and the reasons for exclusion, also categorized by age group (< 65 ; ≥ 65 and ≥ 80 years);
- To report adverse effects according to age group (< 65 ; ≥ 65 and ≥ 80 years).
