Minutes of webinar with IBVTA

Webinar date: 30 June 2017, 15.00 – 16:00

Participants:

DG SANTE B2

IBVTA (Richard Hyslop, Liam Humberstone, Peter Gibbons)

Independent British Vape Trade Association (IBVTA) offered to share with DG SANTE their experience concerning e-cigarette emission testing. In this respect, it was agreed to organize a Webex webinar session.

Members of the IBVTA Science and Regulatory Committee addressed in their presentation the following main areas:

- Overview of product types and e-cigarette atomizer designs;
- Development of analytical testing regime for e-cigarette devices;
- Key emissions in relation to device power output;
- Comparison of e-cigarette carbonyl emissions with cigarettes & modified risk tobacco products (MRTPs).

The presentation was followed by a brief Q&A session.
