Web Services

The definition of KMEHR is completed by a minimal set of web service operations to support the exchange and the sharing of medical files. Those web services result from concrete implementations initiated throughout the [Flows](#) projects.

In order to unify the interfaces developed within those local and regional initiatives, a revision of those interfaces has been undertaken within the '[G19 - Belgian Care Providers Telematic Advisory Group](#)' in the context of the 'hubs-metahub' architecture. The result of this work is available here. The work currently published has the status of a draft as the definitions must still be validated through effective testing with partners involved in the hub-metahub project. Those tests are currently running.

The 'hub-metahub' architecture identifies two sets of web service operations: the operations provided by the hubs to their clients, called '**intrahub** webservices', and the web service operations provided by the hubs to the other hubs, called '**interhub** webservices'.

The functional specification of each operation is available in the table below.

The following archive file contains the complete XSD structure corresponding to the payload of the webservices. It also contains the WSDL that defines the interface at the interhub level.

Introduction

This site aims to offer a central point for the documentation of the KMEHR normative elements. It mainly focuses on the most recent version of the norm.

This site replaces the historic KMEHR site sponsored by the CHU of Charleroi, which is no longer being maintained. Most of the content of the present site, however, comes from this historic site.

What is KMEHR?

KMEHR was introduced in 2002. It is an implementation of the [fourth recommendation PDF](#) of the [Belgian Healthcare Telematics Commission](#), enabling the exchange of structured clinical information.

KMEHR is mainly composed of the following elements:

- an [XML schema](#) that defines a general and simple message grammar,
- a set of recognized medical [transactions](#) compliant with this grammar,
- a set of [reference tables](#) whose values may be used within KMEHR messages.

Those core elements have been complemented by a set of [web services](#) implemented in concrete initiatives for the standardized exchange of data between systems.

Content: based on existing standards

- **Consider** content already validated and used at international level, based on available standards.
- **Prepare** possible progressive transition from kmehr to HL7-CDA:
 - Mapping headings Kmehr-CDA
 - Based on existing data and **input from Business** prepare CDA specification for lab report and dismissal letter.

A « PARENT » like evolution: ONLY ONCE!

Healthdata's mission is to facilitate the data exchange between healthcare professionals and researchers according to the *principle of single multifunctional data collection* and the *re-use of data*, in order to **increase public health knowledge** and to **adjust health care policy**, with respect for the **privacy of the patient, the healthcare professional** and the medical confidentiality.

The challenge for scientific data collection

131 registers (and counting..)

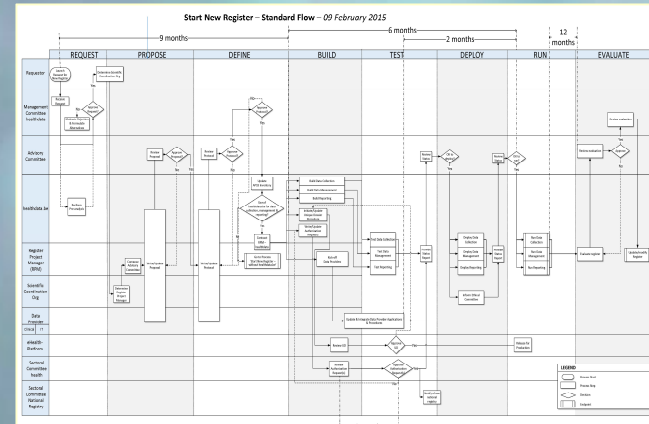

1. Ambulatory Care Health Information Lab (RIZIV-INAMI)
2. Annual Hospital Statistics (FOD-SPF)
3. Antwerpen registry of congenital anomalies (EUROCAT)
4. Belgian Abortion Register (FOD-SPF)

6. Belgian AIDS-reference laboratories (WIV-ISP)
7. Belgian alpha-1 antitrypsin deficiency registry (Alpha One International Registry (AIR))
8. Belgian Association for Cardio-Thoracic Surgery Database
9. Belgian Cancer Register: Standard version (Belgian Cancer Registry)
10. Belgian Cystic Fibrosis registry (WIV-ISP)
11. Belgian Early Warning System for Drugs (WIV-ISP)
12. Belgian familial adenomatous polyposis registry
13. Belgian Langerhans cell histiocytosis registry (LCH)
14. Belgian Neuromuscular Disease Registry (WIV-ISP)
15. Belgian patient database for Wilson disease (EuroWilson registry)
16. Belgian Patient registry for rare bleeding disorders
17. Belgian Pediatricians Nephrology Registry (BPNR)
18. Belgian Register for Assisted Procreation (National College of Physicians in Reproductive Medicine)
19. Belgian Register Substitution Treatment (FAGG-AFMPS)
20. Belgian registry of primary immunodeficiencies (ESID European registry)
21. Belgian registry on acromegaly, epidemiology and quality of care (ACROBEL)
22. Belgian severe chronic neutropenia patient registry (SCN international registry (SCNIR))
23. Belgian sickle cell anemia registry
24. Belgian systemic sclerosis cohort
25. Belgian Virtual Tumourbank (Belgian Cancer Registry)
26. Belgian Treatment Demand Indicator Register (WIV-ISP)
27. BINC: Begeleiding in Cijfers
28. Biobank of the pediatric granulomatous arthritis international registry (UZLeuven)
29. Birth Register (VAZG, Observatbru, DGOPLASS, ADSEI)
30. Central Register of Rare Diseases (WIV-ISP)
31. Database Farmanet (IMA-AIM)
32. Database Health Care (IMA-AIM)
33. Database Population (IMA-AIM)
34. Database Palliative care (federatie palliatieve zorg Vlaanderen)
35. Declaration of Infectious diseases (MATRA, WIV-ISP)
36. Drug Related Infectious Diseases (WIV-ISP)
37. Effectiveness of Endometrial Cancer Treatment (EFFECT) (Belgian Cancer Registry)
38. End of career measures (FOD-SPF)
39. Electronic Patient Registration Centers Mental Health Care Flanders
40. European alternating hemiplegia and rare epilepsies registry in childhood (ENRAH)
41. European Antimicrobial Resistance Surveillance Network (WIV-ISP)
42. European network for the study of orphan nephropathies registry (EUNEFRON)
43. European patient registry and cohort for congenital disorders of glycosylation (EUROGLYCANET)
44. European Point Prevalence Survey (PPS AB & HA); WIV-ISP)
45. European registry of human alveolar echinococcosis: Belgium (EURECHINOREG)
46. European Surveillance of Antimicrobial Consumption (ESAC-Net; WIV-ISP)
47. Flemish Renal Registry (NBVN)
1. Haemoglobinopathies - database
2. Handhygiën (WIV-ISP)
3. Head and Neck: orofarynxcarinomen Project (Belgian Cancer Registry)
4. Healthcare Associated Infections & Antimicrobial Use in European Long Term Care Facilities (WIV-ISP)
5. Hospital Financing (FINHOSTA, FOD-SPF)
6. Infectious diseases (sentinel laboratories) (WIV-ISP)
7. Informatiestroom tussen de ziekenhuizen en de administratie gezondheidszorg (VAZG)
8. Initiative for Quality improvement and Epidemiology in Diabetic Foot clinics (WIV-ISP)
9. Initiative for Quality promotion and Epidemiology in Diabetes care (WIV-ISP)
10. Initiative for Quality promotion and Epidemiology in Diabetes care for children and adolescents (WIV-ISP)
11. Integrated Computerized Network, INTEGO
12. Medical Emergency Services: MUGREG (FOD-SPF)
13. Minimum Hospital Data (FOD-SPF)
14. Minimum Psychiatric Data (FOD-SPF)
15. MIRAGE database (IKAROS; Kind & Gezin)
16. Mortality Register (VAZG, Observatbru, DGOPLASS, ADSEI)
17. National Surveillance of Antimicrobial Use in Belgian Hospitals (WIV-ISP)
18. National Surveillance of Healthcare Associated Infections in Intensive Care Units (WIV-ISP)
19. National Surveillance of Influenza (WIV-ISP)
20. National Surveillance of Meticillin resistant Staphylococcus aureus (MRSA) in Belgian hospitals (WIV-ISP)
21. National surveillance of multi-resistant micro-organisms in Belgian hospitals (WIV-ISP)
22. National Surveillance of Septicemia in the Hospital (WIV-ISP)
23. National Surveillance of Surgical Site Infections (WIV-ISP)
24. Netoverschrijdend ICT-project van de CLB's in samenwerking met het departement Onderwijs (VAZG)
25. Newborn college Register
26. ORTHopedic Prosthesis Identification Data (RIZIV-INAMI)
27. Pediatric granulomatous arthritis international registry
28. Permanent Sample (IMA-AIM)
29. PROCARE (Belgian Cancer Registry)
30. Prospective collection of tissue, ascites and plasma samples from patients with ovarian cancer (UZLeuven)
31. Qermid@Coronaire stents (RIZIV-INAMI)
32. Qermid@Endoprothesen (RIZIV-INAMI)
33. Qermid@Hartdefibrillatoren (RIZIV-INAMI)
34. Qermid@Pacemakers (RIZIV-INAMI)
35. Quality Indicators Healthcare Associated Infections (WIV-ISP)
36. Register POMALYST (Celgene)
37. Register REVLIMID (Celgene)
38. Register THALOMID (Celgene)
39. Rest/care homes (FOD-SPF)
40. Robot Assisted Laparoscopic Prostatectomie (RALP) (Belgian Cancer Registry)
41. Sentinel General Practitioners (WIV-ISP)
42. Sexually transmitted infection (sentinel surveillance) (WIV-ISP)
43. Shared Arthritis File for Electronic use (RIZIV-INAMI)

HEALTHSTAT

INVENTORY OF REGISTERS

Within the Belgian healthcare landscape, there are many active players, each of whom ask specific health(care) professionals for specific information, which can serve various purposes. Think of epidemiological research (eg. Flu epidemic), quality of care, reimbursement, etc. This inventory provides an overview of these so-called registers, how they are organized and exactly what information they collect and publish. More information about the structure and objectives of this inventory can be found on the website of healthdata.be.
