

## *Breakout session 2: Research and development opportunities*

- RD research landscape
  - ERICA + EJP-RD + ERNS as R&D boosters but also as entry points for RD research
- Therapy development and clinical trials
  - Ultrarare diseases as focal points for ERN based diagnosis and care but also for academically driven therapy development (n-of-1 therapies)
  - Coordination of nationally funded academic RD trials
- Research readiness
  - Research support infrastructure such research offices at HCP level
  - Allowed time for clinical research (in addition to clinical work)
