| 2003106 | Ben BHM II - Benchmarking Regional Health Management (Phase 2) | Ministry of Health, Social Affairs, Women and Family - Germany | Heimat BRAND | heimut.brand@lpa.nrw.de | 2003 | HI | BEN BHM II - Benchmarking Regional Health Management | BEN BHM II defined health performance indicators to reflect the major public health concerns regarding the management of measles, breast cancer and diabetes (type II). The selection and definition of the indicators was done under consideration of the ECHI list of indicators. The indicators were chosen based on their public health relevance and their ability to illustrate the epidemiological situation of the participating regions, to assess the performance of the regional health managements, to monitor and report on progress towards regional health goals and to allow regional comparisons of health management systems. | http://www.ben-rhm.nrw.de | indicator list available, http://www.ben-rhm.nrw.de/material.html |
| 2003111 | ISS DATA - Maintenance, Development and Promotion of the ISS Hospital Survey in the current and enlarged EU | Kuratorium für Schuz und Sicherheit - Austria | Robert BAUER | robert.bauer@kiv.at | 2003 | HI | ISS DATA - Maintenance, Development and Promotion of the ISS Hospital Survey in the current and enlarged EU | The project "ISS DATA - Maintenance, Development and Promotion of the ISS Hospital Survey in the current and enlarged EU" has provided specific ECHI indicators (actual and proposed) based on the EU Injury Database (IDB) for PHASE (PHP06; both projects coordinated by EuroSafe). | http://ec.europa.eu/health/ph_projects/2003/action1/action1_2003_04_en.htm | No project website found but described at EC Europe webpage. |
| 2003112 | ENHIS - Implementing Environmental and Health Information System in Europe | WHO (World Health Organization), Regional Office for Europe - Denmark | Michal KRZYŻANOWSKI | mkr@ecehbonn.euro.who.int | 2003 | HI | ENHIS - Implementing Environmental and Health Information System in Europe | The project aims to set up and start the operation of the comprehensive information and knowledge system (ENHIS) that will generate and analyse environmental health information to support relevant policies in Europe, including those addressing children. It will allow international and interregional comparisons of the leading environmental health issues in Europe, linked with national assessments by employing uniform methodology. The system will be based on a set of Environmental Health Indicators developed and updated by the project, will use health impact assessment methods and will contribute to the EC Health Information System. ENHIS indicators aim at reflecting and communicating the status of environment and health issues in Europe. They are tools to monitor health and environment trends in countries, to evaluate the effectiveness of relevant policies and to make comparisons of countries' progress towards the targets set in Europe-wide action programmes. ENHIS developed a methodology for a set of indicators to measure and report on health and its relation to environmental risk factors. Focusing EUROCHIP-1 drew up a list of European indicators. EUROCHIP-2 is a 3-year project to extend the EUROCHIP-1 network of networks to all Member and Applicant countries. The multidisciplinary EUROCHIP-2 network will consist of national groups of specialists and international groups for various domains, and will be co-ordinated by Panel of Experts with delegates from countries, agencies, cancer networks, and health ministries. The 1st September 2008 EUROCHIP-3 officially started. | http://www.enhis.org/object_class/enhis_bome_tab.html | All information found on webpage. |
| 2003115 | EUROCHIP 2 - European Cancer Health Indicator Project (Phase 2) | Istituto Nazionale per lo Studio e la Cura dei Tumori - Italy | Andrea MICHELI | andrea.michel@istitutotumori.mi.it | 2003 | HI | EUROCHIP 2 - European Cancer Health Indicator Project (Phase 2) | | http://www.tumori.net/eurochip2/report_2.php?l5 | |
| 2003118 | EUROCISS 2 - Cardiovascular Indicators Surveillance Set in Europe (Phase 2) | Istituto Superiore di Sanita - Italy | Simona GIAMPOLI | simona.giampoli@iss.it | 2003 | HI | EUROCISS 2 - Cardiovascular Indicators Surveillance Set in Europe (Phase 2) | The EUROCISS 2 Project (European Cardiovascular Indicators Surveillance Set) is a follow-up project which was firstly set up in 2000 by a partnership of European Union (EU) countries to develop health indicators and recommendations for monitoring cardiovascular disease. Cardiovascular diseases (CVDs) have been identified as one of the leading contributors to the global disease burden. Therefore, the aims of the EUROCISS project were: to define indicators for monitoring CVDs; to recommend standardized methods for future data collection in the EU; to prepare manuals of operations describing in detail procedures and methods for easy implementation of population-based registers and cardiovascular diseases surveys. The achievement of these aims facilitates cross-country comparisons and assists efforts to improve the prevention and control of CVDs. | http://www.euro.iss.it/eurociiss/progetto/pdf2007/2007-REPORT.pdf | http://www.euro.iss.it/eurociiss/progetto/pdf2007/2007-REPORT.pdf |
| 2003119 | MINDFUL - Mental Health Information and Determinants for the European Level | National Research and Development Centre for Welfare and Health - Finland | Prof. Kristian WAHLBECK | ulja.katila-nurkka@stakes.fi | 2003 | HI | MINDFUL - Mental Health Information and Determinants for the European Level | MINDFUL aims at improving the status of mental health information within the European Union by building on previous work in this area and also by widening the scope of the mental health monitoring systems to cover - not only mental health - but also positive mental health and mental health promotion and prevention of mental disorders. The main outcome of MINDFUL is a comprehensive forward-looking mental health information system which endorses sound and sensible policy-making based on reliable and comparable information. | http://info.stakes.fi/minifull/EN/finreportpage.itm | http://info.stakes.fi/NR/rdonlyres/A9BD81F03-CD9C-463A-9374-E6251BAE8410/Consolidatedfinalreport.pdf |
| 2003125 | EUROTHINE - Tackling Health Inequalities in Europe: an integrated approach | EMC (Erasmus MC) - Universitair Medisch Centrum Rotterdam (University Medical Center Rotterdam) - The Netherlands | Johan P. MACKENBACH | j.p.mackenbach@erasmusmc.nl | 2003 | HI | EUROTHINE - Tackling Health Inequalities in Europe: an integrated approach | Indicators of socioeconomic position, including educational level, occupation class and household income. In Eurothine, we applied indicators as developed in previous projects financed by the Public Health Programme. The Eurothine project has demonstrated the application of socioeconomic indicators in relationship to new health outcome indicators (e.g. health care utilisation) and new member states (especially the central and eastern European countries). | www.eurothine.org | http://survey.erasmusmc.nl/eurothine/index.php?fid=112.0.0.1.0.0 |
| 2003131 | EUROPERISTAT 2 - A comprehensive health information and knowledge system for evaluating and monitoring perinatal health in Europe (Phase 2) | AP-HP - Assistance Publique - Hôpitaux de Paris - France | Jennifer ZELIN | zelin@cochin.inserm.fr | 2003 | HI | EUROPERISTAT 2 - A comprehensive health information and knowledge system for evaluating and monitoring perinatal health in Europe (Phase 2) | The aim of the PERISTAT project is to develop indicators of perinatal health and perinatal care for health professionals, policy makers, researchers and health service user groups who wish to monitor and evaluate perinatal health and care in the European Union. Currently, many perinatal health indicators in the EU member states are not compiled on a comparable basis, and key indicators for comparing perinatal health and the quality of health services are not available in all member states. With the PERISTAT indicator set, we aim to facilitate the surveillance of perinatal health in the EU by harmonizing indicator definitions and encouraging the collection of comparable data for the following purposes: To assess maternal and infant mortality and morbidity associated with events in the perinatal period. To describe the evolution of risk factors for perinatal health outcomes in the population of childbearing women, including demographic, socio-economic and behavioural characteristics. To monitor the use and consequences of medical technology in the care of women and infants during pregnancy, delivery and the postpartum period. | http://www.europeristat.com/publications/index.shtml | http://www.europeristat.com/publications/index.shtml |
| 2003133 | EMS-db - EUROMEDSTAT-Database | CNR/IRPPS (Consiglio Nazionale delle Ricerche - Istituto di Ricerche sulla | Pietro FOLINO-GALLO | p.folino@galia.gov.it | 2003 | HI | EMS-db - EUROMEDSTAT-Database | EUROMEDSTAT-Database and its predecessor project aim to develop indicators for monitoring price, expenditure and utilisation of medicines under a public health point of view and to build a European database of licensed medicines. | http://www.euromedstat.cnr.it/project/project.asp | http://www.euromedstat.cnr.it/indicators/indicators.asp |
| 2003134 | EUPHORIC - EU Public Health Outcome Research and Indicators Collection | ISS (Istituto Superiore di Sanita) - Italy | Maria Torre | maria.torre@iss.it | 2003 | HI | EUPHORIC - European Public Health Outcome Research and Indicators Collection | EUPHORIC focuses on health outcome indicators. Through a worldwide analysis of the scientific literature and of the websites of institutions working on the development of outcome indicators a list of 54 outcome indicators have been prepared. The list refers to the following 9 areas of pathology: cardiovascular diseases, cancer, infectious diseases, chronic diseases, orthopaedics, transplantation, emergency diseases, neonatal/maternal and miscellaneous. | www.euphoric-project.eu | http://www.euphoric-project.eu/protect/70?no66/660 |

All suicides and suicide attempts with contacts to the health system are monitored. | http://www.selvmordforskning.dk/Web/English/Menu2/Research/MONSUE | http://www.selvmordforskning.dk/Web/English/Menu2/Publications/Publications+and+working+papers |
| 2003114 | Collection of European Data on Lifestyle Health Determinants - Coordinating Party (LIS) | Dresden University of Technology - Germany | Wilhelm KIRCH | Wilhelm.Kirch@mailbox.tu-dresden.de | 2003 | HI | LIS - Collection of European Data on Lifestyle Health Determinants - Coordinating Party | In the field of Health information seven Working Parties have been established to support the collection of indicators. One of them is the Lifestyle Working Party, which has recently broadened its scope and has been renamed as a result. The renewed Working Party on Information on Lifestyle and Specific Subpopulations is going to contribute to the further development of European Community Health Indicators (ECHI). The Working Party covers the following thematic fields: Nutrition/ Physical Activity, Tobacco Use, Alcohol Consumption, Illegal Drug Use, Child Health, Gender-specific Health, | www.public-health.tu-dresden.de/eu | http://www.public-health.tu-dresden.de/eu/ |
| 2004109 | PIA PHR - Policy Impact Assessment of Public Health Reporting | Institute for Health and Work NRW | Helmut BRAND | helmut.brand@liga.nrw.de | 2004 | HI | PIA PHR - Policy Impact Assessment of Public Health Reporting | PIA PHR aims to assemble indicators about the economic, social and health conditions of regions which support the „Health is Wealth“-campaign, public health oriented health economic strategies for regional developments and thereby investments in health for regional development not at least by EU Structural Funds. | http://www.pia-phr.nrw.de/index.html | http://www.pia-phr.nrw.de/topics_a-z.html |
| 2004110 | European Network For Rare And Congenital Anaemias | Hospital Clinic i Provincial de Barcelona - Spain | Juan-Lluís VIVES CORRONS | enerca@enerca.org | 2004 | HI | ENERCA - European Network for Rare and Congenital Anaemias | The main aim is to contribute to the immediate detection of these anaemias, by improving and disseminating knowledge of diagnosis and clinical treatment. Therefore, ENERCA intends to create as complete a data base as possible about these anaemias that can be used both by the health sector (general practitioners, family doctors, specialists, researchers, and health professionals in general) and for the patients and their families and/or carers. | www.enerca.org | website is the source of information, you can log in as professional in order to get more information. |
| 2004113 | Analyse de la mortalité par traumatismes dans l'Union Européenne | Institut de Veille Sanitaire - France | Bertrand THELOT | b.thelot@invs.sante.fr | 2004 | HI | ANAMORT - Analyse de la mortalité par traumatismes dans l'Union Européenne (Analysis of injury related mortality in Europe). | The goal of the project is more to make data more comparable than creating new indicators. The indicators used in this project cover the field of mortality related to "external causes of mortality" (chapter XX of ICD10). Indicators related to general mortality are similar to those describe in the Helath status/ Mortality/general mortality of the ECHI Hierarchy. Some recommendations on indicators related to Health status/ Mortality cause specific/External Cause will be soon available (March 2008) | http://www.invs.sante.fr/surveillance/anamort/ | http://www.invs.sante.fr/surveillance/anamort/ |
| 2004116 | Establish a Monitoring System on Prison Health Indicators and Health Determinants | World Health Organization Regional Office for Europe - Denmark | Lars MøLLER | lmo@euro.who.int | 2004 | HI | Establish a Monitoring System on Prison Health Indicators and Health Determinants | First concrete outcome of the project is our publication 'Health in Prisons. A WHO guide to the essentials in prison health', which was launched in May last year. For an online version of the guide, please see the link at our website: http://www.euro.who.int/prisons under highlights. The second concrete outcome is the Prison Health Database. You can enter the database from our website, or go directly to the database by following the link http://data.euro.who.int/hip/ . The nature/area of the indicators is prison health and in total there are around 200 indicators in the database. Aim of the database is to develop evidence-based guidance on cost-effective disease control and health promotion in prisons as part of national strategies for public health. The database is gradually being filled by all European countries since Autumn 2006. A few weeks ago we published a first annual report about the project for the European Commission, called 'Establish a | http://www.euro.who.int/prisons | http://www.euro.who.int/prisons/publications/20050610_1 |
| 2004125 | PPRI - Pharmaceutical Pricing and Reimbursement Information | ÖBIG - Austrian Health Institute (Österreichisches Bundesinstitut für Gesundheitswesen) - Austria | Claudia HABL/Romana LANDAUER | habl@oebig.at | 2004 | HI | PPRI - Pharmaceutical Pricing and Reimbursement Information | The Set of Core PPRI Indicators contains 21 indicators to compare health care and, in particular, pharmaceutical systems. The indicators are structured into 5 sections: Background (= Health system), Pharmaceutical system, Pricing of pharmaceuticals, Reimbursement of pharmaceuticals, and Rational use of pharmaceuticals. This corresponds to the outline of the country reports on pharmaceutical pricing and reimbursement systems (PPRI Pharma Profiles), which are the key information and data sources for the PPRI comparative analysis based on these indicators. | http://ppri.oebig.at | http://ppri.oebig.at/index.aspx?Navigation=rj2 |
| 2004130 | POMONA 2 - Health indicators for people with intellectual disabilities: using an indicator set | National University of Ireland Dublin - University College Dublin (UCD) - Ireland | Patricia NOONAN-WALSH | patricia.walsh@ucd.ie | 2004 | HI | Pomona II - Applying a set of health indicators for people with intellectual disabilities | The project has set up a list of 18 indicators arranged according to the ECHI hierarchy. Three indicators are specific to people with intellectual disabilities: prevalence of intellectual disabilities; presence of challenging behaviour and training of health professionals in the area of intellectual disabilities. | www.pomonaproject.org | http://www.pomonaproject.org/report.php |
| 2004131 | HAEMACARE - Cancer Registry based Project on Haematologic Malignancies | Istituto Nazionale per lo Studio e la Cura dei Tumori - Italy | Milena Sant | milena.sant@istitutotumori.mi.it | 2004 | HI | HAEMACARE - Cancer registry based project on haematological malignancies | HAEMACARE is working at the following main points: 1. proposing a list of HM (haematological malignancies) grouping the existing ICD-O codes into categories suitable for international comparisons of incidence, survival and prevalence 2. writing a international manual for coding HM, that will be diffused to all the European registries 3. preparing the website 4. developing a list of indicators of clinical activity. | http://www.haemacare.eu/ | http://www.haemacare.eu/documents.asp?id=2 |
| 2005105 | European Myasthenia Gravis Network | Université de Paris – Sud XI (UPS) - France | Dr Sonia BERRIH-AKNIN | sonia.berrih@coml.u-psud.fr | 2005 | HI | Euromyasthenia | Workpackage 6 (Psycho-socioeconomic determinants) of the Euromyasthenia project has identified a list of psychological and socioeconomic determinants for myasthenia gravis, and has made a a questionnaire based on these identified items. Besides, indicators of socioeconomic factors and determinants of health coming from the ECHI-2 project they used the quality of life survey (SF-36), and additional indicators (coffee/tea consumption, use of vitamins, disease-specific morbidity (auto-immune diseases)). | www.euromyasthenia.org | |

| 2005109 | ELUCID - European Core Indicators in Diabetes Mellitus | Stichting Kwaliteitsinstituut voor de Gezondheidszorg (CBO) - The Netherlands | Fred STORMS | f.storms@cbo.nl | 2005 HI | EUCID - European Core Indicators in Diabetes Mellitus | This project will make available the national facts of Diabetes Mellitus and its risk factors from countries in the European Union. The format of these facts will be indicators, condensed data about the disease, that are collected on a national or representative scale. | www.eucid.eu | Codebook of indicators available |
| 2005113 | EGOHID II - European Global Oral Health Indicators Development Phase II | Université Claude Bernard Lyon 1 - France | Dennis Bourgeois | egohid@ezus.univ-lyon1.fr | 2005 HI | EGOHID II - European Global Oral Health Indicators Development | As part of the Health Information and Knowledge System, the overall objective of EGOHID Project (coordinated by Professor Denis Bourgeois, University of Lyon) is to provide quality, relevant and timely data, information and knowledge in order to support public health decision-making, global oral health promotion as well as quality of care and surveillance of people in Europe. The first phase of EGOHID Project (2003-2005) resulted in the selection of a set of core indicators for oral health (EGOHID essential indicators catalogue available on http://www.egohid.eu). Now, with the establishment of a network including 22 countries, EGOHID Phase II (2006-2008) will provide methodological criteria for collection of data to implement and promote these essential oral health indicators in an operational way. | http://www.egohid.eu http://www.egohid.eu/html/Phase2-reports.htm | |
| 2005111 | LIS II - Scientific Platform of the Working Party "Lifestyle and Health Determinants" | Technische Universität Dresden (TU-DE) - Germany | Wilhelm KIRCH | dk.kirch@tu-dresden.de | 2005 HI | LIS II - Scientific Platform of the Working Party "Lifestyle and Health Determinants" | In the field of Health Information seven Working Parties have been established to support the collection of indicators. One of them is the Lifestyle Working Party, which has recently broadened its scope and has been renamed as a result. The renewed Working Party on Information on Lifestyle and Specific Subpopulations is going to contribute to the further development of European Community Health Indicators (ECHI). The Working Party covers the following thematic fields: Nutrition/ Physical Activity, Tobacco Use, Alcohol Consumption, Illegal Drug Use, Child Health, Gender-specific Health, Health of the Elderly, Migrant Health, Health of Deprived Population Groups | http://www.public-health.tu-dresden.de/eu-gesdesen.de/eu/ | |
| 2006111 | Defining best practices in palliative care in Europe | Stichting Katholieke Universiteit, more particular the Radboud University Nijmegen Medical Centre | Kris Visser | k.visser@anes.umcn.nl | 2006 HI | Defining best practices in palliative care in Europe | In the second year of the project a set of indicators for palliative care will be developed, with a focus on early initiation and an integrated approach. This will be done by a literature search, expert opinion, and an international Rand Delphi procedure. This set of indicators will be available in August 2009. | | |
| 2006113 | Surveillance of rare cancers in Europe | Fondazione IRCCS Istituto Nazionale dei Tumori, Milano | Dr. Gemma Gatta | gemma.gatta@istitutotumori.mi.it | 2006 HI | RARECARE - Surveillance of rare cancers in Europe | The project will produce indicators on incidence, survival, mortality rates and prevalence (%) and absolute number for a list of rare cancer, in Europe. These indicators will be based on population based cancer registry. Other indicators regarding diagnosis and treatment will be explored for some European regions and also based on cancer registry data. | www.rarecare.eu | http://www.rarecare.eu/rare_indicators.asp |
| 2006120 | Instruments for assessing levels of physical activity and related health determinants (ALPHA) | Karolinska Institutet Stockholm | Michael Sjörström | michael.sjostrom@prevnuh.ki.se | 2006 HI | ALPHA - Instruments for Assessing Levels of Physical Activity and related Health Determinants | The general objective of the project ALPHA is to provide a set of instruments for assessing levels of physical activity, its underlying factors (e.g. build environment, transport, and workplace) as well as fitness in a comparable way within the European Union. | http://sites.google.com/site/alpaprojecttoobjectphysicactivity/publications | |
| 2007112 | ISARE (French observatories) - France | Fnors (French observatories) - France | André Ochoa | a.ochoa@ors-aquitaine.org | 2007 HI | ISARE Health inequalities indicators in the region of Europe | The development of health profiles for each region of the EU member states (candidate member states as soon as possible) and the elaboration of a typology of geographic areas both at regional and infra regional level | http://www.isare.eu/ | |
| 2007333 | PHIS - Pharmaceutical Health information Systems | GÖGÖBIRG - Gesundheits Oesterreich GmbH Österreichisches Bundesinstitut fuer Gesundheit - Austria | Michaela Moritz | moritz@coebga.at | 2007 HI | PHIS - Pharmaceutical Health information Systems | The PHIS project aims to increase the level of knowledge and exchange of information on pharmaceutical policies in the European Union. This will be achieved by surveying and monitoring pharmaceutical health system information in the inpatient and outpatient sector from a public health perspective and by developing key pharmaceutical health indicators to be included in a European Health Information System. | http://phis.goeg.at/ | |
| 2007334 | ANEMOS - Expansion and update of existing nutrition monitoring systems | HFH - Hellenic Health Foundation - Greece | Antonia Tridhopoulou | atridhopoulou@hfh.greece.gr | 2007 HI | ANEMOS - Expansion and update of existing nutrition monitoring systems | Expansion and update of the DAFNE database which is a lasting nutrition monitoring system. To better employ the ANEMOS database, the results will be integrated in the DAFNE application tool, which will also be made available on the website of the ANEMOS Coordinating Centre. | www.hfh-greece.gr | |
| 2007115 | EUBIROD - European best information regional outcomes in diabetes | Università degli Studi di Perugia - Italy | Massimo Massi Benedetti | massi@unipg.it | 2007 HI | EUBIROD - European best information regional outcomes in diabetes | EUBIROD aims to implement a sustainable European Diabetes Register through the coordination of existing national/regional frameworks and the systematic use of the BIR0 technology. EUBIROD targets the sustainability of complex systems of health indicators requiring continuous update and regular maintenance | http://www.eubirod.eu/deliverables.htm | |
| 2007106 | AMIEHS Avoidable mortality in the European Union: towards better indicators for the effectiveness of health systems | Erasmus Universiteit Medisch Centrum Netherlands | Johan P. Mackenbach | j.mackenbach@erasmusmc.nl | 2007 HI | AMIEHS - Avoidable mortality in the European Union: towards better indicators for the effectiveness of health systems | The project seeks to develop an agreed definition of avoidable mortality for Europe, and to derive a set of validated avoidable mortality-based indicators of the effectiveness of health systems, which can be used in the routine surveillance of the performance of health systems in Europe. | www.erasmusmc.nl/ | |
| 2007110 | Reproductive Health Report - the State of Reproductive Health and Fertility in the European Union | Associação para Investigação e Desenvolvimento da Faculdade de Medicina de Lisboa - Portugal | Miguel Oliveira da Silva | mos@fm.ulp.pt | 2007 HI | Reproductive Health Report - the State of Reproductive Health and Fertility in the European Union | The project will provide evidence-based and up-to-date knowledge of the SRH (State of Reproductive Health) situation in the EU in order to inform and develop policies at EU level that, taking local and national specificities into account, will overcome several of the existing SRH inequalities. | | |
| 2007114 | EURO-PERISTAT III - Better Statistics for Pregnant Women and Their Babies: European Health Reports | Assistance Publique - Hôpitaux de Paris - France | Gerard Breat | breat@cochin.inserm.fr | 2007 HI | EURO-PERISTAT III - Better Statistics for Pregnant Women and Their Babies: European Health Reports | The project seeks to produce and disseminate a European Perinatal Health Report based on data collected in 2006 in all EU countries which includes policy-relevant analyses of maternal and child health outcomes, care provision, inequalities and migrant health. The project will also develop an Action Plan for Sustainable Perinatal Health Reporting with recommendations about the mission, structure, operation and partners of an information network. Partnership with other EU funded projects will be reinforced. | http://www.europeristat.com/publications/european-perinatal-health-report.shtml | |
| 2007121 | EUROCHIP-III "Common Actions" | Fondazione IRCCS "Istituto Nazionale dei Tumori" | Andrea Micheli | andrea.micheli@istitutotumori.mi.it | 2007 HI | EUROCHIP-III "Common Actions" | EUROCHIP3 is a multidisciplinary 3-year common-action project involving all EU Member States (MS) to remedy major inequalities in cancer and to form the pillars of an EU cancer control strategy. The cancer inequalities addressed were identified by EUROCHIP2. EUROCHIP3 will work offering economies of scale and solidarity-based initiatives. WP5 is to promote collection of cancer registration indicators. | www.istitutotumori.mi.it | |

| 2003203 | ENTERNET - Dedicated surveillance network for enteric pathogens: Salmonella, E. Coli and Campylobacter | Health Protection Agency - United Kingdom now in the responsibility of ECDC | William REILLY ECDC contact: Justin Denny | Bill.reilly@scieh.csa.sco.nhs.uk justin.denny@ecdc.europa.eu | 2003 | HT | ENTERNET - Dedicated surveillance network for enteric pathogens- Salmonella, E. Coli and Campylobacter | The coordination of surveillance activities for EU food and waterborne diseases are now the responsibility of ECDC in Stockholm. ECDC is in the process of working with Member States to further refine a list of core and enhanced variables for each of these diseases to ensure added value for all participating countries. Surveillance of food and water-borne diseases cover Campylobacteriosis, VTEC, Salmonellosis, Shigellosis, Listeriosis, Yersiniosis, Echinococcosis, Brucellosis, Hepatitis A, variant Creutzfeldt-Jakob's Disease (vCJD), Trichinosis, Botulism, and Cholera. Currently information measured at the international level varies by disease and includes number of cases, classification of cases (possible / probably / confirmed), country, date, gender, age, travel history and antibiotic resistance antigen (if appropriate). | http://ec.europa.eu/health/ph_projects/2003/action2/action2_2_003_20_en.htm#4 | http://ec.europa.eu/health/ph_projects/2003/action2/action2_2_003_20_en.htm#4 |
| 2003211 | ESAC - European Surveillance of Antimicrobial Consumption | Universiteit Antwerpen - Belgium | Goossens HERMAN | Herman.goossens@uza.be | 2003 | HT | ESAC - European Surveillance of Antimicrobial Consumption: quality indicator for outpatient antibiotic use in Europe | In the context of increasing antimicrobial resistance, we aimed to develop valid drug-specific quality indicators for outpatient antibiotic use in Europe, derived from European Surveillance of Antimicrobial Consumption (ESAC) data. 12 of the 22 proposed ESAC-based quality indicators for outpatient antibiotic use in Europe have face validity and are potentially applicable. These indicators could be used to better describe antibiotic use in ambulatory care and assess the quality of national antibiotic prescribing patterns in Europe. | www.esac.uva.ac.be | Coenen S, Ferech M, Haaijer-Ruskamp FM, Butler CC, Vander Stichele RH, Verheij TJM, Monnet DL, Little P, Goossens H, the ESAC Project Group. European Surveillance of Antimicrobial Consumption (ESAC): quality indicators for outpatient antibiotic use in Europe. <i>Qual Saf Health Care</i> 2007;16:440-445. |
| 2004205 | EUVAC.NET: A dedicated surveillance network for vaccine preventable infectious diseases (SSI) | Statens Serum Institut - Denmark | Mark MUSCAT | mme@ssi.dk | 2004 | HT | EUVAC.NET - A dedicated surveillance network for vaccine preventable infectious diseases | EUVAC.NET is a surveillance project for selected vaccine-preventable diseases in participating European countries. EUVAC.NET plays an important role in fulfilling the key strategy of measles surveillance necessary for the measles elimination plan by 2010. The EUVAC.NET website (www.euvacnet.org) provides surveillance reports, national plans of action for measles/rubella elimination and regularly updated national childhood vaccination schedules. It also provides a forum for outbreak notification to its members. | www.euvac.net | http://www.euvac.net/graphics/euvacbypublication/other.htm |
| 2004206 | ENIVD - Improving the diagnosis and monitoring of encephalitis viruses in Europe with the support of the European Network for diagnostics of imported viral diseases | Robert Koch Institut - Germany | Mathias NIEDRIG | NiedrigM@rki.de | 2004 | HT | ENIVD - Improving the diagnosis and monitoring of encephalitis viruses in Europe with the support of the European Network for diagnostics of imported viral diseases | Part of the project is to organise a sentinel evaluation on the quality of viral encephalitis diagnostics and registration in Europe. In general the network improves the quality of diagnostic of rare and "imported" viral diseases in Europe which is a prerequisite for imported diseases as health indicator. | www.enivd.org | http://www.enivd.org/ |
| 2004213 | EUROTb - Surveillance of tuberculosis in Europe | Institut de veille sanitaire - France | Jean-Claude DESENCLOS | jc.desenclos@mvs.santef.fr | 2004 | HT | EUROTb - Surveillance of tuberculosis in Europe | Since 1996, EuroTb has coordinated the surveillance of tuberculosis (TB) in the 53 countries of the WHO European Region. Its mission statement is "to improve the contribution of surveillance to TB control in European Region". The project is mainly funded by the DG-SANCO of the European Commission and the French Institute for Public Health Surveillance (Institut de veille sanitaire) until the end of 2007, following which the surveillance of TB in European Region will be jointly performed by the European Centre for Disease Prevention and Control based in Sweden and WHO/EURO in Denmark. | http://www.eurotb.org | http://www.eurotb.org/ |
| 2006203 | Integrated Decision Support System for Health Threats and crisis management | Azienda Sanitaria Locale di Brescia | Carmelo Scarcella | dirpen@asbrescia.it | 2006 | HT | Integrated Decision Support System for Health Threats and Crisis Management | The most important verifiable and quantifiable indicators that will be used to assess the level of success of the project and of achievement of the envisaged objectives have to do mainly with the assessment of the level of re-engineering of the communication and working procedures and of the performance of the developed ITDSS. We will develop two main evaluation models: one for the assessment of PDT and one for the assessment of the Healththreats Project as a whole. With the first model we will assess our Decision Support System from two viewpoints: according to its own features and characteristics, and in comparison with other systems presented in the proposal. The indicators will be both quantitative and qualitative, depending on their nature, measurability and availability. | www.healththreats.eu | http://www.healththreats.eu/documents.html |
| 2006211 | European Living Donation and Public Health | Hospital Clinic Provincial Barcelona | Mari Manyalich | maricat@clinicub.es | 2006 | HT | European Living Donation and Public Health | The project aims to create a consensus on European common standards regarding legal, ethical, protection and registration practices in relation to organ living donors in order to guarantee these donors health and safety. One of the specific objectives is to establish and validate an e-registry database model on organ living donors data that allows having a common European database registry and common national registries on the issue. The project is still running. If indicators will be developed this can be seen on the website www.episouth.de | http://www.eu.livingdonor.eu | http://www.episouth.org/relevant_documents.html |

| 2003107 | HA - Healthy Ageing | FHI (National Institute of Public Health) - Sweden | Elisabet Olofsson | elisabet.olofsson@hi.se | 2003 | HD | Healthy Ageing | Indicators (in the project named 'major topics') – a background: The Healthy Ageing project has a holistic approach and takes into account health determinants influenced both by society and its policies as well as the individual. The project partners have agreed to focus on ten major topics. Most are broad and interact with each other. Social capital Mental Health Environment Nutrition Physical Activity Injury Prevention Substance use/misuse (tobacco and alcohol) Use of medication and associated problems Preventive Health Services | www.healthysageing.nu | Further information on health indicators: http://www.healthysageing.nu/templates/Page.aspx?id=1226 |
| 2003317 | EAAD - European Alliance Against Depression | Ludwig Maximilians Universität München - Germany | Ulrich HEGERL | krausem@medizin.uni-leipzig.de | 2003 | HD | EAAD - European Alliance Against Depression | The EAAD is a multilevel, community-based awareness programme to improve the care of depressed patients and prevent suicidality in Europe. The basic concept of the EAAD is a 4-level approach targeting (1) co-operation with general practitioners and paediatricians, (2) public awareness campaign and co-operation with local media, (3) training sessions for multipliers, and (4) offers for high risk groups and self-help activities. The approach was evaluated in Nuremberg (Germany) and proved to be effective in reducing suicidality (-24%) evaluated in Nuremberg (Germany) and proved to be effective in reducing suicidality (-24%) and in improving the care of depressed patients (Hegerl et al., 2006). | http://www.eaad.net | http://www.eaad.net/en/evaluation-within-eaad-1.php |
| 2004307 | CORRELATION - European network on health and social inclusion | AMOC - Stichting Amsterdam's Centrum voor hulpverlening aan buitenlanders - The Netherlands | Eberhard SCHATZ | eschatz@amoc.demon.nl | 2004 | HD | Correlation - European Network social inclusion and health | The expert group working on a data report system aim to develop a European standardised annual reporting protocol for low-threshold harm reduction services (incl. technical manual and glossary), which allows the collection of reliable and comparable data on service delivery and on the structure of the agencies. A first evaluation of the pilot implementation will be prepared. | www.correlation-net.org | http://www.correlation-net.org/index.php?option=com_content&view=article&id=22&Itemid=30 |
| 2004314 | EUROSUPPORT V - Improving the sexual and reproductive health of persons living with HIV in Europe | ITM - Prince Leopold Institute Of Tropical Medicine - Belgium | Robert COLEBRUNDERS | broleab@itg.be | 2004 | HD | Eurosupport V - Improving sexual and reproductive health of persons living with HIV/AIDS (PLWHA) | The project has developed tools (such as a self-reported survey instrument) to assess sexual risk behavior (types of sexual activity), protection behavior (condom use) and other variables related to sex (such as number of children since HIV diagnosis, number of pregnancies, desire to have children, contraceptive use, termination of pregnancy). In addition the project has developed qualitative criteria to assess services in an integrated field of SRH and HIV. These criteria are based on qualitative research with PLWHA and service provider, which was carried out as the first step in the Eurosupport V project. The criteria have been assessed within a convenience sample of field organization throughout the participating countries. | http://www.sensoa.be/eurosupportpublications.htm | |
| 2004326 | Promotion of breastfeeding in Europe: pilot testing the Blueprint for action | IRCCS Burlo Garofalo - Italy | Adriano CATTANEO | cattaneo@burlo.trestate.it | 2004 | HD | Promotion of breastfeeding in Europe: pilot testing the Blueprint for action | "Promotion of Breastfeeding" in Europe is the predecessor project of "Promotion of breastfeeding in Europe: pilot testing the Blueprint for Action". A blueprint of action has been developed in the first project which gives recommendations on breastfeeding indicators (section on monitoring), including ECHI-2 indicators. The current project is revising the blueprint. | http://www.burlo.trestate.it/MI_Ide=5M_Type=LEV2 | |
| 2005320 | European Network of Quilines (ENO) Develop. research & network activities on cessation, quitting & internet strategies | QUIT - United Kingdom | Katherine Eddy or Steve Crown | keddy@quit.org.uk | 2005 | HD | European Network of Quilines | The European Network of Quilines (ENO) was first established in 2000 with the aims of improving public health in Europe by enhancing the knowledge and skills within Quilines and their services through the development, dissemination and sharing of best practice among European Quilines. The network was initially founded with 6 members but has since grown to incorporate 29 member Quilines. | www.enonline.org | http://www.enonline.org/publications/index.php |
| 2005328 | PANACEA - Physical activity, Nutrition, Alcohol, Cessation of Smoking, Eating out of home And obesity | Universiteit Medisch Centrum Utrecht - The Netherlands | Petra PEETERS Anne May (contact) | p.m.peeters@umcutrecht.nl amay@umcutrecht.nl | 2005 | HD | PANACEA - Physical activity, Nutrition, Alcohol, Cessation of smoking, Eating out of home And obesity | The general objective of this project is to identify and describe the determinants of weight and weight changes in Europe. Our determinants of interest are physical activity, nutrition, alcohol, cessation of smoking and eating out of home. | http://www.rub.nl/nl/nh.gov/pub/nv/19223851 | |
| 2006307 | Development and implementation of a European Guideline and training standards for Diabetes Prevention (IMAGE) | Technische Universität Dresden | Peter Schwarz | peter.schwarz@uniklinikum-dresden.de | 2006 | HD | IMAGE - Development and implementation of a European Guideline and Training Standards for Diabetes Prevention | Within the WPG, European-wide accepted and applicable indicators for quality control and evaluation of type 2 diabetes prevention programmes will be developed. These will include: - indicators to measure the efficacy of the individual success - indicators to measure the efficacy of the prevention programme - indicators to measure the sustainability of effects - indicators to measure the cost efficiency of the prevention programme | www.image-project.eu | http://www.image-project.eu/download.aspx |
| 2006315 | Innovation of dietary and activity assessment methods in epidemiological studies and public health | German Institut of Human Nutrition, Potsdam-Rehbrücke | Heiner Boeing | boeing@mail.dife.de | 2006 | HD | IDAMES - Innovation of Dietary Assessment Methods for Epidemiological Studies and Public Health | The overall aim of IDAMES is to deliver standard operating procedures (SOP's) for a new and innovative dietary assessment method. It is expected that the new generation method will be applied in existing and upcoming large scale epidemiological studies as well as public health settings in order to generate the basis for knowledge within the area of diet and risk of chronic diseases. The major outcome of IDAMES can be seen in the practically proven guideline to conduct dietary assessment in large-scale epidemiological studies. | http://www.difames.eu | |

| 2006320 | Quantification of sun exposure in Europe and of its effects on health | International Agency for Research on Cancer | Peter Boyle | director@iarc.fr | 2006 | HD | Eurosun - Quantification of sun exposure in Europe and of its effects on health | Eurosun aims to monitor ultraviolet exposure in the European Union and its effects on the incidence of skin cancers and cataracts by relating regional levels of exposure to solar ultraviolet radiation and disease risks throughout Europe. UV exposure will be calculated from meteorological satellite data and by reconstructing past individual exposure of the past 10 years in random population samples from each Member State. The project will provide indicators of UV exposure and predict the global burden of UV-related diseases in the European Union in future years. | |
| 2007312 | EMTOC - Electronic Model Tobacco Control | RIVM (National Institute for Public Health and the Environment) - the Netherlands | Jan van Amsterdam | JGC.van.Amsterdam@rivm.nl | 2007 | HD | EMTOC - Electronic Model Tobacco Control | The overall objective is to promote the control and reduce the adverse health risk of tobacco products marketed in the EU and to reduce the prevalence of smoking in the EU. EMTOC will create an electronic web-based data submission facility (data submission system) for tobacco ingredients based on a harmonised reporting system. All EMTOC partners will implement the system (which is intended to be used by all MS). Following the realisation of the EMTOC system, the databank of the system will be used to analyse data at national and EU-level. In a subsequent step the non-confidential data for tobacco ingredients will be disseminated to the public and NGOs. | www.rivm.nl |
| 2007313 | IMPASHS - Evaluation of the impact of smoke-free policies in Member States on exposure to second-hand smoke and tobacco consumption | Agència de Salut Pública de Barcelona - Spain | Néstor Adell Manel | manel@aspb.es | 2007 | HD | IMPASHS - Evaluation of the impact of smoke-free policies in Member States on exposure to second-hand smoke and tobacco consumption | The project aims at analyzing the existing policies on second-hand smoke (SHS) control in European countries and their impact on SHS exposure and tobacco consumption, and to develop a system of indicators to evaluate and monitor them. This project will provide technical reports and guidelines to evaluate smoke free policies, which will be of particular interest to those many countries that are currently developing or considering the implementation of these policies. | http://www.hibernia.ie.com/impashs/ |
| 2007314 | FASE - Focus on Alcohol Sale Environment | Stichting Alcohol Preventie (National Foundation for Alcohol Prevention) - the Netherlands | Willem Egbert van Dalen | w.vandalen@step.nl | 2007 | HD | FASE - Focus on Alcohol Sale Environment | The FASE project aims at reducing the impact of harmful and hazardous alcohol consumption on the economy. The project will publish reports on the evidence and guidance for action and a database and inventory of examples of good practice, infrastructure, and relevant laws. | http://www.faseproject.eu/www.faseproject.eu/about-faseproject-description.html |
| 2007319 | ETASC - Expert Toxicological Assessment of Smoke Constituents | RIVM (National Institute for Public Health and the Environment) - the Netherlands | Reinske Talhout | reinske.talhout@planet.nl | 2007 | HD | ETASC - Expert Toxicological Assessment of Smoke Constituents | After the project is finished, an up-to-date and prioritised list of hazardous smoke components, together with the criteria on which the list is based, will be available. This updated list provides a scientific basis for the progressive reduction of the level of toxic chemicals in tobacco product ingredients and emissions, through the periodic setting of standards. | www.rivm.nl |
| 2007326 | TEND by Night (Dark, Dance, Disco, Dose, Drugs, Drive, Danger, Damage, Disability, Death) | Consepti S.p.a - Italy | Claudio Bonansea | guidasicoura@consepti.it | 2007 | HD | TEND by Night (Dark, Dance, Disco, Dose, Drugs, Drive, Danger, Damage, Disability, Death) | The project proposes a prevention programme aimed at increasing young people's awareness of driving under the influence of drugs or alcohol. The strategic aim of TEND is to define a European approach for reducing the number and seriousness of road accidents, in particular the ones in which young people are involved, that occur during weekends and can be correlated with the consumption of alcohol and psychoactive substances. It will also deliver reliable scientific data on consumption among the young who attend recreational places and its relationship with road accidents. | http://www.tendbynight.eu/ressauec.html |
| 2007324 | PRO GREENS: Promotion of vegetable and fruit consumption of school children | Instituto de Salud Pública Spain | Agneta Yngve | simon.aquirre@salud.madrid.org | 2007 | HD | PRO GREENS: Promotion of vegetable and fruit consumption of school children | The project is to assess the level of consumption of fruit and vegetables in school children and their parents and to develop effective strategies to promote adequate consumption levels among school children. | http://www.progreens.org/ |
| 2007316 | HESENT - Interventions on Health Effects of Health Environment | Università degli Studi di Siena - Italy | Pierante Sestini | sestini@unisi.it | 2007 | HD | HESENT - Interventions on Health Effects of Health Environment | The project seeks to perform an extensive survey of environmental and questionnaire data on schools in five European centres, known to have a variety of environmental problems from a previous survey. The intervention seeks to increase knowledge about indoor air quality and children's asthma and to promote the adoption of an asthma friendly environment. | http://www.unisi.it/rivm/med/zooms.html |
| 2007325 | POL-MARK Assessment of Policy options for MARKeting food and beverages to children | International Association for the Study of Obesity - United Kingdom | Tim Lobstein | tlobstein@iaso.org | 2007 | HD | POL-MARK Assessment of Policy options for MARKeting food and beverages to children | The general objective of the project is to improve understanding of the influences on children's dietary choices, to contribute to improving the nutritional status of children in Europe and to counteract the challenge of obesity and non-communicable disease. The project works with key stakeholders | http://polmarkproject.net/PolMark-countryreports.htm |
