

#EUHPP LIVE WEBINAR

Monitoring heat impacts on health in Europe

29 NOVEMBER 2024, 10.00–11.00 CET, BRUSSELS TIME

Dear colleague,

We invite you to join this #EUHPP Live Webinar.

Under the changing climate, **high temperatures increasingly affect our health and wellbeing**. Developed under the European Climate and Health Observatory initiative, the new European Environment Agency briefing '**Monitoring heat impacts on health in Europe**' explores to what extent deaths and illnesses related to heat are monitored and addressed through heat-health action plans in European countries.

This webinar, organised jointly by the European Commission and the European Environment Agency, will provide you with the briefing's **key findings**, and with **insights into related science, policy and practice responses and developments** from the expert panel. You will also have the opportunity to **discuss** ways of minimising heat-related health threats through better surveillance and adaptive actions in health sector and other policy areas.

Register to this webinar following [this link](#).

Once registered, you will receive the calendar invitation from Webex. Please pin it in your calendar and go back to it on the webinar day.

This webinar will be held in English.

If you have any further questions, please contact sante-hpp@ec.europa.eu

We are looking forward to welcoming you online.
