

dear mister, misses,

Regarding this template , it is not clear to me what the EU understands by :

a) a confirmation number?

If the authorities in China have to keep a sequential nr for each confirmation they make, this will not be easy to obtain.

I also donot see the reason for this number.

It is more logical to archive the statements according to company and then API.

b)what is meant page 2 of the draft with "inter alia" ,this is latin for "not restricted to" so what else is than expected?

sothat we donot have to make twice a communication to our suppliers
