Europe's Beating Cancer Plan

Diagnosis and treatment

Start date – end date

01/12/2023 – 30/11/2026

Countries

Austria, Belgium, Bulgaria,
Estonia, Finland, France,
Germany, Ireland, Italy,
Lithuania, Luxembourg, Portugal,
Romania, Spain, Ukraine

Overall budget

EUR 8 749 950

EU contribution under EU4Health programme

EUR 6 999 960

INTERACT EUROPE 100 - Implementing inter-specialty cancer training in 100 centres across Europe

The EU is pioneering a brand-new approach to inter-specialty cancer training via the INTERACT-EUROPE 100 programme. Underpinning structures for high performance multi-disciplinary team working in cancer care, the programme offers a comprehensive curriculum of learning that will be implemented in 100 cancer centres around Europe.

In Europe, the journey of cancer patients involves a diverse range of dedicated professionals, including medical oncologists, radiation oncologists, surgical oncologists, cancer nurses, and more. At the heart of this effort is a commitment to prioritise the well-being of every patient, aligning with the fundamental principle of the European Code of Cancer Practice.

Recognising that effective cancer care demands seamless teamwork, INTERACT-EUROPE 100 embarks on **providing an Inter-specialty Cancer Training (ISCT) across 100 cancer centres in Europe**. The project builds upon the success of INTERACT-EUROPE, utilising its developed curriculum as a foundation while introducing two pivotal new modules: paediatric oncology and specific needs for displaced people with cancer, with a special focus on Ukraine.

At its core, INTERACT-EUROPE 100 is driven by a steadfast objective: to **elevate cancer care by fostering stronger collaboration among its providers**. Rooted in the INTERACT-EUROPE vision of breaking down medical silos, this initiative equips professionals from various specialties with the skills needed for more effective collaboration. By doing so, the project aims to deliver the best possible outcomes for patients, aligning seamlessly with the principles laid out in the European Code of Cancer Practice.

Expected results include:

- Inter-specialty cancer training (ISCT) programme developed under INTERACT-EUROPE scaled to 100 cancer centres across Europe
- A long-term template for inter-specialty cancer training that any EU country may access and benefit from
- A digital learning management system adapted to the needs of oncology professionals
