Global Health Policy Forum

Brussels, 13 October 2010

Memining our COORDINATION

Fondation Mérieux

Des racines pour la vie

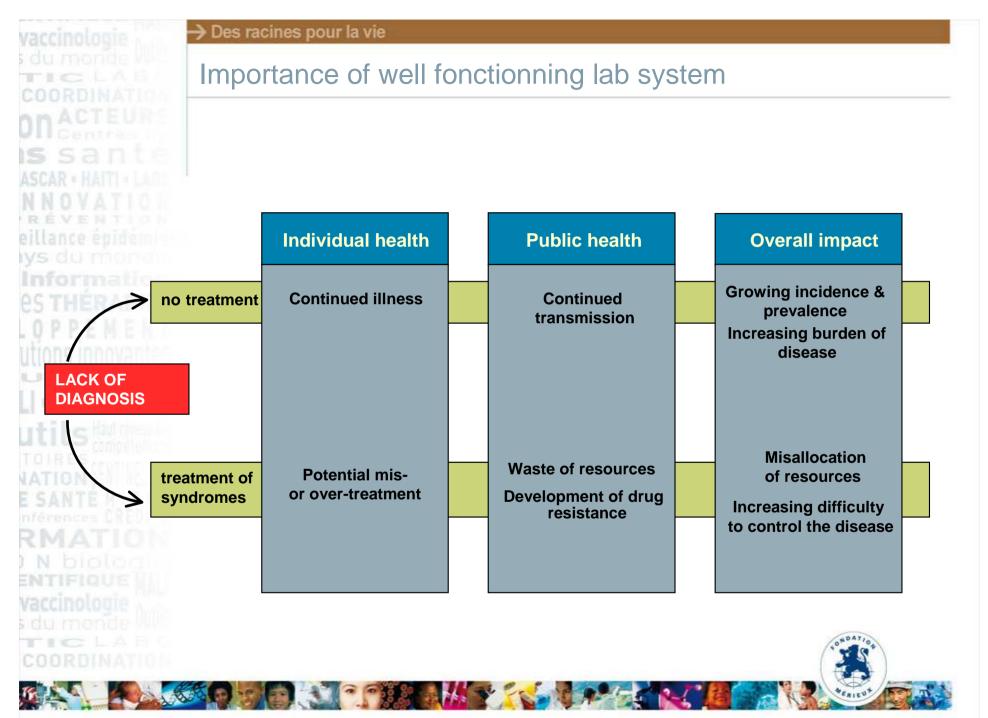

- Independent family foundation with official charity status
- Its mission is to **strengthen local capacities** in developing countries to reduce the impact of infectious diseases on vulnerable population
- 4 types of activity: strengthening of health infrastructures, applied research programs, training and exchange of knowledge, mother & child support
- Budget: around 14 million €/year
- Fondation Mérieux funds sometimes submitted projects, but
 most of our activities are to set up in partnerships research
 and capacity building projects in LIC
- Fondation Mérieux works with an international network of experts, respecting the **local context and needs**

Fondation Mérieux in Mali

COORDINATION

- Since 2004, in close collaboration with the government:
- Centre Charles Mérieux Bamako
 - Biomedical Laboratory
 - Training and Conference Centre
 - Centre for applied research
- Aims to strengthen in partnership biomedical laboratories all over the country and in the region

Field action: Mali

- Life expectancy at birth: 46 years
- U5 Mortality rate 217 (per 1000 live births)
- HIV prevalence among pregnant women 15-24: 6,4%
- TB prevalence: 599 (per 100 000)
- Diagnostic of malaria done in only 30% of cases
- Total expenditure on health: 6% of GDP
- Global Fund makes treatment available
- PRODESS Health and Social Development Program
- National Strategy Plan for Health System Strengthening (2009)
- National Policy of Human Resource Development in Health (2009)
 - IHP member (since 2007)

Des racines pour la vie

The situation

- Not enough laboratory professionals
- Those in place insufficiently trained
- Bad infrastructures and lack of (harmonized) equipment and reagents
- No harmonized procedures and quality assurance in place
- No network of laboratories in place for exchange of good practice and surveillance of infectious diseases
- Laboratory data not taken into account for epidemiology and disease surveillance
- Unreliable results
- No trust by patients and doctors...

The project ACTION BIOMALI

Commission européenne

EuropeAid/117571/C/G/Multi

Aide à la lutte contre les maladies liées à la pauvreté (VIH/SIDA, paludisme, tuberculose) dans les pays en développement

Formulaire de demande de subvention

Ligne budgétaire 21.020702 (ex.B7-6311)

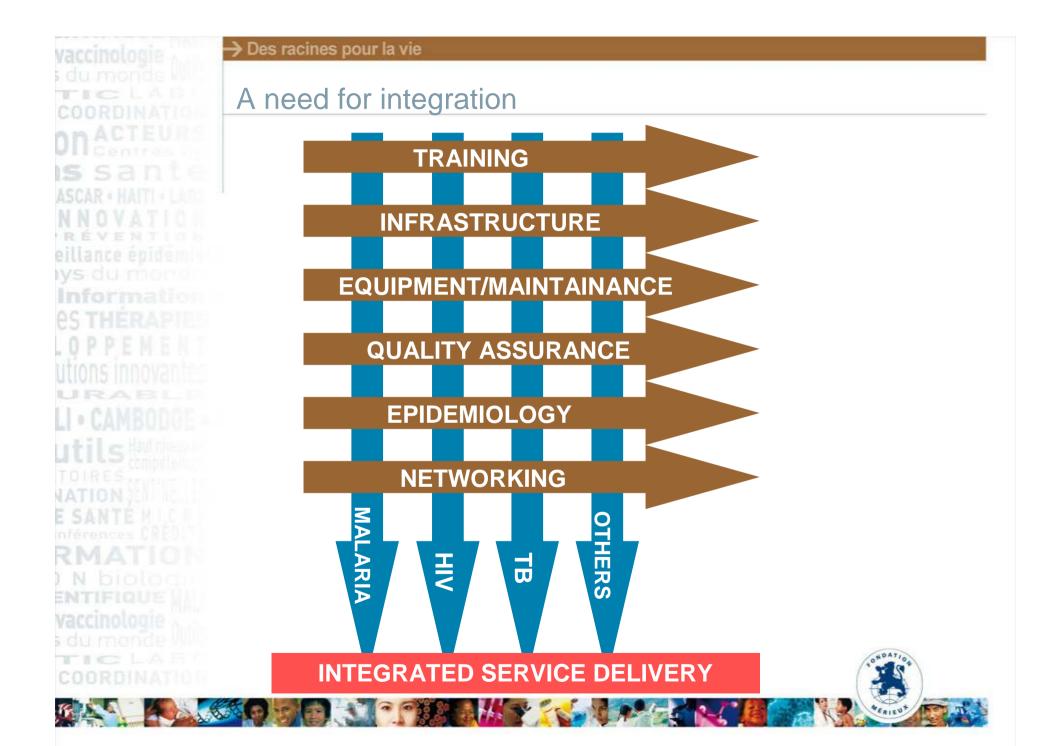

- Budget: 4 million € (90% EC, 10% Fondation Mérieux)
- Duration: 4 ¹/₂ years
- Implementing agency: Fondation Mérieux, via Centre Charles Mérieux Bamako
- Active partner: Ministry of Health of Mali
- Project follow-up by the EC Delegation in Mali

The project ACTION BIOMALI

Objective:

Contribute to a better patient care by strengthening laboratory capacities all over the territory of Mali and bordering countries (integrated approach with focus on: HIV/AIDS, TB, malaria and other infectious diseases)

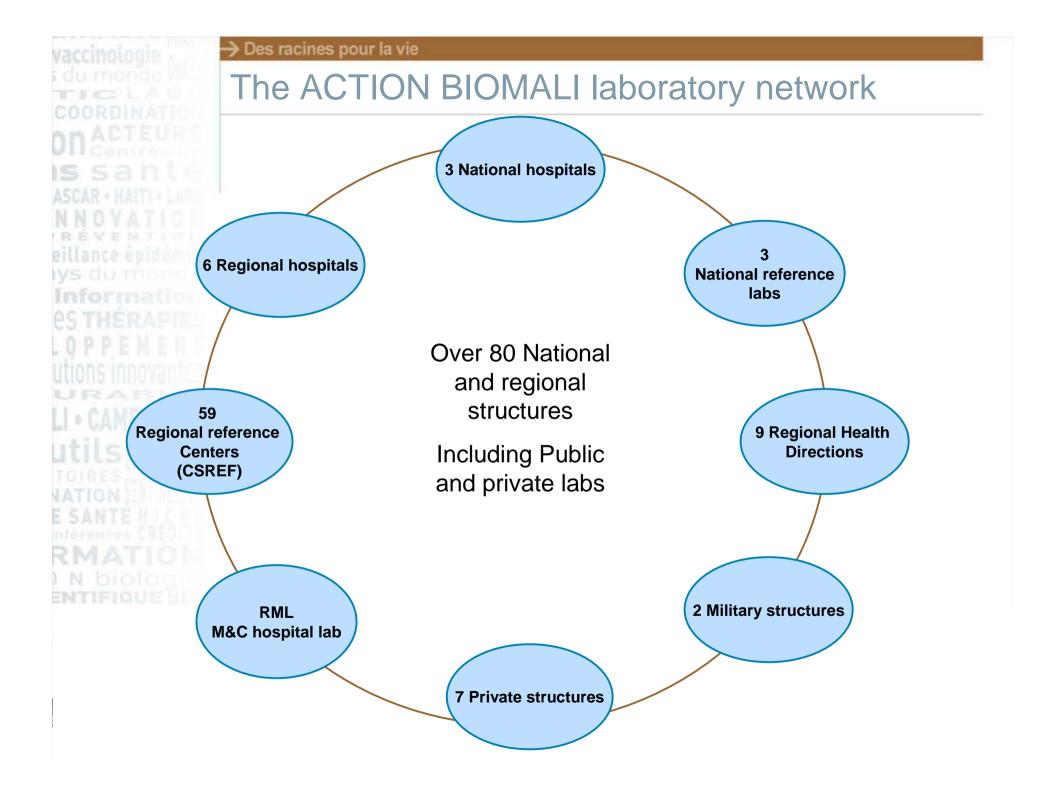

The Malien lead – a *must* for appropriation and sustainability

Steering Committee composed by:

- → Project Coordinator (CCMB)
- → Scientific Coordinator (CCMB)
- → Local project Manager (CCMB)
- → Director of Laboratory Department at the MoH, *Chair*
- Director of the National Institute of Public Health Research (Director of the Laboratory Network)
- Directors of the vertical programs (HIV/AIDS, TB, Malaria)

Results: Structural support to the system (Needs)

- Detailed analysis and needs assessment of • over 60 laboratories in terms of:
 - Human resources and continuous education
 - Infrastructure
 - Equipment and consumables
 - **Biosafety**
 - Organisational needs

•

- Costs

procedures:

Strategy

- Implementation
- Procedures
- National rules on standardized laboratory procedures

Results : Labs are better equipped

COORDINATION

- 77 laboratories are better equipped with standardized material, reagents and consumables for ~1,5 m Euros
- Tenders organised in coordination with vertical programs
- Stock management in place
- Central ordering of consumables
- Training on maintenance of material provided
- 20 labs are equipped with computer and Internet access

Results : Personnel is better trained

- 278 health professionals received continuous education (diagnostic procedures and techniques, quality assurance, maintenance)
- 44 health superior laboratory technicians (from Mali and neighbouring countries) trained in the framework of a 6 months Bachelor degree at CCMB
- 140 lab technicians received practical on-thejob training
- National coverage respected

Results : Basis for quality assurance in place

- External quality control unit built
- Procedures and standards defined
- All national labs of the network apply harmonized SOP
- National quality manager trained at WHO Lyon
- Supervisions organised and will be implemented through the RESAOLAB project that sustains ACTION BIOMALI

Results: Labs communicate for better surveillance

COORDINATION

- Harmonized grid for epidemiology and surveillance based on lab data
- Data are transmitted regularly by over 70 labs
- 20 labs transmit data electronically after training on computer and Internet use
- Data control in place
- E-learning planed via GLOBE portal

Results: Communication to beneficiaries

Ensemble, gagnons contre la maladie !

Pour dissiper tout doute sur la maladie, une seule destination : le laboratoire d'analyses biomédicales

> Ka siga bo bana na pewu, fo banasegesegeyoro

National communication campaign organised by the Ministry of Health

Including 50 counselling services

Outcome

- Annual attendance of laboratories in the regions and the district of Bamako has doubled at the end of the project
- Increase of over 30% of the diagnosis of HIV, TB, malaria
- Link with national programs and Global Fund for effective treatment and care

http://www.fondation-merieux.org/action-biomalisignificant-results.html#video

Sustainability

- Project extended to 2 neighbouring countries (Burkina Faso and Senegal) in the framework of the RESAOLAB project (Réseau Afrique de l'Ouest de Laboratoires)
- Supported by the French Development Agency AFD and Fondation Mérieux
- WHO and WAHO are actively involved
- Other countries from West Africa expressed interest
- Work on innovative laboratory financing
- Mali, Burkina Faso and Senegal increased budget for lab strengthening

Conclusion - 1

•

- **MDGs** will not be achieved in LIC without accessible and reliable laboratory systems
- Accessibility of laboratory testing and the quality of available services remain a serious challenge
 - High quality laboratory testing is vital for :
 - effective patient care (including resistances),
 - prevention,
 - disease surveillance,
 - outbreak investigations
- Absolutely necessary for the implementation of the International Health Regulations (IHR)
- Quality Lab services necessary for the fight against communicable and **non-communicable diseases**
 - Laboratory systems have to be strengthened as part of **Health System Strengthening** (HSS) efforts

Conclusion - 2

- For Mali and neighbouring countries health is not a priority in the CSP → need for project support
- Project support have proved to be efficient and can be sustainable
- Projects can be focused on the needs of the population
- Projects can involve actively Ministries and local actors
- European NGOs can efficiently manage projects and are accountable
- Visibility for EU is assured

Thank you!
