>

> Hello,

> The Polish Diabetes Association has an idea for a contribution.

> In Poland often there is no access to first-rate medications due to

> chronic lack of money. However, more and more generics are introduced.

> Yet, people are not aware that these are also very good medications.

> They often believe that generics are somehow ineffective and that they

> are not real medications. Therefore, we think it is crucial that the

> existence, usage and effectiveness of generics should be underscored

> (and spread by the media).

> Regards,

> Andrzej Bauman

> President of the Polish Diabetes Association
