Commission Guidelines on Good Distribution Practice of Medicinal Products for Human Use

On behalf of the Hospital Pharmacies in Denmark, we would like to state the following comments on the draft:

Concerning article 5.29 Picking

To ensure, that the correct product is picked, the batch number should always be recorded, and not only where required.

Suspected falsified Medicinal Products (article 6.13-6.15)

To avoid any falsified Medicinal Product, all wholesalers should use and detect 2D barcodes on all products. The 2D barcode should contain informations about a unique serial number, which can't be mixed with another product.
