Vaccine confidence factsheet 2020

Rank (public) 7th

Rank (GPs) 1st

**1000 surveyed (public)
13 – 27 Mar**

**100 surveyed (GPs)
23 – 26 Mar**

Ranking defined as the % of respondents agreeing that vaccines are important, safe, effective, compatible with religious beliefs, and that the MMR, seasonal influenza, and HPV vaccines are safe and important.

Data collected through the CPME survey is not reported in this factsheet. GP data was not collected for Cyprus, Luxembourg, or Malta

Public confidence: Italy v. EU+UK average

Italy: confidence among GPs

Summary of likelihood to recommend MMR, flu, and HPV vaccines

- 98.0% would recommend the MMR vaccine to patients**
- 100.0% would recommend the flu vaccine to patients**
- 86.0% would recommend the flu vaccine to pregnant women**
- 100.0% would recommend the HPV vaccine**

Changes since 2018 not reported as samples are not representative across the profession with respect to sex and age, thus prohibiting a temporal comparison.

GP confidence: Italy v. EU+UK average
