## Summary text

Austrian respondents seem to have more energy than other Europeans, with more Austrian respondents having 'lots of energy' 'all' or 'most of the time' (59% vs. EU average of 51%) and fewer 'feeling tired' 'all' or 'most of the time' (16% vs. EU average of 20%). Although contrary to this, more Austrian respondents 'sometimes' feel 'worn out' than average (48% vs. EU average of 39%). Austrian respondents are experiencing feeling 'happy' less than other Europeans, with 55% feeling 'happy' 'all' or 'most of the time' compared to the EU average of 61%. Furthermore, more Austrian respondents 'sometimes' felt 'down in the dumps' than average (27% vs. EU average of 19%). However, on a positive note, fewer felt they had 'sometimes' felt 'downhearted and depressed' than average (18% vs. EU average of 25%).

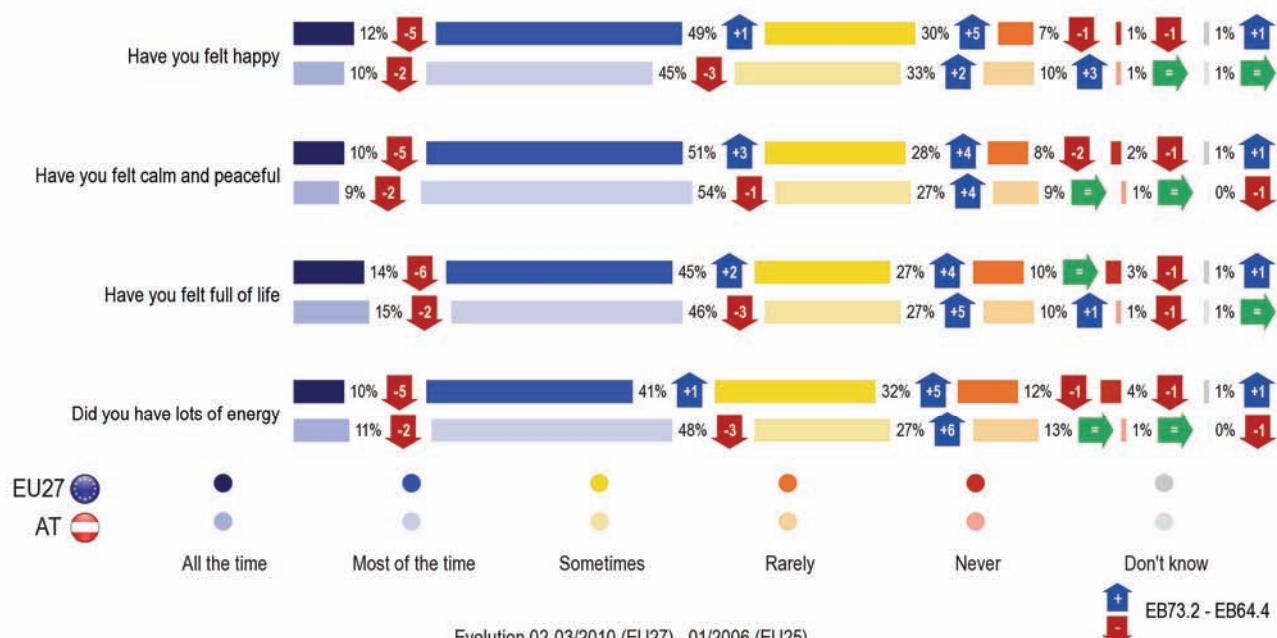

More Austrian respondents than average feel they have 'sometimes' or 'rarely' accomplished less than they would have liked because of a physical problem and fewer than average have 'never' accomplished less (29% vs EU average of 41%). However, they feel almost the same as other Europeans about the impact of emotional problems on their accomplishments. In addition, the proportion of Austrian respondents who sought help from a professional in the past 12 months is similar to the EU average and has not changed significantly since 2006 (16% sought help).

The proportion of Austrian respondents taking antidepressants in the last 12 months is the same as the EU average (9% compared to the EU average of 7%). In addition to taking antidepressants for depression and anxiety in the same proportions as other Europeans, Austrian respondents are taking them for chronic pain (35% vs. EU average of 16%) and to enhance performance (23% vs. EU average of 8%).

Austrian respondents are more satisfied in employment than other Europeans. They felt more satisfied than average on two of the attributes (job security and skills match) and felt the same as average on recognition.

## 1. The state of Mental Health

QD2. How often during the past 4 weeks...?
