Aim of the parallel session:

Demonstrate the benefits of European Reference Networks. Present patient cases that are inspirational and that demonstrate the outcome of a cooperation at EU level. In addition to the clinical operations / “medical” benefits of the ERNs, a Network-specific organisational method / best practice will also be presented in order to facilitate learning from each other.

Main issues to be addressed:

The speakers of ERNs ReCONNET, EpiCare and TransplantChild will report on their experiences insofar related to the operational activities of their respective networks. They will do so with the help of concrete patient cases.

Besides the patient cases, an organisational method/best practice for the networks will also be discussed. In this context, the ERKNet presentation will focus on their *Webinar Curriculum*, giving us an example for “internal” lessons learned.

Format of the session:

- Presentations followed by question and answer session with the audience
