access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

In merito alla questione delle vendite via internet supporto le restrizioni auspiccate. A mio avviso, infatti, tali misure preserverebbero il livello qualitativo del prodotto che è garantito, in Italia, dal sistema di autorizzazioni pubbliche che regola la concessione delle licenze alla vendita di prodotti del tabacco. Un sistema che, garantendo la qualità, contemporaneamente tutela anche la salute dei consumatori. In relazione, invece, alla determinazione delle misure che stabiliscono i limiti all'accesso ai prodotti a base di tabacco, ritengo necessario che nella nuova Direttiva vengano previste disposizioni che impongano il controllo dell'età degli acquirenti, e che tutti i distributori automatici siano dotati di strumenti idonei alla verifica dell'età, come previsto dalla legge italiana. Sono, tuttavia, assolutamente contrario alla possibilità di vietare l'esposizione dei prodotti nelle rivendite autorizzate. Innanzitutto non vi è alcuna prova che dimostri che il divieto di esposizione riduca l'incidenza del fumo o contribuisca ad impedire l'accesso ai prodotti del tabacco da parte dei minori. Tale restrizione comporterebbe costi ed oneri significativi per noi dettaglianti derivanti, ad esempio, dall'installazione di nuove scansie a norma. Infine, a mio avviso, verrebbe minata la stessa sopravvivenza dell'industria legale con drastici impatti in particolare sui piccoli rivenditori che potrebbero incorrere in perdite tali da portare finanche alla cessazione dell'attività. Questo scenario di mercato d'altro canto, darebbe un forte impulso alla diffusione e all'incremento del mercato illecito spesso gestito da organizzazioni criminali.

Innanzitutto non vi è alcuna prova che dimostri che il divieto di esposizione riduca l'incidenza del fumo o contribuisca ad impedire l'accesso ai prodotti del tabacco da parte dei minori. Tale restrizione comporterebbe costi ed oneri significativi per noi dettaglianti derivanti, ad esempio, dall'installazione di nuove scansioni a norma. Infine, a mio avviso, verrebbe minata la stessa sopravvivenza dell'industria legale con drastici impatti in particolare sui piccoli rivenditori che potrebbero incorrere in perdite tali da portare finanche alla cessazione dell'attività. Questo scenario di mercato d'altro canto, darebbe un forte impulso alla diffusione e all'incremento del mercato illecito spesso gestito da organizzazioni criminali.

In merito alla questione delle vendite via internet supporto le restrizioni auspiccate. A mio avviso, infatti, tali misure preserverebbero il livello qualitativo del prodotto che è garantito, in Italia, dal sistema di autorizzazioni pubbliche che regola la concessione delle licenze alla vendita di prodotti del tabacco. Un sistema che, garantendo la qualità, contemporaneamente tutela anche la salute dei consumatori. In relazione, invece, alla determinazione delle misure che stabiliscono i limiti all'accesso ai prodotti a base di tabacco, ritengo necessario che nella nuova Direttiva vengano previste disposizioni che impongano il controllo dell'età degli acquirenti, e che tutti i distributori automatici siano dotati di strumenti idonei alla verifica dell'età, come previsto dalla legge italiana. Sono, tuttavia, assolutamente contrario alla possibilità di vietare l'esposizione dei prodotti nelle rivendite autorizzate. Innanzitutto non vi è alcuna prova che dimostri che il divieto di esposizione riduca l'incidenza del fumo o contribuisca ad impedire l'accesso ai prodotti del tabacco da parte dei minori. Tale restrizione comporterebbe costi ed oneri significativi per noi dettaglianti derivanti, ad esempio, dall'installazione di nuove scansioni a norma. I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Tabakwaren sind ein legales Genußmittel, dessen Konsum - genauso wie Alkohol und Süßigkeiten - mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Mit den hier vorgeschlagenen Maßnahmen werden Grundrechte eingeschränkt. Dies steht nicht im Verhältnis zu den tatsächlichen Risiken.

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten – im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

Eine Abschaffung der Automaten wird aus wettbewerbs- wie verfassungsrechtlichen Gründen als nicht durchsetzbar und darüber hinaus auch als unverhältnismäßig angesehen. Die Ziele des Jugend- und Gesundheitsschutzes sind durch andere, weniger einschneidende Maßnahmen (wie etwa die Alterverifikation an Automaten) gleichermaßen erreichbar.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten - im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

additional comments

No

access to tobacco products**problem definition**

No. The problem definition is vague and incomplete. The display of tobacco products at PoS is important to the proper operation of a market economy in the sale of legal tobacco products. It informs the consumer of the products available, their characteristics, their price and the pack sizes available. Particularly in situations where other channels of communication may be restricted, consumers must be able to identify easily, quickly and effectively the existence and availability of tobacco products and to distinguish between them. Product display ban could exacerbate the illicit trade in contraband and counterfeit products. Consumers would not be able to distinguish legally traded and illicit products. Vending: vending machines in Belgium are strictly controlled to prevent sales to children. It is therefore unnecessary and disproportionate to prohibit tobacco vending.

access to tobacco products**problem definition**

No, the problem definition is not acceptable as drafted. It is vague, confused and unclear. Statements in the problem definition address all smokeless tobacco products without making any differentiation between the various types of products in this category. By ignoring this variety, the Consultation creates confusion rather than providing clarity to allow for objective policy choices.

access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are

essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten – im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat

bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

No

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ich finde ein hinzufügen von Bildern als Warnhinweis erhöht dieses Bewusstsein nicht. Die Bilder wären lediglich überwiegend abstoßend aber ohne zusätzliche information. Neutrale Verpackungen erleichtern Schmugglern das fälschen. Dies bedroht die Existenz des rein national tätigen Groß- und Einzelhandels in Deutschland. Auch gehen dem Staat Steuern verloren. Bei Neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in Jeder Hinsicht (Jugend- und Gesundheitsschutz, Steuereinnahmen..) kontraproduktiv. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen sich auf das Raucherverhalten auswirkt. Dafür gibt es aber bisher keine Nachweise aus den Ländern, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurde

access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

In merito alla questione delle vendite via internet supporto le restrizioni auspiccate. A mio avviso, infatti, tali misure preserverebbero il livello qualitativo del prodotto che è garantito, in Italia, dal sistema di autorizzazioni pubbliche che regola la concessione delle licenze alla vendita di prodotti del tabacco. Un sistema che, garantendo la qualità, contemporaneamente tutela anche la salute dei consumatori. In relazione, invece, alla determinazione delle misure che stabiliscono i limiti all'accesso ai prodotti a base di tabacco, ritengo necessario che nella

nuova Direttiva vengano previste disposizioni che impongano il controllo dell'età degli acquirenti, e che tutti i distributori automatici siano dotati di strumenti idonei alla verifica dell'età, come previsto dalla legge italiana. Sono, tuttavia, assolutamente contrario alla possibilità di vietare l'esposizione dei prodotti nelle rivendite autorizzate. Innanzitutto non vi è alcuna prova che dimostri che il divieto di esposizione riduca l'incidenza del fumo o contribuisca ad impedire l'accesso ai prodotti del tabacco da parte dei minori. Tale restrizione comporterebbe costi ed oneri significativi per noi dettaglianti derivanti, ad esempio, dall'installazione di nuove scansioni a norma. Infine, a mio avviso, verrebbe minata la stessa sopravvivenza dell'industria legale con drastici impatti in particolare sui piccoli rivenditori che potrebbero incorrere in perdite tali da portare finanche alla cessazione dell'attività. Questo scenario di mercato d'altro canto, darebbe un forte impulso alla diffusione e all'incremento del mercato illecito spesso gestito da organizzazioni criminali.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten – im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

access to tobacco products

problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

No

access to tobacco products
problem definition

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Tabakwaren sind ein legales Genussmittel, dessen Konsum - genauso wie Alkohol und Süßigkeiten - mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Mit den hier vorgeschlagenen Maßnahmen werden Grundrechte eingeschränkt. Dies steht nicht im Verhältnis zu den tatsächlichen Risiken.

Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten Akzeptanz der Regelungen bei den Bürgern. Die EU sollte sich nicht als Superbürokratie aufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU_frust geschaffen! Wen wundert's, dass Europas Bürger nichts mehr mit der EU anfangen können.

Es erweckt den Eindruck, als ob man etwas illegales tun würde, dabei ist das Verkaufen von Tabakwaren ja nicht verboten. Ich glaube auch nicht, dass man auf diesem Wege mehr Jugendliche davon abhalten kann Zigaretten zu kaufen, was man vielleicht damit bezwecken will.

explanations

No change

additional option

Der Verbraucher weiß gar nicht mehr, welches seine Marke ist, es sieht ja alles gleich aus. Zur Zeit sind Zigaretten gut plaziert sichtbar, dann müsste man erst Platz schaffen, um diese überhaupt unterbringen zu können, wo niemand sie sieht. Das könnte mit größeren Kosten für den Verkäufer verbunden sein. Der würde dann zusätzlich noch damit bestraft, dass ihm außerdem noch die Werbeeinnahmen in diesem Bereich fehlen würden.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Tabakware ist ein legales Konsumprodukt, dessen Präsentation so eingerichtet werden sollte, wie es in den entsprechenden Verkaufseinrichtungen sinnvoll ist, um Umsätze zu erzielen, die die Grundlage für das Fortbestehen der Einrichtungen darstellen. Ein Verweisen der Produkte "unter den Ladentisch" stellt eine Bevormundung und somit eine Einschränkung in den Grundrechten dar. Die Lebensgewohnheiten der Menschen würden damit eingeschränkt und vereinheitlicht, was nicht im Sinne der Bevölkerung ist. Kriminelle Machenschaften werden zunehmen, weil mit den geplanten Änderungen neue illegale Wege sich herauskristallisieren werden. Ich befürworte auch die weitere Nutzung des Zigarettenautomaten, da jeder Verbraucher unabhängig von Öffnungszeiten sein Produkt

Tabakware jederzeit erwerben kann. Wem stört denn das Vorhandensein der Automaten,abgesehen von den Gesundheitsbehörden? Es sollte jedem Betreiber überlassen werden,ob der Automat geduldet wird oder nicht.

Tabakwaren sind ein legales Genussmittel, dessen Konsum - genauso wie Alkohol und Süßigkeiten - mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Mit den hier vorgeschlagenen Maßnahmen werden Grundrechte eingeschränkt. Dies steht nicht im Verhältnis zu den tatsächlichen Risiken. Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip alleine auf nationaler Ebene zu regeln. Tatsächlich existierten ja in allen Ländern auch bereits regulierende Maßnahmen. Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten Akzeptanz der Regelungen bei den Bürgern. Die EU sollte sich nicht als Superbürokratieaufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU-Frust geschaffen! Wen wundert, dass Europas Bürger nichts mehr mit der EU anfangen können. Organisierte Kriminalität und Schmuggel werden die Lücke füllen, die entsteht, wenn legale Verkaufs- bzw. Bezugsstellen verschwinden.

We should abolish the machines and not introduce any unit boxes as it also leads to nothing. Say it gets so the problem is not under control. One would prefer children and adolescents under 18 years better informed about the risks of smoking. And prohibit all people from smoking. Where should still carry out because then we may at some point no longer breathing.

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

access to tobacco products**problem definition**

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

I do not believe that people start to smoke or continue to smoke because they see tobacco products on display in shops. Displays enable adult smokers to make an informed decision about which products they wish to buy and at what price. Product displays in general are essential to the fast, efficient and secure operation of a shop. My government is planning to regulate tobacco displays; I have disagreed with its proposals and I particularly object to the European Union adding a further regulatory burden on top of potential local laws which create additional statutory offences for our businesses.

The definition also states that a similar ban has been announced by Ireland. In fact, the ban is not similar to that of the United Kingdom as it does not distinguish the duty-free industry from domestic retailers. As a result the sales of duty-free tobacco in Ireland have dropped by 35%, this is compared to the domestic market where tobacco sales have remained relatively static.

explanations

No change

which one2

Language barriers are a major factor for international travellers who may not speak the language of the airport he or she is passing through.

additional option

In most jurisdictions where a tobacco display ban has been introduced, the government has accepted some sort of derogation for airports. The vast majority of consumers have decided to purchase a tobacco product prior to visiting the retail outlet at which they make that purchase. The display of tobacco products at point of sale does not encourage consumption, stimulate "impulse" purchases or inhibit abstention or quitting.

Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten Akzeptanz der Regelungen bei den Bürgern. Die EU sollte sich nicht als Superbürokratie aufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU-Frust geschaffen! Wen wundert, dass Europas Bürger nichts mehr mit der EU anfangen können.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten - im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Tabakwaren sind, wie z.B. Süßwaren oder Alkohol, legale Genussmittel. Diese wirken auch nicht gerade geundheitsfördernd. Der Verbraucher sollte im Rahmen der Vorschriften und Gesetze für sich entscheiden, was gut oder weniger gut für ihn ist und sich nicht vom Staat bevormunden lassen. Desweiteren kann jeder Verbraucher seine Tabakwaren legal in Staaten erwerben, die die neuen EU-Vorschriften nicht mittragen. Hat die deutsche Regierung bzw. die EU schon einen Gedanken daran verschwendet, wie die zu erwartenden drastischen Steuerausfälle zu kompensieren sind?

Tabakwaren sind legale Genussmittel, wie z.B. Alkohol und Süßwaren, die ebenfalls nicht gesundheitsfördernd wirken. Jeder Bürger sollte für sich sich entscheiden (im Rahmen der Gesetze und Vorschriften) was für ihn gut oder schlecht ist und sich nicht vom Staat bevormunden oder gar gängeln lassen. Alle regulierenden Maßnahmen seitens des Staates brachten nicht den vom Staat erhofften Erfolg. Weiterhin kann jeder Bürger zur Beschaffung seiner Tabakwaren legal auf andere Staaten ausweichen, die diese hier genannten Vorschriften bzw. Verordnungen nicht mittragen. Der organisierten Kriminalität wird ein immenser Dienst erwiesen. Wo nimmt der Staat dann die Steuern her, die millionenfach fehlen?

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Auch Alkohol und Süßigkeiten können Gesundheitsschäden hervorrufen. Auch diese Produkte sind legal. Auch Zigaretten sollen legal bleiben. Zigarettenautomaten in Deutschland sind mit technischen Zugangskontrollen zum Jugendschutz ausgestattet. Dies ist Jugendschutz genug. Es ist nicht nachgewiesen, dass Zigarettenautomaten Einfluss auf das Rauchverhalten von Jugendlichen haben. Wohl eher die Erwachsenen werden eingeschränkt. Ich lasse mir meine Lebensgewohnheiten nicht einschränken. Weiter steht mein Arbeitsplatz auf dem Spiel! Ich befülle täglich Zigarettenautomaten. So kann ich meine vierköpfige Familie ernähren!

Alle Restriktionen in diesem Bereich bringen nur einer Organisation etwas! Diese ist der illegale Schmuggel. Die einzige Orga, die weder Steuern zahlt, noch sich um irgendeine Art von Gesundheit kümmert. Der Automat als Verkaufskanal ist nach meiner Auffassung der einzige, der den Jugendschutz einhält. Der Mensch handelt nach Gefühlen.

Die Problembeschreibung trifft nicht zu. In 15 Mitgliedstaaten der EU 27 dürfen Tabakwaren

über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten – im Gegensatz zum Einzelhandel - mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren.

access to tobacco products

problem definition

Tabakwaren sind ein legales Genußmittel. Weitere Maßnahmen und Einschränkungen sind nicht erforderlich. Als Bürger bin ich mündig genug zu entscheiden was ich zu mir nehme und was nicht. Dafür brauche ich keine EU, die sich anschickt immer mehr zu regulieren. Das lehne ich strikt ab.

Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Ich finde es nicht ok wenn die Tabakproduktlinie eingeführt wird. Man sollte auch an kleine Unternehmer denken (wie Zeitungsläden, oder einfache Lotto totto geschäfte) menschen sichern sich so ihren lebensunterhalt und man sollte dies nicht ändern. Auch wenn die Regale leer sind werden die Raucher nicht aufhören zu Rauchen und um ehrlichen zu sein das Auge spielt doch immer mit stellen Sie sich mal vor sie kommen in einen Supermarkt und die Regale wären leer das wäre genau so unvorstellbar.

explanations

Controlled supply and access

which option

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults; Tobacco display and promotion at points of sales to be restricted

which one2

1. Man sollte einfach stärker die Alterskontrollen einhalten.

access to tobacco products

problem definition

Tabakwaren sind legale Genußmittel, dessen Konsum - genauso wie Alkohol, Süßigkeiten usw. - mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Das Verbot der Auslage und Sichtbarkeit von Zigaretten in Geschäften weisen keinen grenzüberschreitenden Bezug auf. Die vorgeschlagenen Maßnahmen betreffen nicht die Funktion des europäischen Binnenmarktes, sind rein gesundheitspolitisch motiviert. Jedoch wird die Gesundheitspolitik auf nationaler und nicht auf europäischer Ebenen geregelt. Diese Maßnahmen existieren ja bereits in allen Ländern. Die bereits bestehenden Maßnahmen haben sich bewährt. Die Superbürokratie der EU in die kleinsten Bereiche der Bürger fördert nicht das Vertrauen in die EU. Dadurch fühlt sich der mündige Bürger gegängelt und es entsteht nur eine weitere Politikverdrossenheit. Der Verkauf von Tabakwaren über Automaten (in 15 von 27 Mitgliedstaaten erlaubt) erfolgt meist über strenge gesetzlichen Auflagen der nationalen Regierungen. In Deutschland sind die Automaten mit einer technischen Zugangskontrolle versehen. Dies ist bezüglich des Jungdschutzes sogar der sicherste Vertriebskanal. Das Vorhandensein von Zigarettenautomaten hat keinen Einfluss auf das Rauchverhalten von Jugendlichen. In Länderen ohne Zigarettenautomaten ist der Anteil jugendlicher Raucher zum Teil wesentlich höher als in Ländern mit Automaten. Es wird durch die vorgeschlagenen Maßnahme nur dem mündigen Bürger eine bequeme Bezugsmöglichkeit seiner Tabakwaren genommen. Der Schmuggel und organisierte Kriminalität wird massiv zunehmen, wenn legale Verkaufsstellen verschwinden einhergehend mit massiven Steuerausfällen für die Mitgliedsstaaten. Eine Kuh die man melkt, schlachtet man nicht.

Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen.

Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten Akzeptanz der Regelungen bei den Bürgern. Die EU sollte sich nicht als Superbürokratie aufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU-Frust geschaffen! Wen wunderts, dass Europas Bürger nichts mehr mit der EU anfangen können.

Eine Abschaffung der Automaten wird aus wettbewerbs- wie verfassungsrechtlichen Gründen als nicht durchsetzbar und darüber hinaus auch als unverhältnismäßig angesehen. Die Ziele des Jugend- und Gesundheitsschutzes sind durch andere, weniger einschneidende Maßnahmen (wie etwa die Altersverifikation an Automaten) gleichermaßen erreichbar.

Produkte, die legal vertrieben werden dürfen, brauchen auch nicht versteckt zu werden. Ein Tabakhändler ist kein krimineller Dealer. Die EU hat für die Gesundheitspolitik keine Kompetenz, die beabsichtigten Maßnahmen lassen sich aber nur mit Gesundheitsschutz begründen. Die Akzeptanz der EU sinkt bei den Bürgern immer weiter, je intensiver die EU die Lebensgewohnheiten jedes Einzelnen einschränken will. Automaten sind durch technische Maßnahmen gegen Nutzung von Jugendlichen geschützt.

Weder ein Verbot des Verkaufs von Tabakwaren in Automaten, noch die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen einen grenzüberschreitenden Bezug auf. Für Automaten ergibt sich das schon daraus, dass deren Einzugsgebiet auf die unmittelbare Nachbarschaft zum Automaten beschränkt ist.

Dass die Existenz von Zigarettenautomaten einen Einfluss auf das Rauchverhalten Jugendlicher hat, ist wissenschaftlich nicht nachgewiesen. In Ländern mit einem

Automatenverbot fällt die Quote jugendlicher Raucher zum Teil deutlich höher aus als in den Ländern mit einer Automatenvertriebsstruktur. Pläne der Europäischen Kommission zur Abschaffung der Automaten schränken daher die Bezugsmöglichkeiten erwachsener Verbraucher ein, dienen dem Jugendschutz jedoch in keiner Weise.“

Ich halte Tabak genauso wie Alkohol für ein legales Genussmittel und Alkohol hat meiner Meinung nach ein genauso hohes Aghängigkeitspotenzial wie Zigaretten und dieses verschwindet auch nicht hinter der Ladentheke. Die Untersagung der Sichtbarkeit ist völliger Unsinn, da jedermann weiss wie und wo er seine Zigaretten kauft. In Sachen Jugendschutz sollte sich die EU sich um wichtigeres kümmern z.B. " wie schützen wir unsere Kinder vor

sexuellen Übergriffen vor Pedophilen". Die Automaten sind mit Sicherheitskontrollen wie die Identifizierung (Alter/Volljährigkeit) durch Ausweise oder Checkkarten genügend gesichert. Ausserdem bin ich der Meinung, das die Kriminalität durch die neutrale Verpackung (Schmuggeln) steigen wird.

Fehlende Verkaufsstellen und die Untersagung der Sichtbarkeit von Tabakwaren ist in meinen Augen Schwachsinn, da man selber weiss, wo man Tabakwaren kaufen kann bzw. wo man diese erhält. Sollte dieses oben genannte Thema wirklich vollzogen werden, wird die Kriminalität steigen. Nach meiner Kenntnis sind Tabakwaren ein legales Genussmittel, wie auch Süßigkeiten und Alkohol. Die Abschaffung der Automaten ist in keiner Hinsicht mit einem gefährdeten Jugendschutz in Verbindung zu setzen, da es schon reichlich Vorsorge in der Identifizierung durch Ausweis und Checkkarten getroffen worden sind.

Die Gefahr wird darin bestehen, dass die Kriminalität steigen wird, durch fehlende Verkaufsstellen. Jedes Genussmittel hat seine Risiken wie z.B. Alkohol oder Süßwaren. Auch wenn das Verpackungsmaterial neutral gestaltet wird, ist das gleiche drin wie auch Jedermann weiß. Außerdem ist es falsch die Automaten abzuschaffen. Das Jugendschutzgesetz wird trotzdem nicht gewährt.

Warum muss oder soll ich Genussmittel für "Erwachsene" wie pornografische Artikel verstecken ? Sind wir unmündig oder wie verklemmte ? Was ist mit Alkoholflaschen ? Was ist mit Arzneimittel süchtigen ? Warum muss ich Regale leer präsentieren oder die Ware hinter einer Schranktür verstecken ? Das alles ist doch total unüberlegt. Wenn ich Kinder oder Jugendliche schützen will , erreiche ich damit genau das Gegenteil , weil diese Zielgruppe dann erst recht neugierig wird und unbedingt wissen will . was ist dahinter und wie schmeckt oder wirkt das . Waren wir als Jugendliche anders ? Wenn die Antwort ja heisst ist das gelogen.

Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht - die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein national tätigen Groß- und Einzelhandels in Deutschland. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend- und Gesundheitsschutz, Steuereinnahmen...) kontraproduktiv. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür gibt es keine Nachweise aus Ländern, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden.

access to tobacco products**problem definition**

Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht - die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein national tätigen Groß- und Einzelhandels in Deutschland. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend- und Gesundheitsschutz, Steuereinnahmen...) kontraproduktiv. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweisen auf das Rauchverhalten der Verbraucher einwirkt. Dafür gibt es keine Nachweise aus Ländern, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden.

access to tobacco products

problem definition

The definition also states that a similar ban has been announced by Ireland. In fact, the ban is not similar to that of the United Kingdom as it does not distinguish the duty-free industry from domestic retailers. As a result the sales of duty-free tobacco in Ireland have dropped by 35 %, this is compared to the domestic market where tobacco sales have remained relatively static.

explanations

No change

which one2

Due to the unique market they serve, airport duty free and travel retail shops would be disproportionately affected by a tobacco product display ban. It has been recognised by the European Commission that duty free and travel retail shops do not compete with the domestic market, they are nevertheless in very real and direct competition with retail outlets at other international airports and with airline onboard sales. If passengers do not purchase their desired goods at the departure airport, they will simply delay the purchase to onboard the airline, to the transfer airport, or in many cases to their arrival airport. The sale and subsequent revenue is simply lost to another airport or airline, damaging the international competitiveness of European airports.

access to tobacco products

problem definition

Tabakwaren sind ein legales Genußmittel, dessen Konsum- genauso wie Alkohol und Süßigkeiten- mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Mit den hier vorgeschlagenen Maßnahmen werden Grundrechte eingeschränkt. Dies steht nicht im Verhältnis zu den tatsächlichen Risiken. Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen. Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten

Akzeptanz der Regelung bei den Bürgern. Die EU sollte sich nicht als Superbürokratie aufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU-Frust geschaffen! Wen wundert, dass Europas Bürger nichts mehr mit der EU anfangen können. Die Problembeschreibung trifft nicht zu. In 15 Mitgliedsstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten- im Gegensatz zum Einzelhandel- mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren. Das die Existenz von Zigarettenautomaten einen Einfluss auf das Rauchverhalten Jugendlicher hat, ist wissenschaftlich nicht nachgewiesen. In Ländern mit einem Automatenverbot fällt die Quote jugendlicher Raucher zum Teil deutlich höher aus als in den Ländern mit einer Automatenvertriebsstruktur. Pläne der Europäischen Kommission zur Abschaffung der Automaten schränken daher die Bezugsmöglichkeit erwachsener Verbraucher ein, dienen dem Jugendschutz jedoch in keiner Weise. Weder ein Verbot des Verkaufs von Tabakwaren in Automaten, noch die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen einen grenzüberschreitenden Bezug auf. Für Automaten ergibt sich das schon daraus, dass deren Einzugsgebiet auf die unmittelbare Nachbarschaft zum Automaten beschränkt ist. Organisierte Kriminalität wird das Vakuum füllen, das entsteht, wenn legale Verkaufs- bzw. Bezugsstellen verschwinden. Eine Abschaffung der Automaten wird aus wettbewerbs- wie verfassungsrechtlichen Gründen als nicht durchsetzbar und darüber hinaus auch als unverhältnismäßig angesehen. Die Ziele des Jugend- und Gesundheitsschutzes sind durch andere, weniger entscheidende Maßnahmen (wie etwa die Altersverifikation an Automaten) gleichermaßen erreichbar.

Die legalen Möglichkeiten die uns Bürgern gegeben sind, Tabakwaren zu erwerben, sollten doch auch in dieser Form beibehalten werden. Im Besonderen der Vertrieb im Automaten ist für uns Raucher die beste Möglichkeit legal Zigaretten zu erwerben, wobei noch zu beachten ist, das am Automat der Jugendschutz im Vordergrund steht. Der Vertrieb von Tabakwaren im Automaten ist somit, bezüglich Jugendschutz, der sicherste Vertriebsweg.

Die Kriminalität wird steigen da es keine Verkaufsstellen bzw Bezugsstellen gibt.Zudem ist bzw sind Tabakwaren ein LEGALES Genussmittel wie auch Süßigkeiten und Alkohol, jedes dieser drei Genussmittel ist mit gesundheitsrisiken verbunden.Die Untersagung der Sichtbarkeit von Zigaretten ist schwachsinn, da man selber weiß wo man sich die Zigaretten kaufen kann bzw wo man diese erhält. Die Abschaffung der Automaten ist totaler blödsinn, da der Jugendschutz trotzdem nicht gewährt ist. Durch die EU sollte ein Europa (Länder zusammen)geschafft werden und nicht ein Verbotland (Alcatraz) kein wunder das wir als Bürger mit der EU nix mehr anfangen können.

explanations

additional comments

No

access to tobacco products

problem definition

The definition does not make any exemptions, ruling over a specific topic in a general way. It also states that the UK has recognised the unique nature of the duty free industry and has distinguished duty free retailers from domestic retailers by classifying them as "bulk tobacconists". While taking one definition for all retailers - specific elements are not taken into account. For example taking a supermarket vs. airport: every little child is disposed to the tobacco next to the sweets at the cashier. An airport shows a rather low proportion of children!

explanations

No change

additional option

The general consultation also does negatively influence any competition. Banning tobacco products from the airport, only delays the purchase - into the airplane. Therefore, competition in the travel retail business is manipulated, by taking any chance of the airport selling tobacco products, and giving airlines a strong competitive strength. Additionally, as only the EU is thinking about such a ban, the (sometimes low quality) products from abroad will get into the European market even more.

Tabakprodukte werden doch sowieso schon schwer zugänglich für den Endverbraucher präsentiert. Meistens hinter der Kasse, oder durch mechanische Einrichtungen. Und das, obwohl es sich um legale Produkte handelt. Alle Handlungen der Politik hatten bit dato keinen Einfluß auf das Kaufverhalten der Verbraucher. Ich konnte bis heute nicht feststellen, daß sich ein Raucher von einem Politiker zum Nichtraucher machen ließ. Verbieten sie das Rauchen doch komplett und schauen zu, wie die schönen Steuermilliarden zu Staub zerfallen. Wer weiß, ob sich die EU dann noch ein Europaparlament leisten kann!

explanations

No change

additional option

Wie soll ich als Raucher meine bevorzugte Marke finden? Wie soll ich ein Produkt unsichtbar Präsentieren und dann auch noch verkaufen? Diese Forderung bedeutet doch schlichtweg, Entfernung aus dem Sortiment! Sollen meine Kunden künftig ihre Rauchwaren illegal am Bahnhof oder dem Baumarktparkplatz kaufen und so kriminalisiert werden? Wegfall von Marketingmaßnahmen, sind gleichbedeutend, mit Vernichtung wertvoller Umsätze. Bei einer Reduzierung der Markenvielfalt regelt sich der Absatz nur noch über den Preis.

access to tobacco products

problem definition

Tobacco products are a legal luxury whose consumption - just as alcohol and sweets - with health risks is connected. Still it concerns a legal product. With the measures suggested here fundamental rights are limited. This does not stand in proportion to actual risks. The interdiction of the display or visibility of cigarettes in sales places show no international relation. The measures suggested here concern not the functioning of the European home market, but they are health-politically motivated alone. However, the health politics falls not in the competence area of the EU, but is to be regulated after the Subsidiaritätsprinzip alone at national level. Really already adjusting measures exist in all countries. The single restrictions already existing at national level have proved themselves. If one pursues other improvements of single restrictions at national level, this leads to a raised acceptance of the regulations with the citizens. The EU should not show off as a superbureaucracy which prescribes the smallest way of life of all people standardising. EU frustration is thereby created! Is surprised is surprised that citizens of Europe can start nothing more with the EU. The problem description does not apply. In 15 member states of the EU 27 tobacco products about machine may be delivered. This occurs as a rule under strict legal editions of the national governments. In Germany the machines are provided, for example - in contrast to the retail trade - with a technical access control. Here the machine with regard to protection of children and young people is even the surest distribution canal for tobacco products. The fact that the existence of cigarette machines has an influence on the smoke behaviour of youngsters, is not academically proved. In countries with a machine ban the rate of youthful smokers precipitates partly clearly higher, than in countries with a machine distribution structure. Hence, plans of the European Kommission for the abolition of the cigarette machines limit the relation possibilities of adult consumers, serve the protection of children and young people, nevertheless, in no manner. Neither a ban of the sales of tobacco products in machines, nor the interdiction of the display or visibility of cigarettes in sales places show an international relation. For machines this already arises from the fact that their catchment area is limited to

the immediate neighborhood to the machine. Organised criminal activity will fill the vacuum, this originates if legal sales places disappear. An abolition of the cigarette machines is looked from competition like for constitutional-juridical reasons not enforcable and, in addition, also as disproportionate. The aims of the protection of children and young people and health protection are by others, less drastic measures (as for example the age verification in cigarette machines) equally accessible.

I believe the problem definition and the proposals are very biased and do not effectively address the issues. Hence, please see below for more information on my thoughts.

explanations

No change

which one2

I believe the EU Commission and the UK Government should look at measures such as Education Programs for consumers and retailers. The point of sale is an effective means of communication for those that want to quit smoking, but more importantly, as a check point to ensure that young people can't buy the product. Therefore, I believe this is the most effective way to address consumer access rather than measure such as the Point of Sale Display ban.

additional option

I believe the EU Commission and the UK Government need to look at Better Regulatory and non-regulatory measures to address smoking, especially smoking by young people. I don't see any information available that says that people will quit smoking as a result of a ban on the display of cigarettes in retail shops. Here are some reasons why this piece of legislation (introduced by the previous government) should not be included in the EU Commissions proposal: ♣ It would bring about a growth in the illicit cigarette market. If people cannot see these products when they come in shops, they will seek cheaper alternative routes to buy cigarettes. ♣ There will be a migration from small shops to larger supermarkets that are able stock more products. ♣ It is widely accepted that approximately 33% of other sales in retailer shops are a result of sales of tobacco. Small shops stand to massively lose out if people do not go to them to buy cigarettes. ♣ Many shops will go the wall simply because the excessive cost of changing the shop gantries. ♣ And, most importantly, what about one's own freedom to choose? After all, tobacco is a perfectly legal product! o The EU Commission and the UK Government should drop this proposal altogether.

Ein Raucher hört durch eine Umstrukturierung der Verkaufsstellen nicht auf zu rauchen. Die Anzahl der Raucher wird dadurch nicht abnehmen. Für Jugendlichen würde durch diese Massnahme nicht schwerer an Tabakwaren heranzukommen. Die gegenwärtige Präsentation stellt keine Gefahr dar.

explanations

No change

additional option

Viele kleine Einzelhändler müssen erhebliche Investitionen tätigen, um die Tabakwaren nicht mehr sichtbar zu präsentieren. Diese finanzielle Mehrbelastung kann bis zum Konkurs oder Ruin des Einzelhändlers führen. Der Raucher findet seine spezielle Marke nur noch schlecht. Die Markenvielfalt verringert sich. Der Wettbewerb verlagert sich vom Markenwettbewerb auf einen Preiswettbewerb. Sinkende Preise und Margen bedeuten Mindereinnahmen für die Einzelhändler, was zu Stellenabbau führt. Auch der Staat hat dadurch geringere Einnahmen zu verzeichnen, jedoch höhere Ausgaben.

additional comments

No

access to tobacco products

problem definition

So lange Tabakwaren legal sind, besteht kein Grund, die Warenpräsentation zu behindern. Es ist nicht erwiesen, dass dadurch weniger Menschen rauchen oder sich Jugendliche vom Tabakkonsum abhalten lassen. Der Zugang zu Tabakwaren ist aufgrund des Wertes und der geringen Handelsspannen bereits heute erschwert und Altersbeschränkungen sind im Jugendschutzgesetz geregelt.

explanations

No change

additional option

Für den Verbraucher wird es schwieriger, seine Marke zu finden. Jeder Händler müsste investieren, um diese Vorschriften zu erfüllen. Mit der Aussicht auf Ertragsrückgänge und fehlende Einnahmen aus Werbung führt das automatisch dazu, dass viele Händler vom Markt verdrängt werden. Kunden orientieren sich noch mehr am illegalen Markt. Das führt zu Steuerausfällen und Arbeitsplatzvernichtung.

Die Verpackungen stellen kein Problem da. Der Anteil der Raucher wird sich nicht verringern. Jugendliche werden sich auch weiterhin den Zugang zu Tabakprodukten verschaffen.

explanations

No change

additional option

Der Raucher kann durch einheitliche Verpackungen sein Marke nur schlecht wieder finden. Ausserdem kann man keine Ware verkaufen, die der Kunde nicht sieht. Das Nachsehen hat den wieder der Einzelhandel. Auch kann man die Geschäfte nicht komplett umbauen, damit die Ware "unsichtbar" wird. Besorgen die Raucher sich ihre Zigaretten auf dem illegalen Weg, verliert der Staat auch noch die, nicht gerade wenigen, Steuereinnahmen. Alle Abteilungen rund um die Tabakprodukte (Industrie, Einzelhandel, Staat) werden erhebliche Verluste erleiden und noch mehr Arbeitslose können wir nicht gebrauchen.

Strādājam aptuveni pus gadu, tiko esam uzstādījuši jaunu aprīkojumu cigarešu izvietošanai, kā rezultātā palielinājas apgrozījums gan uz cigaretēm, gan citām preču grupām. Lai izvietotu cigaretes citur mums ir atkal jāiegulda nauda jauna aprīkojuma izveidošanai, kas atkal ir par maksu. Tai pat laikā klienti kas neredz izvietotas preces iet meklēt to precī citā veikal, kas atiecās uz cigaretēm tad iet un pērk kontrabandu, no sākuma vaidzētu apakrot kontrabandu Eiropas savienībā tas būtu efektīgāk, nekā atņemt veikaliem klientus.

Graag dan ook verbieden het uitstallen van chocolade (zeer verslavend), alcohol, etc. Ik snap de hetse niet zo goed tegen de tabaksindustrie. Als overheden vinden dat roken slecht is voor de gezondheid, dan moeten ze het product verbieden en stoppen om geld (accijnzen) te innen bij de industrie. Het klinkt in mijn oren allemaal als zeer hypocriet. Het draait weer allemaal om geld.

Tabakwaren sind ein legales Genußmittel, dessen Konsum- genauso wie Alkohol und Süßigkeiten- mit gesundheitlichen Risiken verbunden ist. Dennoch handelt es sich um ein legales Produkt. Mit den hier vorgeschlagenen Maßnahmen werden Grundrechte

eingeschränkt. Dies steht nicht im Verhältnis zu den tatsächlichen Risiken. Die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen keinen grenzüberschreitenden Bezug auf. Die hier vorgeschlagenen Maßnahmen betreffen nicht das Funktionieren des europäischen Binnenmarktes, sondern sie sind alleine gesundheitspolitisch motiviert. Die Gesundheitspolitik fällt aber nicht in den Kompetenzbereich der EU, sondern ist nach dem Subsidiaritätsprinzip allein auf nationaler Ebene zu regeln. Tatsächlich existieren ja in allen Ländern auch bereits regulierende Maßnahmen. Die einzelnen auf nationaler Ebene bereits bestehenden Restriktionen haben sich bewährt. Wenn man weitere Verbesserungen einzelner Restriktionen auf nationaler Ebene verfolgt, so führt dies zu einer erhöhten Akzeptanz der Regelung bei den Bürgern. Die EU sollte sich nicht als Superbürokratie aufspielen, die die kleinsten Lebensgewohnheiten aller Menschen vereinheitlichend vorschreibt. Dadurch wird EU-Frust geschaffen! Wen wundert, dass Europas Bürger nichts mehr mit der EU anfangen können. Die Problembeschreibung trifft nicht zu. In 15 Mitgliedsstaaten der EU 27 dürfen Tabakwaren über Automaten abgegeben werden. Dies erfolgt i.d.R. unter strengen gesetzlichen Auflagen der nationalen Regierungen. In Deutschland z.B. sind die Automaten- im Gegensatz zum Einzelhandel- mit einer technischen Zugangskontrolle versehen. Hier ist der Automat bezüglich Jugendschutz sogar der sicherste Vertriebskanal für Tabakwaren. Das die Existenz von Zigarettenautomaten einen Einfluss auf das Rauchverhalten Jugendlicher hat, ist wissenschaftlich nicht nachgewiesen. In Ländern mit einem Automatenverbot fällt die Quote jugendlicher Raucher zum Teil deutlich höher aus als in den Ländern mit einer Automatenvertriebsstruktur. Pläne der Europäischen Kommission zur Abschaffung der Automaten schränken daher die Bezugsmöglichkeit erwachsener Verbraucher ein, dienen dem Jugendschutz jedoch in keiner Weise. Weder ein Verbot des Verkaufs von Tabakwaren in Automaten, noch die Untersagung der Auslage bzw. Sichtbarkeit von Zigaretten in Verkaufsstellen weisen einen grenzüberschreitenden Bezug auf. Für Automaten ergibt sich das schon daraus, dass deren Einzugsgebiet auf die unmittelbare Nachbarschaft zum Automaten beschränkt ist. Organisierte Kriminalität wird das Vakuum füllen, das entsteht, wenn legale Verkaufs- bzw. Bezugsstellen verschwinden. Eine Abschaffung der Automaten wird aus wettbewerbs- wie verfassungsrechtlichen Gründen als nicht durchsetzbar und darüber hinaus auch als unverhältnismäßig angesehen. Die Ziele des Jugend- und Gesundheitsschutzes sind durch andere, weniger entscheidende Maßnahmen (wie etwa die Altersverifikation an Automaten) gleichermaßen erreichbar.

Es existiert bereits ein allgemeines Bewusstsein der Risiken des Rauchens. Ein Hinzufügen von Bildern auf den Warnhinweisen erhöht dieses Bewusstsein nicht – die Bilder wirken lediglich überwiegend abstoßend ohne eine zusätzliche Information zu bieten. Durch die Umsetzung von neutralen Verpackungen wird Produktfälschern die Arbeit erleichtert und das Problem des Schmuggels weiter verschärft. Dies bedroht die Existenz des rein national tätigen

Groß- und Einzelhandels in Deutschland. Über die Einführung von neutralen Verpackungen konzentriert sich der Wettbewerb verstärkt auf das Preis-Marketing. Sinkende Preise wären die Konsequenz. Dies ist in jeder Hinsicht (Jugend- und Gesundheitsschutz, Steuereinnahmen...) kontraproduktiv. Es wird pauschal unterstellt, dass die Einführung von Bildwarnhinweise auf das Rauchverhalten der Verbraucher einwirkt. Dafür gibt es bisher keine Nachweise aus Ländern, in denen Bildwarnhinweise bereits verpflichtend eingeführt wurden.

additional comments

No

access to tobacco products**problem definition**

if you compare the cigarettes with the swedish snus product so be faire and just and you can say that the snus is less harmful than the cigarettes and other tobacco products

explanations

No change

which one2

no

additional option

the right to choose is amatter of identity and free alternative to whom want to have and sell the snus product in sweden. Many rapports have found and shown that the snus has almost no incidency on the human health.

As long as smoking is a legal habit the products should be sold on normal places. If you make it impossible to get tobacco there is more chance that people buy their tobacco on illegal places and maybe you will get tobacco of bad quality. In Holland it is sometimes easier to buy hard drugs than normal tobacco! Maybe the advertising of tobacco can be on a inconspicuous way. But in most countries it is already not allowed to advertise.

explanations

No change

additional option

Let the people decide what they want. As long as they don't harm other people. As I told before other products make more problems. But I think that the lobbyists or industrie of those products pay more attention to your needs!?

Folk kommer inte röka mindre bara för att tobaksprodukter ej får synas. Tror att det tvärtom kan öka användandet då det blir "förbjudet". Vi har tillräckligt många förbud i sverige som det är. Tror inte att förbud mot skyltning heller kommer bidra till ett minskat användande av tobaksprodukter.

Ban

which supply and access
Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned; Promotion and displays in retail stores to be banned

which one2
rise the tax on tobacco articles extremely, so the enter level into the addiction would be too high, at least for children, teenagers and low income population, which is most affected by tobacco addiction and it's health consequences, on other side the remaining smokers would have through the expensiveness of the drug an additional reason to give it up, ie. it would made the exit easier, considering the money saving with the quitting, also a strong topic for young people and low income population. and as with higher income often comes even higher trend to not throw the money mindlessly away due to lost income due to lost interest as generally more healthier way of life, it could imho also work for the high income part of population.

additional comments

No

access to tobacco products

problem definition

Da es sich bei Tabakprodukten um legale Produkte handelt, ist es kein Problem, dass diese präsentiert werden! Die Annahme, dass eine Einschränkung der Werbung und Produktpräsentation den Anteil der Raucher verringert und/oder den Zugang von Jugendlichen zu Tabakprodukten verhindert ist nicht bewiesen. Trotzdem wird der Handel durch diesen Entwurf extrem behindert.

explanations

No change

additional option

Diese Regelung führt dazu, dass der Raucher Probleme hat, seine bevorzugte Marke zu finden. Für den Einzelhandel würde ein Verbot, die Ware am Ort des Verkaufs zu präsentieren ein großes finanzielles Problem bedeuten. Oftmals ist dies aus Lagergründen etc. auch überhaupt nicht möglich, sodass ein Verkauf von Tabakprodukten nicht mehr möglich wäre. Die Markenvielfalt würde durch diese Regelung stark eingeschränkt. Dies führt bekanntermaßen zu einer höheren Schmuggelrate und damit auch finanziellen Einbußen für die Wirtschaft und den Staat. Zusätzlich würden sich die Produkte stärker über den Preis definieren, dies führt zu geringeren Verkaufspreisen und dadurch zu einem einfacheren und

somit höheren Konsum. Auch für die Werbeindustrie würde das Verbot von Werbung eine starke finanzielle Belastung.

Anyhow people are addicted to it which means they will continue to smoke no matter what. By advertising for it we oblige the industry to inform the users about the possible diseases smoking can cause. The only option against this industry is to ban it and make it illegal. That will never happen so it's better we leave it as it is. I will never say that I support the tobacco industry but in this case it's not a solution they offer but the start of new and other problems.

To ban promotion in point of sales is bad for competition between the different brands, it favors existing (big) manufacturers and leaves no chance for new/local products to make their existence known to the public.

access to tobacco products

problem definition

My disagreement with the problem definition is mostly coming from the list of measures (options) proposed, and from questions chosen for this public. To the measures: in my view, there is no direct link between the problem, as it is stated, and some proposed measures, such as Option 2c and 3c - how do they help the national tobacco control efforts? To the questions, rather a semantic objection: if I disagree with any of the proposed measures, how do I need to proceed, except of not agreeing with the problem statement? I believe a lot of valuable feedback is this way lost.

explanations

No change

which one2

Due to some excessive measures proposed as a block (block BAN, block SUPPLY AND ACCESS), I opt for "No change", although I think parts of the mentioned blocks are valuable and would help diminishing some of the unwanted effect of tobacco. I recommend breaking down the blocks in their parts, and submitting the list again to public consultation.

additional option

No, I am not a smoker.

access to tobacco products**problem definition**

There is no clear problem stated with regards to vending machines or point of sale display ban. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives. There is no evidence that a ban on product display would reduce smoking prevalence or restrict youth access to tobacco products.

explanations

No change

additional option

A display ban would make it more difficult for consumers to find their preferred brand. A display ban would increase illicit trade in tobacco products with negative consequences for legal manufacturers, wholesalers, retailers, consumers and societies.

comments

Nowhere in the entire article specifying problem formulations regarding the possible revision of the Tobacco Directive are there forceful written indications on your body's preconceptions. In this portion of the text you make it very clear that you have a very negative view of the science published on "snus" in the last 20 years. You also state that there seem to be more important signs of "snus" leading to smoking than to the contrary. This is grossly biased and

highly irregular and I would like to see the science on which you base the wording for this problem formulation as there to my knowledge exists more solid and better science stating exactly the opposite of what you are trying to influence respondents to this questionnaire to believe by reading your text? In all other portions of the "DG SANCO Public Consultation Document" you are asking for input while in the portion regarding smokeless tobacco you are actively influencing how you want respondents to reply. Again I state that this is grossly biased and highly irregular. http://ec.europa.eu/yourvoice/ipm/forms/dispatch_1_av_2_2010

which option

Lifting the ban on snus

additional option

All smokefree products should be allowed to the extent that they are below (by you) set limits in especially TSNA's. These are the main substances in smokeless tobacco known to be mutagenic and/or carcinogenic. Modern production of "Swedish Style Snus" being proven to have the lowest values of said TSNA's of any smokeless tobacco products. Any tobacco products whatsoever actually.

additional comments

Possible incidence increase of oral cancer by use of smokeless tobacco may be proven in some fermented products, even these incidence increases however are insanely much lower than those incidence increases seen in cigarette smokers. FACT Your comments about myocardial infarction and other cardiovascular effects of smokeless tobacco are exactly equal to those of any and all other nicotine delivery devices (being that nicotine is the active ingredient and the ingredient that has cardiovascular effects) such as e-cigarettes, nicotine spray, lozenges, nicotine chewing gum etc. etc. etc. This is also left without any commentary on your part in that portion of the "Public Consultation Document" This I also find grossly biased and highly irregular. FACT In all new member states GDP is significantly lower than in the traditional member states. This effectively bars a majority of low income smokers a risk reduced alternative to cigarettes as nicotine replacement therapies are MUCH more expensive than tobacco products. FACT As a means of lessening tobacco production and tobacco use overall by freely allowing nicotine replacement therapies while keeping the ban on snus is nonsensical. It is much too expensive (next to impossible) to synthesize nicotine. Therefore all nicotine replacement therapy products on the market are as much a part of the "Tobacco Industry" as cigarettes or smokefree tobacco. FACT Nicotine replacement therapy products are exempt from tobacco taxation! In effect this means that the prices of e-cigarettes and nicotine chewing gum are much higher than the price of cigarettes or smokefree tobacco while none of the regular 70% of consumer price goes to tobacco tax! You should therefore carefully consider that there are now 2 different and very influential industries who have a serious interest in directing the future of European Tobacco Law. These are the large cigarette corporations of course but now also all of the Pharmaceutical corporations in any way involved in nicotine therapy. FACT Higher price, no tobacco tax, freely available in the marketplace and endorsed by government campaigns for smokecessation. No wonder share prices are stable for the industry! FACT

which option

Option 2

questions smokeless**problem definition**

Yes

which option

Option 3

questions consumer**problem definition**

Yes

which option

Option 2. This provides a short term and quicker solution than the move towards plain packaging. I consider that the manufacturers would enter into a long and drawn out legal case to fight the proposals to remove product identity, whereas improvements to consumer information would provide more information more quickly and allow greater levels of informed choice by smokers.

Option 2

regulation of ingredients**problem definition**

Yes

which option

Option 3

access to tobacco products**problem definition**

Yes

which option

Option 3. 6.3 – The removal and/or greater control of internet based sales will help, but I feel that much more effort should be put into reducing the flow of cheap and illicit tobacco products from the EU into the UK. Much of this trade results in young people having access to cheap sources of cigarettes and HRT. Stronger controls on the movement and seizure of such products would reduce the amounts available in the UK and in other Member states and allow those engaged in Tobacco Control (particularly those working on the prevention of uptake amongst young people) to promote positive messages around not smoking, rather than negative ones when the smoking has already commenced.

questions smokeless**problem definition**

Yes

which option

Option 3

additional comments

No

questions consumer

problem definition

Yes

which option

Option 3 would be best because it would stop the exploitation towards children, would stop the temptation to children if they were in a blank packet with just health warnings written all over it.

additional comments

Yes, ban tobacco advertising all together make shops keep them in a cabinet out of sight and just have the packets plain white with social norms displayed on them.

questions on reporting

problem definition

Yes

which option

Option 2, make all tobacco companies oblige by only one reporting format this would make it easier and more efficient.

additional comments

No

regulation of ingredients

problem definition

Yes

which option

Option 3a, make a standard list of tobacco products, using a positive list by listing ingredients that can be used rather than those that can't.

additional comments

no

access to tobacco products

problem definition

Yes

which option

Option 3c, banning the advertising of tobacco products in retail places, again this would stop the exploitation towards young people.

additional comments

Option 3 put together, ban cross-border sales, vending machines and tobacco advertising, stop exploitation all together.
