

Dear,

Please find below comments on the new variations guidelines.

I do not wish my comments to be made public.

C.I.8 b) says “Once the Article 57 database is functional,...” Clarification is needed. Does that mean July 2, 2012? If this is the case, this subsection is not relevant as the new proposed variations guidelines will be approved after that date.

Clarification is also needed regarding the last sentence of C.I.8 b): what do you mean by “reference for future updates to current version of the information, as included in the Article 57 database”. Does that mean that a generic sentence like “Please refer to current version of the information, as included in the Article 57 database” should be included in the Summary of PV System? It doesn’t seem appropriate as current information should be in the PV Summary.

Best regards,

Barbara Bovy.
