Operationalisation

OBJECTIVES

Objectives of this process are:

- Inventory of the needs in cancer care in Belgium using, on the one hand, recent information and technical working groups – drawing up a prioritization for Belgium
- Developing a process in which policy priorities, EBC/MoC opportunities and field activities can be optimally aligned so that the achievements or results bring about concrete improvements in cancer control and care
- Formulate proposals for initiatives that can contribute to improving cancer care
- Documenting website
- Organize an annual symposium on the activities within these initiatives
- Prepare annual report
- Develop methodology for evaluating the action (short, medium and long term impact)
