Dear Ulla.

This is Latvian Hospital Ass. comments
Concerning legal proposal on information on patient.

- we agree with reduction of bureaucracy, because of expenses, and it increase costs of real medicine .
- also, we need cross EU acceptance of medical technologies and drugs too, because in Latvia we faced cases there treatment was provided in France and follow up treatment in Latvia with prescription of French drugs , which are not accepted in this country, but but they are advertised by drug companies.
- what to do if after some years we faced harmful effect of drugs, which has been advertise before?
- what about food supplier's? This advertising have a great impact on humans health & mind, sometimes with quite harmful effect.
- generally, situation should be improved.

Jevgenijs Kalejs.
