# Joint Action „Health Inequalities and Migration“

## Work Package 6 Healthy Living Environments

Germany  
Bundeszentrale für gesundheitliche Aufklärung (BZgA)

# Content

► Objectives

► Tasks

► Deliverables

## Objectives

- identify and provide promising models of good practice
- identify factors which favour implementation of healthy living environments, and successful examples of initiatives to build them
- initiate and facilitate cross-country exchange and learning and contribute to capacity building to implement at least one feasible and/or complex action
- develop recommendations and policy advice

## Task 1

Objective: identify and provide promising models of good practice

- looking for strategies and policies supporting healthy living environments in participating MS countries
- looking for good and promising practices (policies and/or interventions) on improving living environments and reducing risk factors, and promoting healthy life styles and resilience factors across the life course and different population groups
- looking for relevant publications on strategies and policies on living environments having detrimental and conducive influence on health and equity in health

## Task 2

Objective: identify factors which favour implementation of healthy living environments, and successful examples of initiatives to build them

- identifying factors which favour creation and implementation of initiatives to build healthy living environments on the one hand and barriers hindering such actions on the other hand
- identifying the impact of healthy living environments on health and social outcomes and the financial implications

## Task 3

Objective: initiate and facilitate cross-country exchange and learning and contribute to capacity building to implement at least one feasible and/or complex action

- Initiating exchange between and for stakeholders from different sectors to get insight and learn about current inter-sectoral approaches and strategies in selected countries
- contributing to capacity building for MS interested in learning more about concrete and effective community actions in setting priorities, making decisions, planning strategies and implementing them to achieve better health

.....

- each MS participating in WP6 will then identify from the collected good practices at least one feasible and/or complex action from another country and implement it in its own country
- both, good/promising practices and lessons learned will provide an excellent source for WP6 for integration of similar approaches in national policies of the partner countries and seek for their sustainability also after the project life course

## Task 4

Objective: develop recommendations and policy advice

- elaborate an advocacy guidance for decision makers and stakeholders

# Deliverables

**Synthesis report**

**Case study booklet**

**Report** on relevant publications on strategies and policies

**Report** on capacity building roundtables, workshops and conferences

**Report** on factors which favour implementation of healthy living environments, and successful examples of initiatives to build them

**Report** on actions (at least one feasible and/or complex) implemented by MS in own countries

**Information Booklet** on various ESIF funds

**Advocacy guidance** including policy recommendations
