

Meeting of the Steering Group on Health Promotion, Disease Prevention and Management of Non-Communicable Diseases

Best practices of the agencies and national best practice portals

**The European Commission's
science and knowledge service
Joint Research Centre**

Magdalena STEPIEN

Welcome to the Best Practice Portal

This portal is a "one-stop shop" for consulting good and best practices collected in actions co-funded under the Health Programmes and for submitting practices for assessment. All practices in the areas of health promotion, disease prevention and the management of non-communicable diseases are welcome any time. Those practices that are selected as "best" against the criteria adopted by the Steering Group on Prevention and Promotion will also be published on this portal. Notably, they can also be presented to Member States representatives to raise their possible interest for transfer and broader implementation.

DG SANTE has made it a priority to identify, disseminate and transfer best practices in order to make progress in health promotion and in non-communicable disease prevention in Europe. DG SANTE also hopes these efforts will help reach the Sustainable Development Goal 3.4 to reduce premature mortality from non-communicable diseases by one-third by 2030, through prevention and treatment, and to also help reach the nine UN/WHO global voluntary targets for health.

In this section you can find

A repository of good and best practices that have been selected by actions funded under the Health Programmes such as CHRODIS, JANPA, RARHA, MHCompass, SCIROCCO, as well as the pilot project "Vulnerable" in the areas of, mental health, nutrition, physical activity, preventing harmful use of alcohol, prevention of non-communicable diseases and integrated care.

[Repository of best practices >](#)

This section is currently under construction.

It will include practices which have been selected as "best" after submission to this portal and information on projects which support the transfer of best practices from one Member State to others.

You can submit a practice for assessment

[Submit a Practice >](#)

Next steps

- Improve the outreach of the EU Public Health best practice portal
- Work closer with national and EU agencies best practice portals:
European Agency for Safety and Health at Work (EU-OSHA) and
European Monitoring Centre for Drugs and Drug Addiction (EMCDDA)

National and other EU best practice portals

How can we work with other portals to improve outreach?

- Cross-linking national and EU portals
- Invite the other portals to share their relevant best practices
- Provide access to the MT@EC automatic translation tool
- Enable access to our IT infrastructure (questionnaire & evaluation tools)
- ...

✓ Do you agree that working closely with national and other EU portals can maximise the visibility of the EU portal and the best practices hosted therein and ensure it can capture more relevant best practices now hosted in other portals?

✓ Do you think that the EU Best Practice portal should expand its scope even further to publish systematic reviews or syntheses of “what works”?

Please consider that the Commission already provides additional information on health promotion through the Health Promotion and Disease Prevention Knowledge Gateway

✓ Would you be interested in a webinar (or another type of event) on the EU-OSHA and EMCDDA portals, the practices they host and their evaluation processes?

Stay in touch!
