No

**explanations**  
Der erwachsene, wählende Bürger sollte selbst entscheiden können, was er will. z.B. Ich will immer noch die krummen Bananen, die zu kurzen Gurken mit starker Krümmung. Ich will nicht, besonders von der EU vorgeschrieben bekommen, was ich konsumiere und was nicht.

**which option**  
No change

**recommend option**  
Warum werden diese Seiten nicht auch in Deutsch angeboten? Warum muß ich Englisch verstehen und schreiben können. Schon wieder eine Bevormundung.

**additional comments**  
o.K. wir müssen die vielen Beamten der EU beschäftigen. Die Abgeordneten sollten sich um die wirklichen Probleme kümmern. Atomkraft, Bildungsmaßnahmen - Schulen- auf einen gehobenen Level anbieten, damit mehr mündige Bürger entscheiden können.

**which option**

No change

**questions consumer****problem definition**

No

**explanations**

ich möchte nicht meine Welt mit "Gut" und "Böse" - Plaketten verunstaltet bekommen. Ich bin mündiger Bürger, mehr als 10 Jahre allgemeingebildet und selbst zur Entscheidung fähig. Vorschriften zur Verpackungsgestaltung von Tabakwaren sind m.E. nicht erstrebenswert, denn dann muß und wird um der Gerechtigkeit willen bald auch weitere Regulierung meiner Lebensumwelt und -gestaltung folgen: Fahrradfahren ohne Airbag und ABS ist riskanter als z.B. fliegen, Lebensmittel mit Fructose-Sirup fördern meine Verfettung und führen zu Herz-Kreislauferkrankheiten, Leben in Städten oder Ballungsgebieten verkürzt aufgrund des gegenüber dem Landleben erhöhten durchschnittlichen Stresspegel meine durchschnittliche Lebenserwartung usw. - will man derlei Erkenntnisse demnächst auch durch Schreckensbilder und -voraussagen auf Fahrrädern, Keks- und Marmeladepackungen und Haustüren überall publizieren???? Wenn nicht (hoffentlich!!!!!!), dann unterlasse man das bitte auch auf Tabakverpackungen!

**which option**

No change

**additional option**

Information in Schule, evtl. Fernsehspots oder meinetwegen an Tabakverkaufsständen genügt völlig.

**questions scope**

**problem definition**

No

**explanations**

Der verantwortungsvolle Konsum von Nikotin/nikotinhaltigen Substanzen sollte - genau wie bei Alkohol - jedem selbst überlassen sein!

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

Wer bitte, nutzt rauchlose Tabakerzeugnisse, wenn er nicht vorher schon geraucht hat/ eine latent vorhandene Suchtstruktur da ist?

**which option**

No change

**questions consumer**

**problem definition**

No

**explanations**

Das verhält sich dann wohl ähnlich, wie mit Light-Produkten: Sobald Light drauf steht, kann man ja nicht mehr dick werden - wer das glaubt, glaubt auch, dass hellere Verpackungen von Tabakprodukten weniger schädliche Zusatzstoffe enthalten! Totaler Schwachsinn also. Abgesehen von angewiderten Blicken vom Nichtraucher-Nebentisch, konnte ich auch keinerlei Änderung des Rauchverhaltens in meinem Bekanntenkreis feststellen, seit NL und Belgien die "bunten Bildchen" von Raucherbeinen und Co. auf ihren Packungen haben-

**which option**

Improve consumer information

**which improvement**

Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package

**questions on reporting**

**problem definition**

No

**explanations**

Rauchen ist schädlich - Punkt. Ob der eine oder andere Zusatzstoff mein Herzinfarktisiko jetzt nochmal um 1% anhebt, ist mir da reichlich egal - und den meisten anderen Rauchern auch.

**which option**

No change

**regulation of ingredients****problem definition**

No

**explanations**

Schlimm genug, dass der Staat einem vorschreiben möchte, welche gesundheitsschädlichen Stoffe man von seinem eigenen Geld kaufen darf und welche nicht - aber eine EU-weite "NoGo"-Liste, die zudem dauernd aktualisiert, geprüft und überarbeitet werden muss, schafft zwar n paar Arbeitsplätze, aber sonst nur unnötige Arbeit.

Yes

**which option**

No change

**recommend option**

Regulation of any product covered by the Directive should be based on scientific evidence and evaluation.

**questions smokeless**

**problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

Any regulation should be evaluated on its benefits for the public. Bigger warnings and plain packaging wouldn't have any benefits as they don't reduce smoking rates and therefore don't reduce the harm caused by tobacco products. However they might well benefit the illicit trade and be therefore actually harmful measures for the public.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Due to the subsidiarity principle the enforcement of the regulation should remain in the competence of the Member States.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

Any regulation on ingredients should be based on scientific evidence on whether such regulation would reduce the toxicity of the products.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Any restrictions should be based on public benefit. The usage of vending machines can be age controlled and display bans provenly don't reduce smoking rates. Therefore the proposed measures would impose restrictions on the EU citizens without any benefits.

**which option**

Introducing the basic criteria on the EU level without a common list

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional comments**

ALL governments dont want to miss the taxes out of smoking... and as long as hte budgets are not able to do thr calculation without those taxes from tebecco it is ridiculous. seems like:"smoking i danerous - bu dstop smokng" mostffective way to prevent people from smoking is probably banning all tabacco from the EU... HAHHAHAHAHA and the lack of money? germany for example had more than 13 billion euro taxes from tabacco in 2009... if all germans stop smoking at once Mr schäuble takes a rope and looks for a tree....

Da es bislang keine eindeutigen Belege dafür gibt, dass geringerer Teergehalt in den Tabakprodukten, Einheitsverpackungen etc. den Konsum mindern bzw. eine geringere gesundheitliche Beeinträchtigung darstellen, ist eine Änderung der bestehenden Regelung von geringer Effektivität. Eine differenzierte Überarbeitung der bisherigen Regelung wäre unter Umständen überdenkenswert. So zum Beispiel der Schutz von Kindern und Jugendlichen vor Tabakgenuß, das heißt zum Beispiel weniger Werbung.

**questions smokeless  
problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer  
problem definition**

ich denke das eine detailliertere Aufklärung in Bezug auf Wirkung und Vorgängen im Körper in den Massenmedien vorgenommen und dargestellt werden sollte

**which option**

No change

**recommend option**

ich denke das eine detailliertere Aufklärung in Bezug auf Wirkung und Vorgängen im Körper in den Massenmedien vorgenommen und dargestellt werden sollte

**additional comments**

ich denke das Jugendliche, die verstehen was genau beim Rauchen passiert und wer wie dahinter steht und wie sowas getestet wird und das es nicht cool ist es lassen, außerdem kennt

jeder jemanden, der keucht, schwitzt, wiederlich hustet, fast kotzt und raucht und das ist deine Zukunft?

**questions smokeless**

**problem definition**

Yes

**which option**

Ban on all types of smokeless tobacco products

**additional comments**

schnupf und kautabak oder ähnliche Produkte sollten ganz genau auf ihre Folgen untersucht werden!

**questions consumer**

**problem definition**

Yes

**which option**

Improve consumer information

**which improvement**

Tar, nicotine and carbon monoxide levels to be replaced with general information on harmful substances in tobacco products; Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format; Introduce fees and sanctions

**regulation of ingredients**

**problem definition**

Yes

**which option**

Establish a common list of tobacco ingredients

**which one**

Establish a positive common list of tobacco ingredients; Establish a negative common list of tobacco ingredients

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults; Tobacco display and promotion at  
points of sales to be restricted

weiße Schachteln? Einheitsgebot? keine Werbung für Zigaretten? Horrorbilder auf den Verpackungen? Abschaffung der Automaten? ... >>> was für ein Schwachsinn!!! Jeder volljährige Mensch sollte selbst entscheiden ob, was und wieviel er raucht! Es ist schon mehr als unverschämte die Tabaksteuern ständig zu erhöhen! Was ist denn mit Alkohol? Wieviele Leute greifen in heutigen Zeiten immer öfter zu Alkohol und ruinieren dadurch ihr Leben? Wird dagegen etwas unternommen? Wenn dann sollte der Jugendschutz verschärft werden! Jedoch eine "Weißpackung" oder ähnliche Sinnlosigkeiten halte ich für den größten Schwachsinn überhaupt! Schon mal darüber nachgedacht wie Werbung und Design betrieben wird? Klar, sicherlich mithilfe von Maschinen. Aber dahinter stecken auch Arbeitsplätze!

**which option**

(German) Ich erkenne kein Problem darin, dass Produkte, die keine Tabakerzeugnisse im herkömmlichen Sinne sind, nicht von der EU als solche behandelt werden. Bevor nicht nachgewiesen ist, dass durch elektronische Zigaretten und ähnliches gesundheitliche Schäden entstehen könnten, die denen herkömmlicher Zigaretten vergleichbar sind, sollte der Bürger nicht über jedes vernünftige Maß hinaus bevormundet werden. Jeder mündige Bürger kann vor dem Konsum eines neuartigen Produkts für sich selbst eine Entscheidung über deren Nutzen- bzw. Schadenpotential treffen. Sollte das nicht gegeben sein, so ist es Aufgabe staatlicher Gewalt aufzuklären, statt zu bevormunden.

**which option**

No change

**recommend option**

Überparteiliche gesundheitliche Aufklärung, die auf wissenschaftlicher Basis und nicht ideologischen Gesichtspunkten fußt.

**questions smokeless**

36

**gender**

male

**questions scope****problem definition**

No

**explanations**

It's everyone's own decision whether to smoke or not. Each company should have the right to brand and promote their product like in any kind of other type of industry. Everyone should keep the right to buy and consume the product he wants to. Most important one should be able to choose between different flavours and product-types regardless of restrictions that are provided by law. It's highly important for modern economy to be able to provide products that differ from those from competitors, last but not least to be able to provide enough jobs for the people.

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

no comment, because there are is no such problem

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

As long as any product comes with a clear description of its ingredients there is no need for extending the directive. Everyone has to know for himself what to consume.

**which option**

Improve consumer information

**which improvement**

Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package

**questions on reporting**

**problem definition**

No

**explanations**

There are already more than enough warnings, shocking pictures etc on the boxes. The ingredients are listed as well. Every consumer already knows about the possible harm in which smoking and consumption of products that contain nicotine and other poison may result.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

If one thinks theres too much in it, he should simply not buy it. Everything's already clearly marked.

**which option**

Establish a common list of tobacco ingredients

**which one**

Establish a negative common list of tobacco ingredients

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this

statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Il n'y a pas d'études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entraîner une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s'approvisionner sur les marchés parallèles du tabac (achat à l'étranger ou de contrebande, ou sur internet). De telles mesures risquent de destabiliser et pénaliser économiquement le réseau des 28000 buralistes français organisés dans un réseau réglementé et sous tutelle de l'Etat.

**which option**

No change

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Cela risque d'entraîner une standardisation de la production avec comme conséquence une diminution de l'offre au fumeur adulte et responsable, et le risque de voir apparaître une augmentation des produits du tabac contrefaits.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access; Ban

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale

**which one2**

Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

**additional comments**

Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. La France dispose d'un réseau de 28000 buralistes, préposés de l'administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortement réglementé par l'Etat ce qui permet déjà de contrôler efficacement l'accès au produit tabac.

Wenn es keine anderen Probleme gibt in der EU, kann man solche Sachen anfangen zu hinterfragen. Sollange Staaten wie Griechenland, Irland, Spanien usw. kurz vor dem Kollaps stehen, sollte die EU überlegen, was denn wirklich die Bürger gefährdet --> unsere EU-Beamten und Bürokraten, die nicht fähig sind, den Euro stabil zu halten .

**which option**

Ich denke, daß es nicht richtig ist, daß dieser Fragebogen AUSSCHLIESSLICH in englisch zur Verfügung gestellt ist. Gerade in den Staaten des früheren Ostblocks sind viele Menschen über 40 Jahren, die KEIN ENGLISCH verstehen und somit von der Umfrage von VORNEHEREIN ausgeschlossen sind. Es besteht für diese Leute KEINERLEI Möglichkeit, die Fragen zu verstehen, geschweisedenn zu beantworten. Ich halte das für einen KLAREN VERSTOSS GEGEN geltende Regelungen. Wer eine solche Umfrage beauftragt und damit Steuergelder rauswirft (die man vorher den Rauchern abgeknöpft hat), der sollte sich schämen. Die EU hat uns schon Bananenkrümmungsradien, Gurkenlängenmaße, usw. vorgeschrieben. Was hat es gebracht - NULL !!! Fuck the EU

Keine weitere Empfehlung seitens TBGH

**questions consumer**  
**problem definition**  
No

**explanations**  
Es gibt unseres ERachtens keine wissenschaftlichen Beweise dafür, das größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

**which option**  
No change

**additional option**  
Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eine anderen Messverfahrens( zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

**questions on reporting****problem definition**

No

**explanations**

Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Der Fokus bei der Evaluierung von Zusatzstoffen sollte Grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die Toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

**which option**

No change

**additional option**

Internetkäufe könnten z.B. durch Altersbegrenzungen eingeschränkt werden.

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an

appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**explanations**

I disagree with the problem definition. The problem definition provided by the Consultation document is vague, confused and inaccurate. There is no analysis within the Consultation document of Union competence to adopt the proposed options and no discussion of the internal market issues that would be required in order for the Union to proceed on the proposed option. Furthermore, the problem definition does not contain any evidence to demonstrate the justification for the various options provided in this section

**which option**

No change

**recommend option**

NO

**additional comments**

NO

**questions smokeless****problem definition**

No

**comments**

No, the problem definition is not acceptable as drafted. It is vague, confused and unclear. Statements in the problem definition address all smokeless tobacco products without making any differentiation between the various types of products in this category. By ignoring this variety, the Consultation creates confusion rather than providing clarity to allow for objective policy choices.

**which option**

Lifting the ban on snus

**additional option**

NO

**additional comments**

Snus is legally sold in a number of countries worldwide and we believe there is no justification for a ban on snus within the EU.

**questions consumer****problem definition**

No

**explanations**

No. There is no credible or scientific evidence which demonstrates this is a necessary step. This problem definition tries to cover too many options at once. Packaging provides consumers who wish to purchase products with information about the product they have chosen. Tobacco packaging has never been identified as a reason why children start to smoke or why adult smokers continue to choose to smoke. Plain packaging would lead to an increase in counterfeit products and illicit trade. It will have a negative impact on competition. Plain packaging expropriates the brand owners of valuable intellectual property. Pictorial health warnings make no additional contribution to the public awareness of the risks.

**which option**

No change

**additional option**

no

**additional comments**

no

**questions on reporting****problem definition**

No

**explanations**

All EU Member States need to agree to and adopt the common reporting format for ingredient reporting in a fully harmonized way. Introducing fees and sanctions is clearly outside the Commission's competence. With regard to this option, the Commission has also failed to analyse the impact of registration fees on the functioning of the Internal Market as the level of

fees would vary between Member States and would impede its functioning. Also, registration fees would likely lead to a further increase of Anti-Illicit Trade.

**which option**

Establish a common compulsory reporting format

**additional options**

no

**additional comments**

no

**regulation of ingredients**

**problem definition**

No

**explanations**

, I do not agree with the problem definition. The concept “attractiveness” is an unsound base for regulation. Ingredients give brands distinctive styles -> competition. Ingredients also apply to substances in the non-tobacco materials needed to eg. filter, paper adhesive etc. There is no evidence that ingredients enhance or in themselves are addictive. The problem definition incorrectly defines the use of ingredients and claims without foundation that the majority form carcinogens, mutagens and/or toxic for reproduction. In the case of, for example, mentholated cigarettes have been available for several decades yet there is no credible scientific evidence to suggest that their use is associated with increased smoking incidence, increased consumption, change in smoking behavior or reduced quitting rates compared to other cigarettes. Furthermore, there is no evidence that smokers of mentholated cigarettes inhale more deeply.

**which option**

No Change

**additional option**

No, but a common list of authorised ingredients could be generated using both sound and scientific principles and criteria.

**additional comments**

no

**access to tobacco products**

**problem definition**

No

**explanations**

problem definition is vague and incomplete. The display of tobacco products at PoS is important to the proper operation of a market economy in the sale of legal tobacco products. It informs the consumer of the products available, their characteristics, their price and the pack sizes available. Particularly in situations where other channels of communication may be restricted, consumers must be able to identify easily, quickly and effectively the existence and availability of tobacco products and to distinguish between them. Product display ban could

exacerbate the illicit trade in contraband and counterfeit products. Consumers would not be able to distinguish legally traded and illicit products. Vending: vending machines in Belgium are strictly controlled to prevent sales to children. It is therefore unnecessary and disproportionate to prohibit tobacco vending;

**gender**

female

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

in my view neither bigger warnings nor picture warnings or plain packs are required in case of cigars. Cigar smokers are adults, enjoying a cigar on an occasional basis.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

EU member states can already introduce fees and sanctions

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

In my view a display ban would effectively mean the end of most small(cigar) brands

Yes

**which option**

No change

**questions smokeless  
problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer  
problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting  
problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients  
problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope****problem definition**

No

**explanations**

Ich finde es legitim, dass die Tabakindustrie weiterhin Werbung für Ihre Produkte machen darf. Das Thema Erkrankungen durch Nikotin ist in der heutigen Gesellschaft hinreichend bekannt und den Menschen bewusst. Daher stimme ich gegen eine Verschärfung der Richtlinien!

**which option**

No change

**additional comments**

Nein (siehe oben)

**questions smokeless****problem definition**

No

**comments**

Wie zuvor beantwortet, finde ich eine weitere Einschränkung der Tabakindustrie überflüssig, da das Thema Rauchen mittlerweile sehr publik ist und die Folgen hinreichend erklärt sind. Daher sehe ich keine Chancengleichheit gegenüber anderen Branchen (bspw. Mc Donalds - ungesunde Produkte, die zu Fettleibigkeit führen). Eine solche Industrie wurde in den letzten Jahren kaum bestraft oder in Ihrer Werbemöglichkeit eingeschränkt!

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**age**

54

**gender**

male

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

There is no evidence that bigger warnings are more effective and that plain packaging would improve the functioning of internal market or have any public health benefits. It would make it easier for criminals to copy and would lead to an increase in illegal sales of cigarettes.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

There is no clear problem stated as regards either vending machines or point of sale display.  
There is no evidence provided why bans would improve the functioning of internal market or advance any public health objectives.

**which option**

No change

**questions scope  
problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Benutze selber E-zigaretten und störe damit keinen in meiner Umgebung. Warum sollte man das verbieten, was scheinbar weniger schädlich ist und man damit sogar leichter zum Rauchen aufhören kann. Ein Mittel welches ausnahmsweise weniger kostet als normales Rauchen und gleichwertige Produkte mit denen man zum Rauchen aufhören kann. Wenn das auch noch besteuert oder gar verboten wird, zeigt damit die EU, dass man gar nicht zum Rauchen aufhören soll, denn sie braucht die Steuern.

**gender**

female

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer  
problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting  
problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No

**explanations**

Ih glaube nicht, dass abschreckende Bilder einen Suchtraucher davon abschrecken weiterhin Zigaretten zu rauchen. Man sollte auch zwischen Zigarettschachteln und Zigarrenboxen unterscheiden. Die Zigarette ist vor allem Suchtmittel, die Zigarre überwiegend Genußmittel. Eine Zigarrenbox mit abschreckenden Bildern ist idiotisch.

**gender**

female

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**  
**problem definition**  
Yes

**which option**  
No change

**questions smokeless**  
**problem definition**  
No

**comments**  
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**  
No change

**additional comments**  
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**  
**problem definition**  
Yes

**which option**  
Establish a common compulsory reporting format

**regulation of ingredients**  
**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**  
**problem definition**  
Yes

**which option**  
No change

**questions smokeless**  
**problem definition**  
No

**comments**  
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**  
No change

**additional comments**  
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**  
**problem definition**  
Yes

**which option**  
Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

#### **questions scope**

##### **problem definition**

No

#### **explanations**

Mir als deutschem Staatsbürger geht mittlerweile die Regelungswut der EU massiv "gegen den Strich", soll heißen, dass ich davon "die Nase voll habe"! Ich bin dagegen, dass seitens der EU immer mehr Restriktionen auf uns Staatsbürger hernieder prasseln. Die sogenannte "Harmonisierung" von Gesetzen und Vorschriften seitens der EU hat in den vergangenen Jahren nach meinen Feststellungen und meinem Empfinden die guten und ausreichenden deutschen Standards verwässert! Ich gebe gerne ein Beispiel. Wie kann es sein, dass ich in einem spanischen Hotel den Hinweis vorfinde, dass ich das Wasser aus der Leitung in meinem Badezimmer besser nicht trinke, sondern nur Mineralwasser, was in der Rezeption zu kaufen ist? Auch spanisches Wasser hat den gleichen Qualitätsanspruch wie deutsches Wasser zu erfüllen! Hier in Deutschland kann ich Leitungswasser trinken, in Spanien nicht. Erledigen Sie, meine Damen und Herren, die bei der EU Verantwortung tragen, erst einmal alle Ihre Aufgaben gemäß der bestehenden Rechtslage, bevor Sie sich neuen, nach meiner Ansicht überflüssigen Bereichen zuwenden, die Sie noch zu regeln der Ansicht sind. ES REICHT!!!!!!! Und dann sollten Sie auch dafür Sorge tragen, dass die bestehenden Gesetze, Erlasse, Verfügungen und sonstigen Vorschriften eingehalten werden, bevor Sie weitere neue erlassen!

#### **which option**

No change

#### **recommend option**

Die EU sollte uns Verbraucher endlich als mündige Bürger behandeln und nicht als "kleine

Kinder", denen alles vorgeschrieben werden muss!!!! Ich brauche, ja ich dulde im Bereich des Tabakkonsums keine weiteren Bevormundungen!!! Es reicht mit Ihrer Regelungswut!

**additional comments**

Sie sollten lieber dafür sorgen, dass Sie mit den den bestehenden Riesenbudgets, die der EU schon heute zur Verfügung stehen, auskommen! Stichwort: EU-Anleihen! Sie brauchen sich über eine "Europamüdigkeit" seitens der Staatsbürger nicht zu wundern, wenn wir Europa nur noch durch Regelungswut des Gesetzgebers erfahren!

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Es gilt auch für Tabakerzeugnisse die Markenfreiheit. Hier wird in die Markenfreiheit der Unternehmen eingegriffen. Dies kann ich nicht befürworten. Schuhe werden doch auch nicht in einer einzigen Form angeboten bzw. in einer farbe oder Alkohol wird doch auch nicht in einer "Einheitsflasche" abgefüllt.

**which option**  
No change

**recommend option**  
Alles so lassen wie es ist, denn die Hinweise auf den Packungen reichen doch aus und vor allem die Raucher wissen doch, worauf sie sich einlassen. Vielleicht sollten solche Hinweise auch auf Alkoholflaschen eingeführt werden. Eine Marke ist dagegen nur durch ihre Aufmachung erkennbar, auch wenn es sich um Tabakprodukte handelt.

**questions smokeless**  
**problem definition**  
No

**comments**  
Dieser Quatsch sollte aufgehoben werden, die EU mischt sowieso in viel zu vielen Sachen mit. Ich sage nur "Krümmung von Gurken und Bananen". So ein überheblicher Müll. Selbst in der EU gibt es Menschen, die hungern, frieren etc. Dieses Problem zu klären wäre von größerer Bedeutung!!!

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
Es gibt bereits Warnhinweise auf den Packungen. Deshalb sage ich, jede Marke hat ihren eigenen Stil und da hat sich niemand, auch nicht die EU, einzumischen.

**which option**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**

**problem definition**

Yes

**which option**

Extend the scope of the Directive

**additional comments**

Verbote oder Steuern sollten nur auf echte Tabak-Produkte gelten. E-Zigaretten z.B. verbrennen oder verdampfen keinen Tabak sondern nur Nikotin. Natürlich ist das immer noch gesundheitsschädlich, aber immerhin ist kein Teer oder ähnlicher Dreck enthalten. E-Zigaretten zu verbieten wäre meiner Meinung nach kontraproduktiv, vieler meiner Bekannten sind darauf umgestiegen und würden bei einem Verbot wieder zur "stinkigen" Zigarette greifen. Wenn dann sollte eine Nikotinsteuer eingeführt werden statt der Tabaksteuer und ggf. neben den Tabakprodukten auch die Liquids für die E- Zigaretten damit besteuert werden.

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Il n'y a pas d'études scientifiques efficaces prouvant les risques concernant les produits du tabac sans fumée

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entraîner une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger ou de contrebande, ou sur internet. De telles mesures risquent de destabiliser et pénaliser économiquement le réseau des 28000 buralistes français organisés dans un réseau réglementé et sous tutelle de l'Etat.

**which option**

No change

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

Es ist schon viel zu viel geregelt. Jeder Mensch soll selbst entscheiden können, wie er lebt. Natürlich muss jeder die Rechte und das Wohl der anderen achten. Aber die freie Selbstbestimmung darf nicht beschränkt werden.

**which option**

No change

**recommend option**

Aufklärung der Menschen über Risiken und Nebenwirkungen sowie Verbot für junge Menschen bis zum Alter von 18 Jahren ist völlig ausreichend. Durch die hohe Besteuerung ist der betroffene Personenkreis sowieso schon eingeschränkt.

**questions smokeless**

**problem definition**

No

**comments**

Die gesundheitliche Gefährdung ist minimal, ein Verbot völlig überzogen.

**which option**

Lifting the ban on snus

**additional option**

Wenn man den Genuss einschränken will, braucht man nur die Steuer auf das Niveau der Tabaksteuer anzuheben.

**questions consumer**

**problem definition**

No

**explanations**

Alkohol und ungesunde Lebensmittel (Süßigkeiten, Hamburger, Limonaden etc.) sind auch verkaufsfördernd verpackt, können aber erheblich mehr Schaden an der Volksgesundheit anrichten. Wenn man dieses Vorhaben konsequent umsetzen würde, gäbe es Champagner in weißen in Packpapier gewickelten Flaschen mit Bildern von kotzenden Pennern, auf der Speisekarte von gutbürgerlichen Restaurants wären fettleibige, häßliche Menschen abgebildet und Dessous würden in Pappkartons mit Bildern von Gonorrhoe im Endstadium verkauft.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Bevor man Meldepflichten und damit weitere Bürokratie einführt, muss zunächst ein

verbindliches, durchschaubares System entwickelt werden. Außerdem sollte man den Nutzen überprüfen.

**which option**

No change

**regulation of ingredients**

**problem definition**

**gender**

male

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free

market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;

Access to vending machines to be restricted to adults

**additional option**

#### **explanations**

As I am not the addicted cigarette smoker but puffing my cigars for my pleasure, as one purchases fine fruit, pralines or pies, I insist on being capable to buy them as seen. For one still buys fruit, ham, cheese and pralines according to the sensual impression in the shop or on the market and not via lists containing only technical data. Therefore, methinks, this step ought to be reconsidered thoroughly, after the persons in charge had been led through a larger humidor in a major cigar shop.

#### **which option**

Extend the scope of the Directive

#### **recommend option**

Exclusion of cigars as cultural (Cortez, Churchill and so forth) heritage and luxury - not nicotine-addiction.

**questions scope****problem definition**

No

**explanations**

Jeder Mensch hat das Recht, selbst zu entscheiden, ob er rauchen möchte, oder nicht. Das Verbot von Tabakwerbung ist absolut in Ordnung. Auch sollte das Rauchen nicht verharmlost werden. Aber es gibt viele Raucher, die dies als absoluten Genuß empfinden. Durch übertriebene Rauchverbote sind sie bereits diskriminiert worden. Wenn man jetzt noch die angekündigten Sanktionen einführt, dann ist das förmlich ein Eingriff in die Privatsphäre und in die Freiheitsrechte eines jeden Menschen. Es sollte besser etwas gegen Alkoholmißbrauch und die Verharmlosung von Alkohol unternommen werden. Das halte ich für ein sehr viel größeres Problem.

**questions scope**  
**problem definition**  
Yes

**which option**  
No change

**questions smokeless**  
**problem definition**  
No

**comments**  
No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**  
No change

**additional comments**  
The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**  
**problem definition**  
Yes

**which option**  
Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope**

**problem definition**

No

**explanations**

Die EU würde ihre Kompetenzen überschreiten, zumal sie völlig außer acht lässt, wie die Gepflogenheiten in den einzelnen Mitgliedsländern sind. Diese können das schon selber regeln, wenn nötig.

**which option**

No change

**questions smokeless****problem definition**

No

**which option**

No change

**additional option**

In jedem Mitgliedsstaat ist das Rauchen erst mit der Volljährigkeit erlaubt, Daher ist jeder alt genug, um zu entscheiden, welche Art Tabakprodukt er zu sich nimmt.

**additional comments**

Nein.

**questions consumer****problem definition**

No

**explanations**

Bilder sind sinnlos; dann legt man die Zigaretten eben wie früher in Etuis. Also kann man sich den ganzen Aufwand sparen.

**which option**

No change

**additional option**

Eltern bestrafen, die ihre Aufsichtspflicht vernachlässigen, und zulassen, dass sich ihre Kinder selbst schädigen. Die sind schließlich schuld daran, wenn sie ihren Kindern das durchgehen lassen. Alle anderen sind alt und mündig genug, um zu wissen, was sie sich antun.

**additional comments**

Nein.

**questions on reporting****problem definition**

No

**explanations**

Jedes Mitgliedsland weiß am Besten, wie es seine Bürger aufklären soll und muss. Dafür braucht es nicht die EU.

**which option**

No change

**additional options**

Dies wäre bloß unnötiger Verwaltungsaufwand.

**additional comments**

Nein.

**regulation of ingredients****problem definition**

No

**explanations**

Bzgl. der suchterregenden Zusatzstoffe stimme ich zu, allerdings nicht hinsichtlich von Stoffen bzgl. der "Attraktivität". Wie genau ist das hier definiert? Gehört zB auch Menthol dazu? Ansonsten sollten alle Folien- und Blähtabake verboten werden!

**which option**

Establish a common list of tobacco ingredients

**which one**

Establish a negative common list of tobacco ingredients

**additional option**

Auf dieser Liste sollten alle Stoffe wie zB Ammoniak, die in Zigaretten nichts zu suchen haben, aufgeführt werden. In der Natur vorkommende Stoffe, wie Lakritz, Menthol, Salbei o.ä. sind meines Erachtens in Ordnung.

**additional comments**

Nein.

**access to tobacco products****problem definition**

No

**explanations**

Wegen Tabakwerbung hat noch keiner angefangen zu rauchen. Das macht man als Mutprobe o.ä. Pornos oder Gewaltfilme können je nach Land auch per Versandhandel verschickt werden. Jedes Land sollte das auch für sich bei Tabakprodukten bestimmen.

**which option**

No change

**additional option**

In Deutschland muss man seinen Personalausweis oder seine Bankkarte durch Zigarettenautomaten ziehen, um an die Ware zu kommen; Minderjährige sind so geschützt. Werbung sollte erlaubt bleiben - allein schon zu Informationszwecken. Zudem erscheint es völlig schwachsinnig, Werbung für Zigaretten oder Tabak da verbieten zu wollen, wo ich doch nur solche Produkte kaufen kann!

**additional comments**

Nein.

### **additional comments**

The EU citizens do not require regulation in all areas of life. I think the idea to ban smoking from public places in part was ok, but the most important part (public transportation) esp. in Germany the Deutsche Bahn was forgotten. The initiative would clearly go to far in making products undifferentiated. I only smoke ocasionally, but I want to enjoy high quality permium branded products when I do.

**additional comments**

Every human is responsible for his own health and his life. With all these rules you take the people their own way of thinking about things and this is not good. If people want to smoke, they should can do it. If restaurants want to have smoking areas, they should may have them. We are human, because we usually o the right decissions for our life. If everything is ruled, we will be like roboters anytime, because we never need to think about anything, because everything is ruled by the state. In my meaning this is not good. But if it is the way of our state, i'll have to go it and i'll do it. Maybe it ismuch better, to give the people more freedom an responsibility.

male

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer  
problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Es ist eine Frechheit ohnegleichen, daß Politiker die persönliche Freiheit immer weiter einschränken. Jedem sollte selbst überlassen bleiben, ob er raucht oder nicht. Der Nichtraucherschutz ist doch bloß eine dämliche Ausrede für die immer weitergehende Einschränkung der Freiheit der Bevölkerung. Außerdem erscheint es mir sehr merkwürdig, daß wir die durch die Tabaksteuer sehr teuren Tabakerzeugnisse kaufen sollen, sie aber fast nirgends mehr konsumieren dürfen.

**additional comments**

Diese Blödmänner in Brüssel und den nationalen Regierungen sollten sich endlich einmal um die wahren Probleme dieser Welt kümmern.

**gender**

male

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent

proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale; Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting****problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**gender**

male

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

No scientific evidence concerning the risks related to smokeless tobacco products

consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging

because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis

of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

Es macht keinen Unterschied ob Warnungen auf der Schachtel stehen oder nicht. Im Gegenteil macht das Verbotene ja noch eher den Reiz für die Jugend aus. Je mehr das Thema reglementiert und verteufelt wird, desto mehr werden neugierige Jugendliche angezogen. Wenn sie dann einmal süchtig geworden sind ist es egal was auf der Schachtel steht. Ich möchte behaupten, dass jeder Raucher des Problems bewusst ist und das Risiko billigend in Kauf nimmt. Statt die Schachteln der Hersteller einheitlich zu gestalten und mit noch mehr Warnungen zu versehen, sollte der Preis einfach schmerzhaft angehoben werden und zwar in allen EU-Staaten, auch im Ostblock.

**which option**

No change

**recommend option**

Anheben der Tabakpreise auch in den Ostblockstaaten auf empfindliche Werte.

**questions scope**

**problem definition**

Yes

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

No scientific evidence concerning the risks related to smokeless tobacco products consumption.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

No scientific evidence proving that bigger warnings determine a better knowledge of the suggested messages; no scientific evidence on the relation between the use of a particular graphic and the impact on consumers.

**which option**

No change

**additional comments**

The knowledge of how harmful tobacco would be is already of a high level, also on the basis of the existing warnings; no value added by the increase of information; negative impact on the fulfilments of sector's operators and of tobacco retailers; full aversion to plain packaging because of the confusion on manufacturers identification brands, with a consequent proliferation of illegal trade of counterfeited as well as smuggled products.

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

It is not possible to prove in advance which is the possible impact of an ingredient in terms of toxicity; targeting lists in advance, positively or negatively, would be in contrast with this statement; risk of product standardisation with a consequent reduction of the principle of free market and the risk of increase of counterfeited products.

**which option**

No Change

**access to tobacco products**

**problem definition**

Yes

**which option**

Controlled supply and access

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

Sale to be carried out only within a network of specialized shops, provided with an appropriate license, which main activity is tobacco sale.

**additional comments**

There is no evidence of the correlation between display ban and consumption bent. In other experiences – see Canada – important loss have been recorded for the tobacco retailers: structural reorganization of the shop, higher management costs and important reduction of the profitability with the consequent risk of giving up the business. Also increasing of illegal products sale (counterfeited and smuggled).

**name**

Holger Hirschfeld

**email**

hirschfeld@gmx.de

**country**

Germany

**age**

41

**gender**

male

**questions scope**

**problem definition**

No

**explanations**

I don't think that the problem is caused by the way tobacco products are presented or packaged. I think responsible USE of Tobacco and / or alcohol is a question of education and of parental influence. I furthermore think every EU Citizen should have the freedom to decide on his own which risk he is willing to accept and which sort and amount of legal drugs he or she consumes.

**which option**

No change

**recommend option**

I feel the situation of nicotin, alcohol and other "soft drugs" should generally be treated equally. I especially don't see why nicotine is demonized, while the socially accepted "Red Wine Fraction" can do what ever they want. Why is wine so much better? If you count the many casualties on the smokers fraction, why don't you care about the alcohol a comparably way? Why don't you intend to make wine bottles as unattractive as cigarette boxes?

**additional comments**

I think the EU Campains against smoking is - at the moment - a discrimination against free people and their human right to decide on their own. By the way: I am a "Casual smoker" for about 10 years now. NOT Addicted. How can I be sure? Well, because of a traffic accident, I had to undergo an operation some weeks ago. And I had absolutly no problem not to smoke 4 weeks before the operation to decrease the risk of the anesthetics. I've had several periods of abstinence over 4-6- weeks (just to be sure!) and I had no problem with it. Furthermore I think that the total ban of Cannabis products is - compared to your tobacco and alcohol-politics - inconsequent. I plead for a controlled legal sale (for example via pharmacies) with controlled quality and quantity per person. I don't understand why it is illegal to own the smallest amount of cannabis, but Legal to buy 10 Bottles of Whisky or Wine. Of course I am NOT a consument of cannabis. Because its illegal. But thats the only reason. (Sorry if my language is not perfect).

**questions smokeless**

**problem definition**

No

**comments**

I think that the act of smoking is part of a cultural proceder. Smokeless Products is like going into a church without praying.

**which option**

No change

**questions consumer  
problem definition**

No

**explanations**

I think the consumer doesn't lack information. EVERYBODY knows smoking inflicts certain risks for your health - so does drinking, eating to much fat or sugar, moving your body not often enough, driving motorbikes, climbing mountains... The point is: THIS is the spice of life!

**which option**

No change

**additional comments**

You max prolong the life of people. But have you ever thought that you may bore them to death?

**questions on reporting  
problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**additional options**

I think transparency and information is a good way to help people to decide on their own. This should be improved.

**regulation of ingredients****problem definition**

No

**explanations**

I think you regulate too much already. Variety is important, too!

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

As long as you assure that only People of 18 years or older, there should be no further regulations on access.

**which option**

No change

**additional option**

The point is: Haven't you ever heard that in the time of when Alcohol was illegal in the USA, the consumption was higher than before? ALL your attempts to prevent minors from smoking have failed so far. I see many 13, 14, 15 year old teenagers who have absolutely NO problem in getting cigarettes, although officially you can't buy them here until you're 18.

**explanations**

Da jeder Mensch der raucht erwachsen ist und selbst für sein Leben entscheiden muss was gut und was schlecht für ihn ist. Desweiteren sind alle Bürger der Eu denke ich so weit aufgeklärt das sie wissen wie schädlich rauchen ist und das sie dies auf eigenes Risiko tun.

**which option**

No change

**recommend option**

Ich denke die Warnhinweise die jetzt schon auf der Packung sind, sind vollkommen ausreichend. Wer rauchen will soll das tun und wehn es stört soll einfach die Orte meiden an denen geraucht wird. (Sage ich als Nichtraucher)

**additional comments**

Wenn ihr keine Raucher wollt dann fangt eure Prevention schon in der Grundschule an. Und macht Zigaretten für unter 18 jährige unzugänglich, oder verhängt strafen für das rauchen

unter 18 wenn ihr was preventives machen wollt.

**gender**

male

**questions scope****problem definition**

No

**explanations**

This measure does not provide a free-market at all. This will lead to governmental control, where should not be one. It's not the topic, that there should not be fair and free information about the risk of smoking. But brands and marketing should stay possible for tobacco-companies. Customers should have the choice between several companies providing

cigarettes.

**which option**

No change

**recommend option**

If you like to reduce the rate of people who are smoking. Start with prevention in school-age and don't try to change the habits of people who kept smoking for decades, because they probably won't stop. And additionally it would make sense to prevent alcoholism, because there is a significant relation between people who drink and smoke.

**additional comments**

No comment. But a question: Does all this "European"-laws really make sense and do they lead to more health, efficiency or a better working democracy? I don't think so. In my opinion there should be things which can be decided by citizens and not the government.

**questions smokeless**

**problem definition**

No

**comments**

Free market is more important than senseless horror pictures on tobacco products. And most people are actually not able to see the long-term risk of smoking. Sure they know smoking causes cancer, but they can't see several other important relations between general unhealthy living and higher morbidity. And smoking is a reason for dying earlier, but the reasons are connected much more like wrong diet, alcohol, drugs, lack of sport and so on.

**which option**

No change

**additional option**

Free market and competition must be allowed also for tobacco companies. If not, there should be regulation for producers of alcohol and unhealthy food. Where is the color-coded diet-system which tells customers, which food is healthy which not by colors like red for unhealthy and green for healthy? Fat is man-killer number one!!!!

**additional comments**

NO

**comments**

Das Verbot von Snus oder ähnlichen rauchlosen Tabakwaren ist absolut unbegründet. Es gibt keinerlei wissenschaftliche Studien darüber ob Rauchloser Tabak zum Genuss von Rauchbaren tabak animiert. Zudem spricht dagegen , dass es vermehrt ehemalige raucher gibt die auf rauchlosen tabak zurückgreifen. Somit gefährdet der Nutzer dieser Waren nur sich selbst, ein passivrauchen ist nicht möglich.

**explanations**

Sicherlich sollte der Zugang zu Jugendlichen untersagt sein, jedoch nicht dadurch das man den Kunden kriminalisiert und eine Ware "unter dem Tisch" kaufen muss. Tabaknutzer sind keine Verbrecher die sich dafür schämen müssen. Auch sollte es weiterhin erlaubt sein Tabakprodukte online zu bestellen. Es ist jedermanns eigenes Risiko wo und wie sie ihre Tabakprodukte kaufen

**recommend option**

In our opinion an extension of the scope of the Directive in order to include other categories different from tobacco products (such as electronic cigarettes, herbal cigarettes, nicotine drinks and nicotine sweets) would not be effective since is not based on scientific evidence proving that these products are as harmful as tobacco products.

**questions smokeless**

**problem definition**

No

**comments**

La spiegazione dettagliata è nello spazio relativo alla scelta dell'opzione

**which option**

Lifting the ban on snus

**additional option**

We deem that the problem is first of all largely misrepresented. The current Tobacco Products Directive bans one smokeless tobacco category while leaving the rest unregulated. Under an economic perspective it seems unjustified that "snus" (a smokeless tobacco product) commercialisation is allowed only in Sweden and banned in all other EU countries. This ban implies that millions of EU smokers are denied an alternative to cigarettes and introduces a distortion to the fundamental principle of freedom of goods movement. Regarding health issues, several scientific studies demonstrate that in Sweden smoking related diseases incidence has been reduced compared to EU average thanks to the use of "snus" and smoking prevalence is lower than EU average. Furthermore, also the SCENIHR Report (Scientific Committee on Emerging and Newly Identified Health Risks) asserts that, among the smokeless tobacco products on the market, products such as Swedish "snus" are considerably less hazardous than cigarettes. In our opinion, these data show the effectiveness of "snus" as a

potential support means to stop tobacco consumption. Therefore, we hope that “snus” will be commercialised in all EU countries, also eliminating the current distortion in the internal market.

**questions consumer  
problem definition**

No

**explanations**

La spiegazione dettagliata è nello spazio relativo alla scelta dell'opzione

**which option**

No change

**additional option**

We believe that the awareness of health risks linked to the product does not increase with the use of pictorial health warnings (PHWs) nor with the health warnings size and specific placement on the package. In fact, data from Member States where these particular warnings are compulsory (Belgium and UK), demonstrate that there is no significant incidence, in terms of cigarettes consumption dissuasion, deriving from this measure. That is why we deem that the possibility to insert pictorial health warnings should remain prerogative of the Member States. In relation to the option 2b, suggesting the substitution of TNCO (tar, nicotine and carbon monoxide) levels information with general information on harmful substances in tobacco products, in our view, too much information on the package or in pack inserts could mislead consumers. Then, according to us, information related to contents, ingredients and smoking products components could be properly communicated through other means such as web sites, telephone services etc. Moreover, the introduction of rules to standardise packaging for all products on the market (e.g. the so called plain packaging or constraints on colour use) as suggested by option 3, could seriously undermine the survival of the legal industry due to the fact that it would make it much easier for criminals to copy packs therefore increasing illicit trade. On the other hand, serious doubts arise when considering the consistency of this measure with several internationally recognized fundamental rights such as competition protection, free entrepreneurial initiative protection, protection of trademark ownership and usage. Plain packaging would as a matter of fact constitute an illegal deprivation of trademarks and, consequently, of brand equity for the legal cigarette business, as well as a restriction of consumers' possibility to choose their usual brands.

**questions on reporting  
problem definition**

No

**explanations**

La spiegazione dettagliata è nello spazio relativo alla scelta dell'opzione

**which option**

Establish a common compulsory reporting format

**additional options**

In our opinion it is important that a common reporting format is established at EU level to favour data collection and comparison. However, any reporting system should be designed in

such a way to protect manufacturers' trade secrets, which constitute essential intangible assets which should not be put at risk. As far as fees and sanctions are concerned, Member States can already introduce registration fees and also impose sanctions for non compliance with the Directive on ingredients reporting. We then consider the enforcement a subject which should remain in the domain of the Member States, since amount of fees and sanctions would still be within their competence.

### **regulation of ingredients**

#### **problem definition**

No

#### **explanations**

La spiegazione dettagliata è nello spazio relativo alla scelta dell'opzione

#### **which option**

No Change

#### **additional option**

We deem that tobacco ingredients' regulation should remain in the domain of Member States, as already foreseen by the current Directive. This position is supported also by the results of the SCENIHR Report (Scientific Committee on Emerging and Newly Identified Health Risks), which, on behalf of the European Commission, evaluated the role of ingredients with reference to their addictiveness and attractiveness. Studies on addictiveness, in fact, did not prove the addictive potential of the single ingredients used in tobacco products still confirming the addictiveness of nicotine. On the other side, as attractiveness is concerned, this is an arbitrary and subjective concept with no scientific basis. That is why the possibility of option 2 to introduce basic criteria to restrict or prohibit the use of certain ingredients in the production of tobacco products, as well as the one of option 3, to introduce a common list of ingredients allowed or forbidden, seem to us an unjustified measure. Moreover, the eventual ingredients' ban would have drastic economic and labour related repercussions for the industry of tobacco growers in our Country. These measures, in fact, would not make the cultivation of tobacco used to produce American blend cigarettes competitive anymore. The Italian tobacco production, located in important Regions such as Campania, Umbria and Veneto and employing more than 50,000 growers, mainly depends on the production of this kind of cigarettes. What is more, the survival of the Italian tobacco growers industry would also be undermined by the fact that EU aids, already uncoupled, will be eliminated in 2013.

### **access to tobacco products**

#### **problem definition**

No

#### **explanations**

La spiegazione dettagliata è nello spazio relativo alla scelta dell'opzione

#### **which option**

Controlled supply and access

#### **which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale;  
Access to vending machines to be restricted to adults

**additional option**

We believe that, concerning the definition to establish the limits for access to tobacco products, it is necessary that also the Directive includes dispositions imposing age verification of buyers and that also all vending machines have age verification systems, as already foreseen by Italian law. However, we strongly disagree with the possibility of product display ban in authorized point of sales. First of all, there is no proof that display ban reduces smoking incidence or contributes to restrict youth access to tobacco products. Moreover, these restrictions would imply significant costs and burdens for retailers. That is why, in our view, the survival of the legal industry would be undermined by such measures with dramatic impacts on small retailers that could incur in losses bringing them to bankruptcy. This scenario, on the other side, would strongly favour illicit trade diffusion benefiting criminal organizations. As far as internet sales are concerned, we support the adoption of restrictions to online sales based on the fact that this commercialisation could mean lower quality service and products, which in Italy are guaranteed by our distribution system, requiring the grant of public authorisations to sell tobacco products. Internet sales, circumventing any kind of controls could entail not only lower quality but also dangers for consumers' health.

**questions on reporting****problem definition**

No

**explanations**

siehe unten!

**which option**

Establish a common compulsory reporting format

**additional options**

Die Formate und Meldemechanismen zur Vorlage von Daten zu Zusatzstoffen von Tabakerzeugnissen fallen innerhalb und zwischen den EU-Mitgliedsstaaten unterschiedlich aus. Die Behörden haben Schwierigkeiten bei Vergleich und Analyse der Daten.

**additional comments**

Die neue TPD würde von Herstellern und Importeuren europaweit verlangen, die in ihren Produkten verwendeten Zusatzstoffe zu melden – doch legt die geplante TPD keinerlei abgestimmtes System für die Vorlage solcher Angaben fest.

**regulation of ingredients****problem definition**

No

**explanations**

sieh unten

**which option**

Establish a common list of tobacco ingredients

**which one**

Establish a positive common list of tobacco ingredients; Establish a negative common list of tobacco ingredients

**explanations**  
Nach meiner Überzeugung gehört das Rauchen zu den Genußmitteln, deren Gebrauch jedem Menschen selbst überlassen werden soll. Damit entscheidet auch jeder selbst, wie er mit etwaigen Risiken umgehen muß und trägt ggf. deren Konsequenzen. Erschwernisse über die bereits vorhandenen Restriktionen hinaus, denen Raucher unterliegen (Rauchverbote, Anti-Kampagnen, Verunglimpfung, permanente Verteuerungen) lehne ich ab.

Es ist absurd alles reglementieren zu wollen. Wir leben in einer freien Marktwirtschaft. Was ist denn dann mit dem Alkohol oder ,oder,oder? Wo will man die Grenzen ziehen. Der Weg ist falsch. Die Überzeugungsarbeit muß in der Kindheit und in der Schule geschehen, freiwillig und dann klappt es auch, aber nicht so. Armes Deutschland.

**questions scope**

**problem definition**

No

**explanations**

The problem definition is incorrect, vague and unclear. The consultation does not identify a problem in any of the areas it mentions in this section

**which option**

No change

**questions smokeless**

**problem definition**

No

**comments**

It is vague and the consultation document has failed to define a problem in this area.

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

I disagree with the problem definition. It is based on a series of assumptions and assertions that are wrong.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

It is vague and incomplete.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

I think that manufacturers do not add ingredients to attract non-smokers or influence existing smokers away from quitting.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

It is vague and incomplete. The Consultation document does not identify a problem in any of the areas mentioned in this section.

**which option**

No change

**which option**  
No change

**recommend option**  
The scope of the Directive can be extended to cover these other products

**questions smokeless**  
**problem definition**  
Yes

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
there is no evidence that bigger warnings are more effective. there is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. it would make easier for criminals to copy legitimate brands and would lead to an increase in illegal sales of cigarettes.

**which option**  
No change

**questions on reporting**  
**problem definition**  
No

**explanations**  
Member states can already introduces fees and sanctions.

**which option**  
Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

the focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

the only sales that are executed through vending machines are controlled by human subjects. the vending machines are "part of the solution" because they constitute an important tool in combating the sale of counterfeit tobacco products. the ban on display of products is an inhibitor of "freedom of choice" by consumers and promotes confusion between the legal product and the illegal one.

I do not agree that there is a problem at all. If there are concerns about health, fair enough, but what about cars which can drive with approx. 200 per hour, emissions of them etc. Do you intend to limit publicity thefore as well? Is there proof that publicity has made a non-smoker to a smoker? And, is there proof that a limit or ban on publicity will help?

**which option**

No change

**recommend option**

The scope of the Directive can be extended to cover these other products, but this should not include an automatic ban on one category of product (novel forms of oral tobacco). Any bans should be based on scientific assessments.

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**additional option**

There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increase in illegal sales of cigarettes.

**questions consumer****problem definition**

No

**explanations**

There is no evidence that bigger warnings are more effective. There is no evidence that plain packaging would improve the functioning of the internal market or have any public health benefits. It would make it easier for criminals to copy legitimate brands and would lead to an increase in illegal sales of cigarettes.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Member States can already introduce fees and sanctions. Enforcement of the provisions of the Directive should remain the responsibility of the Member States.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

The focus of ingredients testing should be on whether the ingredients result in increased toxicity of tobacco smoke.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

There is no clear problem stated as regards either vending machines or POSD. There is no evidence provided as to why bans would improve the functioning of the internal market or advance any public health objectives.

**questions scope****problem definition**

No

**explanations**

No, I disagree with the problem definition. The problem definition provided by the Consultation document is vague, confused and inaccurate. There is no analysis within the Consultation document of Union competence to adopt the proposed options and no discussion of the internal market issues that would be required in order for the Union to proceed on the proposed option. Furthermore, the problem definition does not contain any evidence to demonstrate the justification for the various options provided in this section

**which option**

No change

**recommend option**

No

**additional comments**

No

**questions smokeless  
problem definition**

No

**comments**

No, the problem definition is not acceptable as drafted. It is vague, confused and unclear. Statements in the problem definition address all smokeless tobacco products without making any differentiation between the various types of products in this category. By ignoring this variety, the Consultation creates confusion rather than providing clarity to allow for objective policy choices.

**which option**

Lifting the ban on snus

**additional option**

No

**additional comments**

Snus is legally sold in a number of countries worldwide and we believe there is no justification for a ban on snus within the EU.

**questions consumer  
problem definition**

No

**explanations**

There is no credible or scientific evidence which demonstrates this is a necessary step. This problem definition tries to cover too many options at once. Packaging provides consumers who wish to purchase products with information about the product they have chosen. Tobacco packaging has never been identified as a reason why children start to smoke or why adult smokers continue to choose to smoke. Plain packaging would lead to an increase in counterfeit products and illicit trade. It will have a negative impact on competition. Plain packaging expropriates the brand owners of valuable intellectual property. Pictorial health warnings make no additional contribution to the public awareness of the risks.

**which option**

No change

**additional option**

No

**additional comments**

No

**questions on reporting  
problem definition**

No

**explanations**

All EU Member States need to agree to and adopt the common reporting format for ingredient reporting in a fully harmonized way. Introducing fees and sanctions is clearly outside the Commission's competence. With regard to this option, the Commission has also failed to analyse the impact of registration fees on the functioning of the Internal Market as the level of fees would vary between Member States and would impede its functioning. Also, registration fees would likely lead to a further increase of Anti-Illicit Trade.

**which option**

Establish a common compulsory reporting format

**additional options**

No

**additional comments**

No

**regulation of ingredients**

**problem definition**

No

**explanations**

I do not agree with the problem definition. The concept “attractiveness” is an unsound base for regulation. Ingredients give brands distinctive styles -> competition. Ingredients also apply to substances in the non-tobacco materials needed to eg. filter, paper adhesive etc. There is no evidence that ingredients enhance or in themselves are addictive. The problem definition incorrectly defines the use of ingredients and claims without foundation that the majority form carcinogens, mutagens and/or toxic for reproduction. In the case of, for example, mentholated cigarettes have been available for several decades yet there is no credible scientific evidence to suggest that their use is associated with increased smoking incidence, increased consumption, change in smoking behavior or reduced quitting rates compared to other cigarettes. Furthermore, there is no evidence that smokers of mentholated cigarettes inhale more deeply.

**which option**

No Change

**additional option**

No, but a common list of authorised ingredients could be generated using both sound and scientific principles and criteria.

**additional comments**

No

**access to tobacco products****problem definition**

No

**explanations**

The problem definition is vague and incomplete. The display of tobacco products at PoS is important to the proper operation of a market economy in the sale of legal tobacco products. It informs the consumer of the products available, their characteristics, their price and the pack sizes available. Particularly in situations where other channels of communication may be restricted, consumers must be able to identify easily, quickly and effectively the existence and availability of tobacco products and to distinguish between them. Product display ban could exacerbate the illicit trade in contraband and counterfeit products. Consumers would not be able to distinguish legally traded and illicit products. Vending: vending machines in Belgium are strictly controlled to prevent sales to children. It is therefore unnecessary and disproportionate to prohibit tobacco vending.

#### **comments**

Schnupftabak führt nicht generell zu Zigarettenkonsum

#### **which option**

No change

#### **additional option**

Schnupftabak-Inhaltsstoffe auf Packung angeben + Warnung.

#### **questions consumer**

##### **problem definition**

No

#### **explanations**

Nicht das Erscheinungsbild der Packung muß verändert werden, sondern das Bewußtsein der Verbraucher, daß Verpackung als Werbung benutzt wird. Erziehung im Bewußtsein, auf

Verpackungen nicht "reinzufallen". Dies muß ein allgemeines Bestreben sein, nicht nur bei Zigaretten ! Dann brauchen Tabakwaren keine legislative Sonderbehandlung!.

**which option**

Improve consumer information

**which improvement**

Tar, nicotine and carbon monoxide levels to be replaced with general information on harmful substances in tobacco products

**questions on reporting**

**problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**questions smokeless**  
**problem definition**  
No

**comments**  
Il n'y a pas d'études scientifiques prouvant les risques concernant les produits du tabac sans fumée.

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**  
Aucune étude ne prouve l'efficacité des paquets neutres. Rien ne prouve que les photos chocs ou de plus grands avertissements sanitaires sur les paquets soient efficace. La mise en place de paquets neutres ne pourra être qu'une incitation à une guerre des prix du tabac . On augmente aussi ainsi les risques de contrefaçon. Ces mesures ne peuvent ne peuvent que pousser les consommateurs français à s'approvisionner sur les marchés parallèles du tabac ( achats à l'étranger , sur internet , contrebande ) De telles mesures risquent de déstabiliser et pénaliser économiquement le réseau des 28000 buralistes français organisés dans un réseau réglementé et sous tutelle de l'Etat.

**which option**  
No change

**questions on reporting**  
**problem definition**  
Yes

**which option**  
Establish a common compulsory reporting format

**regulation of ingredients**  
**problem definition**  
No

**explanations**

Cela risque d'entraîner une standardisation de la production avec comme conséquence une diminution de l'offre au fumeur adulte et responsable, et le risque de voir apparaître une augmentation des produits du tabac contrefaits.

**which option**

No Change

**access to tobacco products****problem definition**

Yes

**which option**

Controlled supply and access; Ban

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale

**which one2**

Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

**additional comments**

Il n'y a pas de corrélation prouvée entre la disparition des linéaires et la lutte contre le tabagisme. La France dispose d'un réseau de 28000 buralistes, préposés de l'administration responsables et professionnels, seuls habilités à vendre du tabac. Ce réseau est fortymement réglementé par l'Etat ce qui permet déjà de contrôler efficacement l'accès au produit tabac.

Yes

**which option**

No change

**regulation of ingredients**

**problem definition**

No

**explanations**

Wie ist 'Attraktivitaet' definiert? Wer bestimmt was 'attraktiv' ist? Dies ist keine wissenschaftlich messbare Kategorie und fuehrt daher nur zu sinnlosen and willkuerlichen Regulierungen.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Interneteinkauf von Zigaretten stellt einen Nischenmarkt da und eine Regulierung ist nicht erforderlich. Zigarettenautomaten sind mit Altersnachweis (bspw. dur EC-Karte) ausreichend 'sicher'. Der nicht-sichtbare Verkeuf wird vielleicht eine wenige davon abhalten Zigaretten zu kaufen aber fuer sehr viel den Kauf und das Rauchen attraktiver machen.

No

**explanations**

Die derzeitigen Vorschriften sind ausreichend. Der mündige Bürger wird schon mit genug Vorschriften entmündigt, obwohl er vielleicht ab und zu auch in der Lage und willens wäre, ganz allein und selbst mit Nachdenken Probleme zu erkennen und zu lösen. Traut uns auch mal was zu, EU-Bürokraten sind nicht per Titel intelligenter als die Bevölkerung.

**questions scope****problem definition**

No

**explanations**

I believe there is no need for further regulation. As long as he is well informed about what he consumes, the consumer should decide for himself which kind of products he prefers.

**which option**

No change

**questions smokeless  
problem definition**

Yes

**which option**

Lifting the ban on snus

**additional option**

Let the consumer decide.

**questions consumer  
problem definition**

No

**explanations**

I know many people who smoke nargilehs (water pipes) and they are well aware that it is not healthy, just like the cigarette smokers.

**which option**

No change

**additional option**

The consumer should be well-informed, but no educated and treated like a child.

**questions on reporting  
problem definition**

Yes

**which option**

Establish a common compulsory reporting format

**additional options**

It is the industry that must provide reliable data, and public administration should control this. The tobacco industry provides enough tax income to finance this supervision. I strongly disagree with any efforts to even further regulation. Option 3 is no option for a free market economy.

**regulation of ingredients**

**problem definition**

Yes

**which option**

Establish a common list of tobacco ingredients

**which one**

Establish a negative common list of tobacco ingredients

**additional option**

I agree that dangerous ingredients should be banned, but only if there is precise scientific

evidence that they are hazardous and that the industry could just as well do without them.

**access to tobacco products**

**problem definition**

Yes

**which option**

No change

**questions scope****problem definition**

No

**explanations**

Ich glaube kaum, dass eine solche Richtlinie vonnöten ist. Außerdem sollte die Bevölkerung eines jeden Landes insoweit über die Gesundheitsrisiken des Rauchens aufgeklärt sein, dass jeder selbst entscheiden kann, ob er rauchen möchte oder nicht. Insofern halte ich die Richtlinie hinsichtlich des angeblichen Schutzes eines jeden vor den Folgen des Rauchens für Bevormundung des mündigen Bürgers und in dieser Hinsicht auch kaum mit freiheitlich-demokratischen Strukturen im Alltagsgebrauch dieses Ausdrucks vereinbar.

**which option**

No change

**questions smokeless

Die geltende EU-Richtlinie ist ohnehin schon zu umfassend. Aus mir unerfindlichen Gründen werden hier Freiheitsrechte über das nötige Maß hin beschnitten. Das betrifft einmal die

unternehmerische Freiheit Gaststätten und Schankwirtschaften frei auszugestalten. Es sollte eigentlich dem Betreiber einer Schankwirtschaft überlassen bleiben, wie er die Sache mit dem Rauchen handt. In Belgien habe ich vor 3 Jahren ganz gute Beispiele gesehen. Speisegaststätten sind rauchfrei. Schankwirtschaften, Bars etc. könne selber entscheiden, wie sie es handhaben wollen. Das reicht. Weitergehende Regelungen müssten durch Gründe gestützt sein, die belegen, dass das Rauchen deutlich gefährlicher ist als beispielsweise der Schuldienst, Stahlverhüttung, Bergbau, Militär. Letztere Arbeitsstätten sind weiterhin erlaubt, obwohl es dort hinlänglich bekannt zu erheblichen Gesundheitseinbußen kommt.

**questions scope****problem definition**

No

**explanations**

The problem is not the distribution form, but uncontrolled access to drugs by minors. Grownups should have the option to decide themselves if they prefer to die earlier from parachuting or mountain hiking or from smoking.

**which option**

Extend the scope of the Directive

**recommend option**

**questions scope**

**problem definition**

Yes

**which option**

Extend the scope of the Directive

**additional comments**

We recommend the following: ♣ Extend the scope of the Directive to include all smoked products including herbal cigarettes. ♣ Do NOT extend the Directive to include electronic nicotine delivery systems (ENDS or E-cigarettes). It is the combustion process and inhalation of smoke that causes most of the harm from smoking. Therefore it is appropriate that herbal cigarettes, which are used in a similar way to nicotine cigarettes, are regulated in the same way as smoked tobacco products, and should be included in the scope of the Directive. Therefore we recommend that the scope of the Directive includes the regulation of any new smoked tobacco products (such as low emission or nicotine-free cigarettes). Novel nicotine based products (that is, products containing nicotine but not tobacco products) have the potential to offer a less hazardous alternative to cigarettes. Currently these include e-cigarettes

and nicotine gel. However, as such products are generally marketed as alternatives to cigarettes and in some cases as an aid to quitting smoking, it is appropriate for them to be brought under the same regulatory framework as pharmaceutical products rather than under the scope of the tobacco products directive. The question of how nicotine containing products should be controlled is currently under consideration by the UK's Medicines and Healthcare Regulatory Authority (MHRA) following a recent public consultation on whether to extend its remit on the regulation of nicotine replacement therapies to other nicotine containing products. The outcome of this consultation may assist the Commission in developing its policy on these products.

**questions smokeless**

**problem definition**

Yes

**which option**

No change

**additional comments**

With regard to smokeless products that are not currently illegal, particularly those used by ethnic minority populations, we recommend that they are more tightly regulated but we do not support a total ban on such products. Whilst recognising that such products are harmful, the introduction of an EU-wide ban could create an illegal market that would be more difficult to control than the current situation. Furthermore a ban would make it more difficult to engage with users to offer help in quitting.

**questions consumer**

**problem definition**

Yes

**which option**

Improve consumer information; Introduce generic or plain packaging

**which improvement**

Picture warnings to become mandatory; Tar, nicotine and carbon monoxide levels to be replaced with general information on harmful substances in tobacco products; Information on harmful substances in tobacco products that cannot be placed on the package would be placed inside the package; Health warnings to be put on water pipes

**additional option**

The minimum size of health warnings should be increased to 80% of the front and back surfaces of all tobacco packaging.

**additional comments**

Picture Warnings We strongly recommend that picture warnings should be mandatory and that they should occupy a minimum of 80% of the front and back surfaces of all tobacco packaging (i.e. not just cigarettes). The warnings should be placed on the upper portion of the packs for maximum visibility. The current situation with some Member States adopting picture warnings whilst others have not done so has created a discrepancy and uneven health protection across the EU. From an internal market perspective, the differences in rules are contrary to the operation of the single market and may constitute a barrier to trade. These

obstacles should therefore be removed and pictorial health warnings should be mandatory to ensure optimum health protection for all EU citizens. There is good evidence to show that health warnings are effective in conveying the dangers of smoking and helping smokers to quit. They also help deter young people from starting to smoke. Picture warnings are more effective than written warnings.<sup>2</sup> All warnings should be displayed in rotation so that each message is given equal display to reach its target audience. There is widespread consumer support for pictorial health warnings. A Eurobarometer survey conducted in October 2009 showed that 78% of respondents supported health warnings. Information on tar, nicotine & carbon monoxide (TNCO) Currently the Directive requires the inclusion of machine-based tar, nicotine and carbon monoxide yields on cigarette packs. This promotes the mistaken beliefs that some cigarette brands are less harmful than others and that nicotine causes disease. The EU should not only remove this requirement from the Directive but should prohibit ISO or any other emissions numbers on the pack. We support the proposal to replace numerical measurements with descriptive information on the hazardous effects of tobacco constituents and emissions. The addition of a quitline telephone service should be included on the packaging. Additional information on harmful substances in tobacco products We support the proposal to include additional information on the health effects of tobacco consumption on inserts inside the packaging. This should include advice on quitting smoking. Health warnings on water pipes There is a common perception that tobacco smoke is 'cleansed' by the water and therefore not as dangerous and some users believe flavoured shisha is not in fact tobacco. It is important that these myths are countered by requiring the inclusion of a health warning on all water pipes. Warnings should also be included on the packaging of tobacco used in water pipes. Generic or plain packaging We strongly recommend the introduction of plain or generic packaging. This should include not only the removal of all branding from the packaging but the size and shape of the packaging should also be standardised. Not only would this prevent the promotion of smoking through branding as occurs presently but it would reinforce the health warning messages. The Australian federal government has recently announced its intention to introduce plain packaging in 2012, setting a standard that the EU should follow. Tobacco packaging provides a direct link between consumers and manufacturers and is the main marketing channel, particularly in jurisdictions with tobacco advertising bans. Branding gives the misleading impression some cigarettes are safer than others.

**questions on reporting  
problem definition**

Yes

**which option**

Establish a common compulsory reporting format; Introduce fees and sanctions

**additional comments**

The current situation which allows different formats and reporting mechanisms is unsatisfactory, making it difficult for authorities to compare and analyse the data. Tobacco companies should be required to use a standardised reporting format. Additionally the companies should be required to pay a yearly registration fee to cover the costs of administering this data collection. The above measures should be compliant with Articles 9 & 10 of the Framework Convention on Tobacco Control (FCTC).

**regulation of ingredients  
problem definition**

Yes

**which option**

Establish a common list of tobacco ingredients

**access to tobacco products**

**problem definition**

Yes

**which option**

Ban

**which one2**

Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned; Promotion and displays in retail stores to be banned

**additional option**

The EU Directive should follow the lead set by Finland which, as part of its recently passed Tobacco Act, has set limits on the amount of tobacco that can be imported into Finland where the labelling differs from that of tobacco products sold in Finland. We recommend that similar limits should be set at EU level, that is, that for each Member State the amount of tobacco that may be imported for personal use which does not conform to domestic labelling requirements, should be limited to a maximum.

**additional comments**

Internet. The principle of preventing cross-border promotion of tobacco products in order to protect public health was enshrined in the Tobacco Advertising directive (2001/0119). It is logical, therefore, to extend that principle to the sale of tobacco products between member states via the Internet. We support the prohibition of tobacco sales via the Internet. Vending machines. The majority of member states (22 out of 27) already prohibit the sale of tobacco products from vending machines in order to deter young people accessing cigarettes from this source. We support this measure. Point of Sale. We support an EU-wide adoption of a ban on the display of tobacco products at the point of sale. Across the EU, most forms of tobacco advertising are now prohibited. Research shows that point of sale displays of tobacco have a direct impact on young people's intention to smoke.<sup>8</sup> Furthermore, there is a growing body of evidence to show that putting tobacco products out of sight in retail outlets can reduce youth smoking.<sup>9</sup>

**which option**

No change

**regulation of ingredients  
problem definition**

No

**explanations**

every producer of items is allowed to use what he want / materials he want. so why isn't it allowed for zigarette producers? A cook can use all ingredients he wants and you even eat it, zigarettes you just smoke. when you fear, don't smoke. when you don't know what is in your meal and you fear you don't it eat, too. Let the business do their job and concentrate on your job which is not finding more and more restricting rules.

**which option**

No Change

**access to tobacco products  
problem definition**

No

**explanations**

there are enough rules/restrictions.

No change

**questions smokeless**

**problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting****problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto

“American blend”, rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D’altra parte, come chiarito anche dall’OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60. 000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l’accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l’esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull’accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un’ottima soluzione per limitare l’accesso dei minori al tabacco.

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

**recommend option**

Der Geltungsbereich der Richtlinie sollte durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Es gibt meines Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

**which option**

No change

**additional option**

Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

**questions on reporting****problem definition**

No

**explanations**

Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Der Fokus bei der Evaluierung von Zusatzstoffen sollte ganz grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

Controlled supply and access; Ban

**which supply and access**

Age verification of buyers and other legal conditions to be set for cross-border retail sale

**which one2**

Cross-border retail sales of tobacco to be banned over the Internet; Vending machines to be banned

**additional comments**

Il n'y a pas de corrélation prouvée entre la disparition des linéaires tabac et la lutte contre le tabagisme. Le fait de supprimer les linéaires va engendrer encore plus de problèmes pour les buralistes français qui sont des entreprises à part entière et qui embauchent elles aussi des salariés. La question est: Est-ce que la suppression des linéaires tabac va t-elle arrêter les gens de fumer? Je pense que non puisque aujourd'hui il est facile de trouver en ventes des drogues dures sans avoir besoin de les exposer ni d'en faire de la publicité.

**explanations**

Aucune étude ne prouve l'efficacité des paquets neutres. Aucune étude ne prouve l'efficacité des photos chocs, ni même de plus grands avertissements sanitaires sur les paquets. La mise en place de paquets neutres risque d'entraîner une guerre des prix du tabac (puisque cela restera le seul moyen pour les fabricants de se différencier). La mise en place de photos chocs sur les 2 faces des paquets ou de paquets génériques va pousser les consommateurs français à aller s'approvisionner sur les marchés parallèles du tabac (achats à l'étranger ou de contrebande, ou sur internet. De telles mesures risquent de déstabiliser et pénaliser économiquement le réseau des 28 000 buralistes français organisés dans un réseau réglementé et sous tutelle de l'Etat. »

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting  
problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients  
problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione,

che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60. 000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products**

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting****problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo

SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60. 000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

#### **explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte

per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

**explanations**

meiner meinung nach braucht es weder grössere warnings noch fotos oder weisse packungen für cigars. wir sind alle erwachsene bürger und wissen um die gefahren des rauchens, doch wollen wir bei der richtigen gelegenheit unsere cigars genießen.

**questions scope****problem definition**

Yes

**which option**

No change

**recommend option**

Der Geltungsbereich der Richtlinie sollte durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Es gibt unseres Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

**which option**

No change

**additional option**

Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

**questions on reporting****problem definition**

No

**explanations**

Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Der Fokus bei der Evaluierung von Zusatzstoffen sollte ganz grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

**which option**

No change

**additional option**

Internetkäufe könnten zB durch Altersbegrenzungen eingeschränkt werden

No change

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting****problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

Yes

**which option**

No change

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting****problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

If people can't recognize brands, they will probably end up smoking anything in front of them. We all know tobacco is not the best thing, but I'm sure there are brands that at least are not that harmful. People who smoke simply smoke, we can't change that, but we can prevent them from smoking suspicious brands.

Yes

**which option**

No change

**questions smokeless**

**problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients****problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del

valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting**

**problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di

monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

**recommend option**

Der Geltungsbereich der Richtlinie sollte durchaus die angegebenen Produkte beinhalten. Ohne zuvorige wissenschaftliche Überprüfung der Produkte in Hinsicht auf ihre Schädlichkeit für den menschlichen Körper sollte jedoch kein Verbot ausgesprochen werden.

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Es gibt meines Erachtens keine wissenschaftlichen Beweise dafür, dass größere Warnhinweise oder Bilder besser dazu geeignet sind, potenzielle Raucher vom Rauchen abzuhalten bzw. Raucher davon zu überzeugen, mit dem Rauchen aufzuhören. Auch bei Plain Packaging gibt es bis dato keine Beweise dafür, dass sie eine Auswirkung der Gesundheit der Bevölkerung haben. Plain Packaging würde vielmehr Fälschungen und den illegalen Handel mit Tabakprodukten forcieren, weil die Fälschungssicherheit der Produkte nicht gewährleistet werden kann.

**which option**

No change

**additional option**

Zur besseren Kennzeichnung der Inhaltsstoffe könnte man z.B. Zahlen verwenden, die mit

Hilfe eines anderen Messverfahrens (zB Health-Canada-Messverfahren) ermittelt wurden. Dadurch würden die Verbraucher präzisere Informationen über die Messwerte bekommen.

**questions on reporting**

**problem definition**

No

**explanations**

Die Rechtsdurchsetzung ist Angelegenheit der Mitgliedsstaaten und nicht der EU. Auch wenn die EU dieses Prinzip einführt, würden die Beträge für Gebühren und Sanktionen zwischen den Mitgliedsstaaten unterschiedlich ausfallen. Dies deshalb, da es in die Kompetenz des jeweiligen Staates fällt. Eine Verbesserung des Funktionierens des Binnenmarktes ist somit auf diese Weise nicht ersichtlich.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

Der Fokus bei der Evaluierung von Zusatzstoffen sollte ganz grundsätzlich darauf ausgerichtet sein, ob deren Einsatz die toxische Wirkung des Zigarettenrauches erhöht. Es sollte daher nicht von der Attraktivität der Stoffe ausgegangen werden, da diese nahezu ausschließlich auf subjektiven Kriterien fußen.

**which option**

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Die hier dargestellte Problemstellung zielt nicht auf gesundheitspolitische Probleme im Zusammenhang mit Tabakkonsum und die Verfügbarkeit der Produkte ab. Weiters werden keinerlei Beweise für die Annahme angeboten, dass derartige Verbote den Binnenmarkt stärken oder aber zu einer Reduktion des Tabakkonsums führen würden.

**which option**

No change

**additional option**

Internetkäufe könnten zB durch Altersbegrenzungen eingeschränkt werden.

**questions scope****problem definition**

Yes

**which option**

No change

**questions smokeless****problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer****problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**

No change

**questions on reporting  
problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients  
problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**which option**

No Change

**access to tobacco products****problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

**which option**  
Lifting the ban on snus

**questions consumer**  
**problem definition**  
No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**which option**  
No change

**questions on reporting**  
**problem definition**  
No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

No Change

**access to tobacco products**

**problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.

Deutschland

**questions scope****problem definition**

No

**explanations**

Eine Änderung aufgrund von Einschätzungen ist nicht nachvollziehbar. Dies muss erst belegbar sein.

**which option**

No change

**questions smokeless  
problem definition**

No

**comments**

Einerseits betreffen diese Produkt nur die direkten Konsumenten, die selbst über Ihre Risiken entscheiden können. Und es gibt keine fundierten Belege zu dieser Thematik.

**which option**

Lifting the ban on snus

**questions consumer  
problem definition**

No

**explanations**

Diese Maßnahmen üben keinen Einfluss auf das Rauchverhalten aus. Die Konsumenten sind ausreichend über sämtliche Risiken aufgeklärt und werden genügend eingeschränkt.

**which option**

No change

**questions on reporting  
problem definition**

No

**explanations**

Dies betrifft jeden Mitgliedsstaat für sich und muß nicht über die EU-Kommission geregelt werden.

**which option**

No change

**regulation of ingredients  
problem definition**

No

**explanations**

Die ergibt evtl. nur eine Verlagerung von einem Produkt zu einem anderen. Auch in anderen Ländern, in denen bereits Tabakwaren ohne Zusatzstoffe angeboten werden, hat sich der Konsum nicht verändert.

**which option**

No Change

**access to tobacco products  
problem definition**

No

**explanations**

Wie weit soll die Regulierung noch gehen. Durch diese Maßnahme werden Konsumenten in eine fast schon illegale Rolle gedrängt. Personen, die nicht Rauchen, tun dies auch in Zukunft nicht oder auch in Zukunft, selbst wenn die Produkte nicht mehr beworben werden.

**which option**

No change

**questions smokeless**

**problem definition**

Yes

**which option**

Lifting the ban on snus

**questions consumer**

**problem definition**

No

**explanations**

Non concordo che "l'evidenza mostra che, se adeguatamente dimensionate e ben collocate, le avvertenze illustrate costituiscono una misura efficace per informare il pubblico in merito ai pericoli del fumo" e che "maggiore è la dimensione dell'avvertenza illustrata, maggiore ne è l'efficacia". Talvolta le immagini illustrate introdotte in alcuni paesi per sostituire le avvertenze sanitarie scritte, più che informare il consumatore sembrano essere state introdotte per suscitare stupore e shock. Non sembra questa la strada migliore per proteggere la salute dei consumatori, che già sono molto consapevoli dei pericoli e della dannosità delle sigarette. Sono anche totalmente contrari all'introduzione del cosiddetto "pacchetto generico", che rischia di favorire il business delle organizzazioni criminali e di danneggiare le aziende serie che tradizionalmente forniscono solo società manifatturiere di altrettanta serietà ed operanti solo sul mercato legale, che si vedrebbero gravemente danneggiate per la distruzione del valore dei marchi. Tra l'altro il "plain packaging" spingerebbe ad una concorrenza basata sul prezzo e non sulla qualità, così danneggiando il tabacco europeo che della qualità superiore ha l'unica arma possibile, ora che i sostegni diretti ai produttori, per compensarne i costi più alti, sono stati smantellati.

**questions on reporting**

**problem definition**

No

**explanations**

Sono d'accordo sulla creazione di un formato comune di reporting ma non concordo con la creazione di un nuovo livello di imposizione fiscale che andrebbe a sovrapporsi a quello dello stato membro, creando confusione e andando contro i principi di uniformità dell'Unione.

**which option**

Establish a common compulsory reporting format

**regulation of ingredients**

**problem definition**

No

**explanations**

Sono in totale disaccordo con l'ipotesi di vietare l'impiego di ingredienti nella produzione di sigarette. Questa ipotesi finirebbe per avere serie conseguenze per le produzioni di "Burley", in Italia e in tutta Europa. Questa qualità di tabacco, utilizzata principalmente per il cosiddetto "American blend", rispetto ad altre varietà di tabacco, necessita di un certo numero di ingredienti in fase di lavorazione. D'altra parte, come chiarito anche dall'OMS e dallo SCENIHR non esiste alcuna prova scientifica del fatto che le sigarette realizzate senza ingredienti (come quelle che utilizzano la varietà di tabacco "Virginia") siano meno dannose di quelle che necessitano di ingredienti. Questa, pertanto, appare una chiara discriminazione, che avrebbe il solo effetto di pregiudicare significativamente gli oltre 60.000 addetti alla coltivazione di tabacco in Italia e circa 400.000 in tutta Europa.

**access to tobacco products**

**problem definition**

No

**explanations**

Le enunciazioni del documento di consultazione, in realtà non definiscono il problema, ma fotografano unicamente il quadro normativo di riferimento, seppure in modo parziale. Sono infatti elencati nel documento solo i paesi in cui esistono misure estreme per regolamentare l'accesso ai prodotti: paesi, ad esempio, in cui i distributori automatici sono vietati o dove è vietata l'esposizione dei prodotti nei punti vendita. Ritengo che non si debba arrivare tanto lontano per ottenere gli obiettivi prefissati di salvaguardia dei minori. Il sistema italiano di monopolio e di controlli sull'accesso, se applicato con determinazione e con le giuste risorse a disposizione degli organismi di controllo, costituisce un'ottima soluzione per limitare l'accesso dei minori al tabacco.
