

Meeting of the Commission’s advisory panel on COVID-19 - agenda

Wednesday 18/03/2020 at 6 pm

Points for discussion (leading to possible EU recommendations)

1. Healthcare systems pressure

What measures to alleviate pressure on healthcare systems (beyond social distancing)?

Do we have any evidence on the effectiveness of the “herd immunity” approach?

2. Migrant and refugee populations in the EU

What specific measures can be recommended to Member States in order to protect migrants and refugees, particularly in hotspots?

Should specific EU support be envisaged in this context?

3. Any other business

Update on guidelines on testing strategy and on community measures
