HEALTH INNOVATION CENTRE
OF SOUTHERN DENMARK

- **One care plan**, enabling all the different caregivers to work towards the same goals and support those in their services
- **One tool**, where caregivers and patients can set-up shared goals
- **One platform**, that every participant in the course of treatment uses and be orientated in
- **One platform**, making it possible to keep caregivers – and the patient – updated all the time
- **One possibility** for the patient to enter their own measurements, answer questionnaires and be informed about their treatments and goals

Perspectives

The entire lifesituation for the citizen

The acute disease of the patient

The overall health of the patient

Benefits

Less effort in finding relevant information

Freed up time

More information on the patient

More quality of care

Insight into partners work

Increased collaboration

Simple disease
and good
selfcare ability

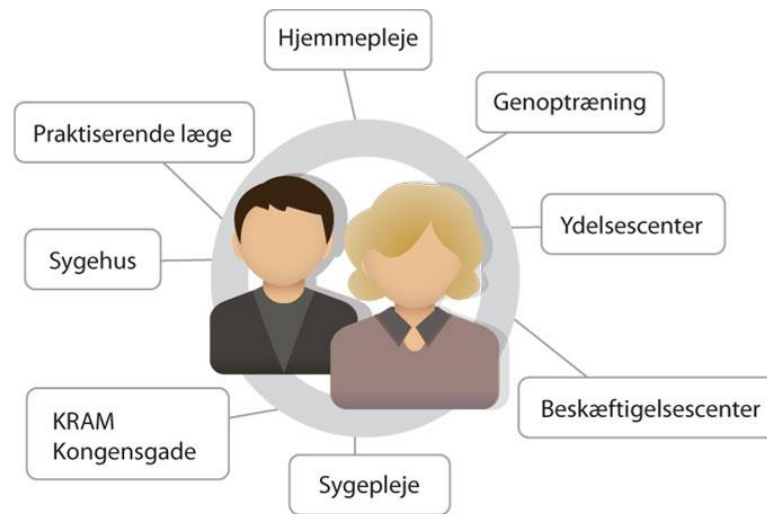

Complex disease
and good selfcare
ability

Stratification

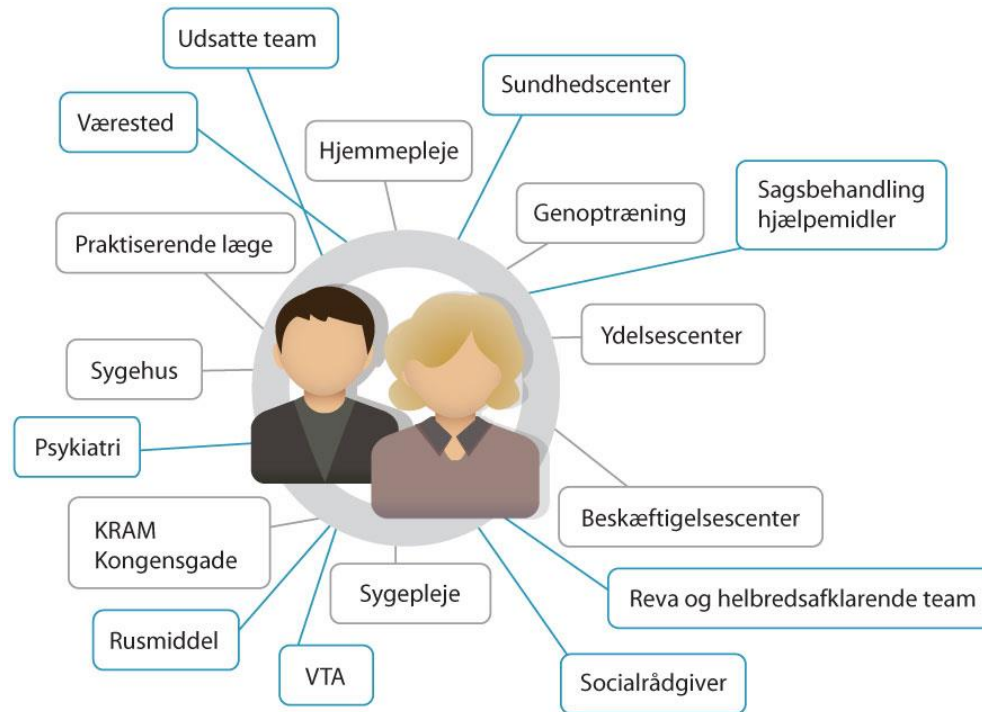

Simple disease
and poor selfcare
ability

Complex disease
and poor selfcare
ability

The patient's contacts

The patient's contacts

Benefits

Possibility to track their treatment

Feeling safe

Possibility to see goals and status

Motivation

Possibility to enter information

Involvement

Key succes factors

- Supported by strong ICT infrastructure
- Supported by clear agreements
- Supported by unique identifiers
- Real work in the underlying organisations...

Lessons learned

- Networking is the foundation
 - Respect, insight, contacts
- Time
 - Involvement, leadership commitment, expectations
- Agile collaboration in development
 - Testing, adapting, testing
