

Slovakia

Vaccine confidence factsheet 2020

European Commission

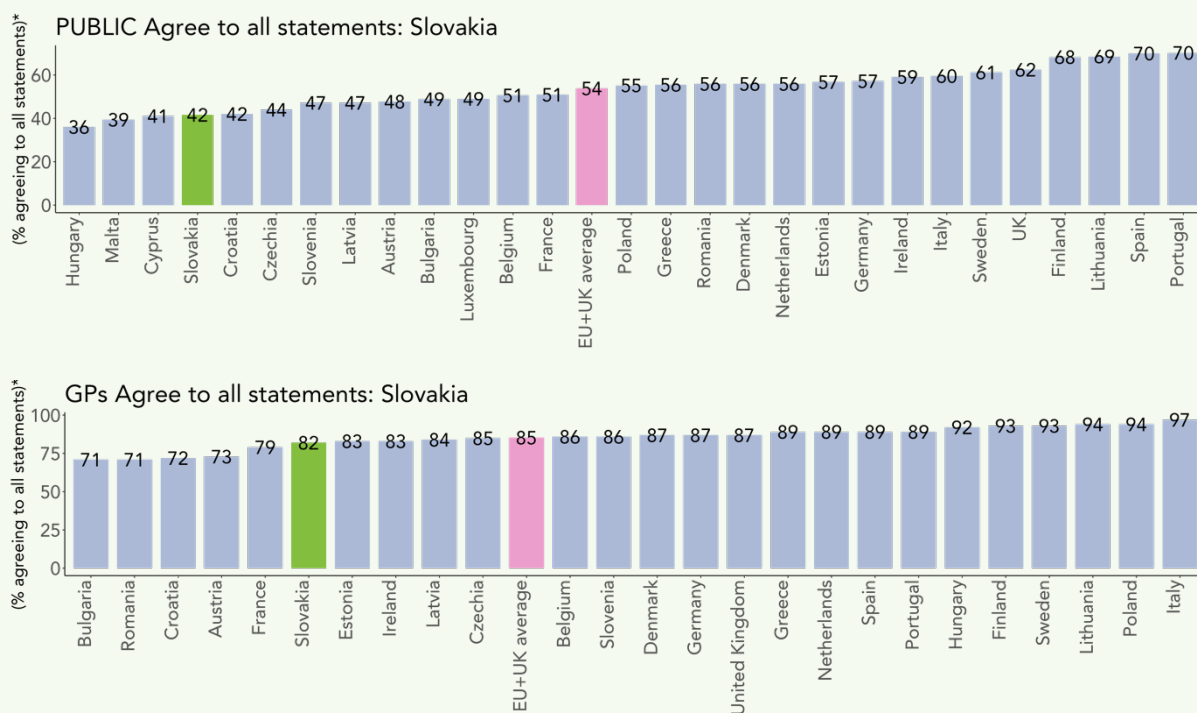

Rank (public) 25th

Rank (GPs) 20th

1000 surveyed (public)
13 – 27 Mar

100 surveyed (GPs)
8 – 21 Apr

Ranking defined as the % of respondents agreeing that vaccines are important, safe, effective, compatible with religious beliefs, and that the MMR, seasonal influenza, and HPV vaccines are safe and important.

Data collected through the CPME survey is not reported in this factsheet. GP data was not collected for Cyprus, Luxembourg, or Malta

- 77.5% believe the HPV vaccine is important**

Only significant changes in confidence are reported. No HPV data collected in 2018

Public confidence: Slovakia v. EU+UK average

Slovakia: confidence among GPs

Summary of likelihood to recommend MMR, flu, and HPV vaccines

79.0% would recommend the MMR vaccine to patients

97.0% would recommend the flu vaccine to patients

62.0% would recommend the flu vaccine to pregnant women

74.0% would recommend the HPV vaccine

Changes since 2018 not reported as samples are not representative across the profession with respect to sex and age, thus prohibiting a temporal comparison.

GP confidence: Slovakia v. EU+UK average
