Re: Commission Public Consultation: As Assessment of the Community System of Pharmacovigilance

Dear Dr Arlett,

I would like to express that CPME is indeed interested in participating in EU consultations such as the one on the Community System of Pharmacovigilance.

Therefore CPME had nominated a rapporteur who as we just learned has unfortunately been diagnosed with a severe disease. CPME would like to apologise as its reaction to the above-mentioned consultation will have to be postponed.

As soon as it is possible CPME though will forward you its views on the Community System of Pharmacovigilance even though it might be too late to be an actual part of the current consultation.

CPME wishes to express its readiness to participate in any future consultation on its domain of expertise.

Yours sincerely,

L. Tiddens-Engwirda
CPME Secretary General
