

Experts Group on Health Information 23 January 2014

UPDATES EUROSTAT (May 2013-Jan 2014)

Eurostat

Hartmut Buchow

Bart De Norre

Overview

- **General**
- **SILC, EHIS, HLY**
- **Disability**
- **Causes of death**
- **Health care non-expenditure**
- **Health care expenditure**
- **Morbidity**

General

- **Working Group Public Health - December 2013**
- **Revised dedicated section and database tree/presentation**
<http://epp.eurostat.ec.europa.eu/portal/page/portal/health/introduction>
- **Indicators work**
 - JAF health
 - EU-SILC 3 yearly health module (20 variables)
- **Meetings for 2014**
 - WG public health: 8-9 December
 - TG health care: 22-23 May
 - Workshop morbidity: 11-12 February

SILC, EHIS, HLY

- **Dissemination 2012 data SILC-health and HLY**
improved timeliness (December 2013)
- **Revision of EU-SILC Guidelines 2014-2015 (health)**
- **Wave 1: access to micro data available**
- **Wave 2: finalisation**
Methodological manual, Quality report, Validation rules and data file specifications, FAQ document
- **Modernisation strategy**
 - Task force on improvement of GALI
 - Feasibility study pooling data EHIS-SILC
 - EU-SILC 3-yearly health module
 - Wave 3: 2019 (as wave 2, inclusion of a disability module)

Disability

2011 Labour Force Survey (LFS) ad-hoc module on employment of disabled people

- Analysis on-going
- Dissemination of first results (Excel tables) on Eurostat website
- Statistics Explained articles: first semester 2014

European Health and Social Integration Survey

- Micro-data all received, validation on-going
- Tables on Eurostat website by first semester of 2014
- no new EHSIS in the future (Modernisation strategy)

Dissemination of a large number of data sets (GALI breakdown SILC)

Modernisation

- Disability breakdown via GALI in all surveys?
- Consultation round MS: national statistics on disability (DSS)

Causes of Death - COD

- **ICD-10 revision**

- Unanimous WGPH statement to WHO to re-consider adoption of ICD-11 in May 2015 in order to ensure timely and proper implementation for COD and CARE data at national and supra-national level (IRIS).

- **Data Dissemination**

- All tables revised in line with the new COD shortlist and the new standard population
- Additional tables on public health themes (Satellite lists) agreed by the WGPH:
 - Amenable deaths to health care;
 - Preventable causes of deaths;
 - Infant causes of deaths;
 - Deaths related to land transport accidents;
 - Deaths related to dementias including Alzheimer's disease, and
 - Deaths by infectious diseases.

Health Care non-expenditure statistics

- **Eurostat will develop legal measures for implementing Regulation 1338/2008 concerning health care non-monetary data by 2016**
- **Basis: Joint Questionnaire with OECD and WHO and the Eurostat additional module**
- **Member States nominated an assisting Task Force (TF)**
- **TF Regulation HC non Expenditure: kick-off 4-5 February 2014**
- **Close cooperation with TG CARE**
- **First draft implementing Regulation to be discussed at the WGP Meeting 2014**

Health Care expenditure statistics

- **Annual Joint Questionnaire (OECD, ESTAT, WHO)**
- **Development of a Commission Regulation on health care expenditure data**
 - 2013:
 - Pilot data collection draft Regulation variables by 6 countries
 - setup of a Task Force to analyse the results and improve legal text
 - Draft Regulation approved by WG PH in December with few amendments
 - 2014:
 - 2nd pilot data collection (about 15 countries)
 - adoption of regulation
 - 2015: JHAQ-SHA2011 transmission under gentlemen's agreement (about 25 countries)
 - 2016: JHAQ-SHA2011 transmission under new IR

Morbidity Statistics from administrative sources

- TF MORB report on 16 pilot studies:
Regular MORB statistics are feasible – recommendation to go ahead
- WGPH welcomed TF report, however:
 - Action plan for implementation too ambitious
 - needs for financial support
- Agreement on 2-steps approach:
 - 1st step:* National inventories on best estimates from different sources
 - Workshop on 11-12 February 2014
Given a substantial interest by a majority of countries:
 - Restricted call for proposals
 - Analysis of the inventories
 - WGPH 2016 (2017): Decision on going ahead
 - 2nd step* after WGPH green light: Pilot MORB data collection by all MS

Better use of data from administrative sources

Two projects started in November 2013

1. Health Expenditures by Diseases and Conditions (HEDiC) – call for tender

Goal: Methodology for transactions within the health systems in relation to health outcome

2. Electronic Death Certification (eDC) – restricted call for proposals

Goal: to improve quality and timeliness of the COD data collection

- 5 Member States participate: *AT, FI, HU, SI, NL*

3. Results by mid 2016
