Vaccine confidence factsheet 2020

Rank (public) 1st

Rank (GPs) 7th

**1000 surveyed (public)
13 – 27 Mar**

**101 surveyed (GPs)
30 Mar – 2 Apr**

Ranking defined as the % of respondents agreeing that vaccines are important, safe, effective, compatible with religious beliefs, and that the MMR, seasonal influenza, and HPV vaccines are safe and important.

Data collected through the CPME survey is not reported in this factsheet. GP data was not collected for Cyprus, Luxembourg, or Malta

Portugal: confidence among the public

86.7% believe the flu vaccine is important (+8.8% since 2018)

91.1% believe the HPV vaccine is safe

92.8% believe the HPV vaccine is important

Only significant changes in confidence are reported. No HPV data collected in 2018

Public confidence: Portugal v. EU+UK average

Portugal: confidence among GPs

European Commission

Summary of likelihood to recommend MMR, flu, and HPV vaccines

100.0% would recommend the MMR vaccine to patients

100.0% would recommend the flu vaccine to patients

92.1% would recommend the flu vaccine to pregnant women

98.0% would recommend the HPV vaccine

Changes since 2018 not reported as samples are not representative across the profession with respect to sex and age, thus prohibiting a temporal comparison.

GP confidence: Portugal v. EU+UK average
