

EU4Health 2021 work programme

Info Session

13 July 2021, 10:00 – 13:30 CET

The EU4Health programme represents an unprecedented Union level financial commitment for health actions in comparison with previous health programmes. It will work in synergy with and in a manner that complements other Union policies, programmes and funds.

The EU4Health programme will provide funding to eligible legal entities from the Member States, third countries associated to it or third countries listed in the annual work programme, created under Union law or an international organisation such as health organisations, non-governmental organisations (NGOs), the private sector and other eligible legal entities. The funding will be provided in the form of grants, procurement and prizes, directly by the Commission or by the Health and Digital Executive Agency (HaDEA).

On 24 June 2021 the Commission adopted the work programme 2021 (C(2021)4793 final) which sets out the priorities and actions for 2021, including resource allocation, for the implementation of the EU4Health Programme.

The info session is organised in collaboration with HaDEA to present the procedure for grants and public procurement focusing on the first wave of calls to be launched before August.

You can join the event by [clicking here](#).
