

European Academic Global Health Alliance (EAGHA)

Dr. Bayard Roberts

London School of Hygiene and Tropical Medicine

European Academic Global Health Alliance (EAGHA)

- 50 academic institutions in Europe with involvement in Global Health and various disciplinary backgrounds
- A platform to exchange views and ideas to develop a European academic voice on Global Health issues and to advise relevant policies
- Facilitate and support partnerships between European institutions and their counterparts in low and middle-income countries

Key topics of concern for EAGHA

1. The post 2015 process
2. Adaptation and mitigation of climate change
3. Universal health coverage & health systems support
4. Measuring aid effectiveness
5. The Transatlantic Trade and Investment Partnership

1. The post 2015 process

Support the development of indicators:

- E.g. Health systems and universal health coverage
- E.g. Linking health and environmental sustainability
- E.g. NCDs
- Focus on equity

EAGHA members can provide support on developing rationale, methods, selection and data sources for key indicators

2. Adaptation and mitigation of climate change

- Health is inextricably linked to climate change
- Health benefits from 'low carbon' economy (housing, transport, food and agriculture, electricity generation)

EAGHA members can help design, promote, implement and monitor policies to reduce pollutant emissions.

3. Health systems support & universal health coverage

- Health systems a neglected area of investment & engagement
- Universal health coverage a central component
- Equity a critical issue
- EAGHA has expertise in health systems analysis and health systems strengthening

EAGHA members can support priority setting, analysis, and policy development.

4. Measuring aid effectiveness

- Need to improve measurement of aid effectiveness and attribution (development and humanitarian contexts)
- Strengthen development of strategies, tools and indicators to harmonise and improve measurement approaches

EAGHA members have expertise in measuring aid effectiveness and can provide support on the above.

5. The Transatlantic Trade and Investment Partnership

- Transfer sovereign power from judicial system to unaccountable arbitrators?
- Fails to adequately protect right to regulate?
- Compromises government ability for public health legislation (e.g. tobacco packaging, alcohol pricing etc)?
- Reduce government control over private health providers?
- Global perspective

EAGHA members can contribute to analysis, seminars, discussions.

How EAGHA can help

We can contribute to:

- Analysis, measurement methods & indicators
- Position papers
- Working groups
- Running seminars
- Work with other Directorates
- Support framing Horizon 2020 calls

Please let us know how we can help
