

# **EU systems for traceability and security features of tobacco products**

**- Webinar for economic operators -**

Directorate General for Health and Food Safety  
European Commission

**Brussels, 23<sup>rd</sup> April 2018**

**Please note that any views expressed in this presentation may in no way be regarded as stating an official position of the Commission.**

- Have there been any economic - financial - and technical studies (Impact Assessments) made by the Commission regarding niche products in differentiation to factory made cigarettes with a high market volume all over the member states?
- Is data security for the supply chain (from the manufacturer/importer to the first retail outlet) ensured and who will be legally responsible if data gets lost?
- Please clarify what is the final position of the Commission on products for export to third countries that do not accept the labelling of products with UIs? How will this problem be solved? When will this information be communicated to stakeholders?

**THANK YOU  
FOR YOUR ATTENTION**
