

# EU4Health 2021 work programme Info Session

15 July 2021, 10:00 – 12:45 CET

---

The EU4Health programme represents an unprecedented Union level financial commitment for health actions in comparison with previous health programmes. It will work in synergy with and in a manner that complements other Union policies, programmes and funds.

The EU4Health programme will provide funding to eligible legal entities from the Member States in the form of grants, procurement and prizes, directly by the Commission or by the Health and Digital Executive Agency (HaDEA).

On 24 June 2021, the Commission adopted the 2021 work programme (C(2021)4793 final) which sets out the priorities and actions for 2021, including resource allocation, for the implementation of the EU4Health Programme.

Due to the number of joint actions to be launched in 2021, the nomination of competent authorities will be organised in two waves.

The info session is organised in collaboration with HaDEA to present the joint actions to be launched in the first wave.

**You can join the event by clicking [here](#).**
